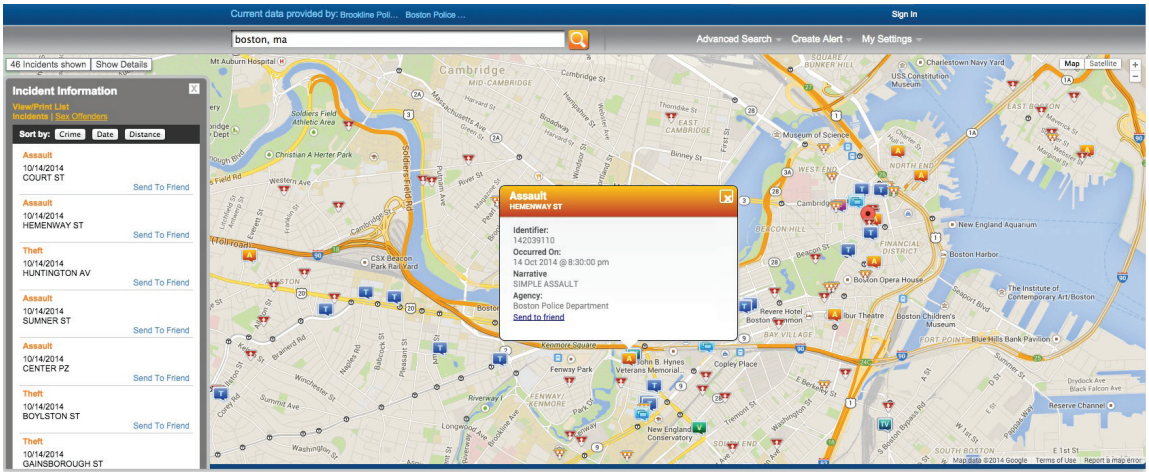
CRIMEREPORTS

INFORM, EDUCATE AND EMPOWER YOUR COMMUNITY



Motorola's CrimeReports automatically publishes crime data from your Records Management System (RMS) or Computer-Aided Dispatch (CAD) system to an online map. Citizens can access and browse crime information as shown from any computer or mobile device and are able to submit anonymous tips through the platform. CrimeReports expands public information flow and promotes two-way dialogue.

KEEP YOUR COMMUNITY INFORMED AND ENGAGED

CrimeReports allows you to increase the visibility of your agency's efficiency – improving public and media perception regarding the real strides being made in reducing crime. Citizens can sign up to receive official alerts from their local agency, as well as daily, weekly, or monthly updates on any number of crime types. Clear, transparent, and timely communication increases public confidence and reduces requests for information – saving your agency time and money.

INCREASE INFORMATION SHARING WITH ANONYMOUS TIPPING

CrimeReports.com includes a tip submission tool built directly into the platform. Citizens can send tips related to crimes already listed on the map to aid investigations, as well as non-reported crimes. And while tips are anonymous and encrypted, agencies can communicate with the tipster through email to gain further information.

SIMPLE AND EASY INTEGRATION

CrimeReports integrates with most RMS and CAD platforms on the market today. This allows agencies to normalize their data in order to show icons representing specific crime types on a map. And with automated sync functionality, the information on the CrimeReports map is always current and up-to-date.

Citizen
Increased awareness of and confidence in law enforcement activities.

Media
Streamlined inquiries with automated crime publication.

Officer
Increased awareness of crimes and trends within patrol areas.

Chief
Increased visibility of agency's efficiency–improving public and media perception.

FEATURES

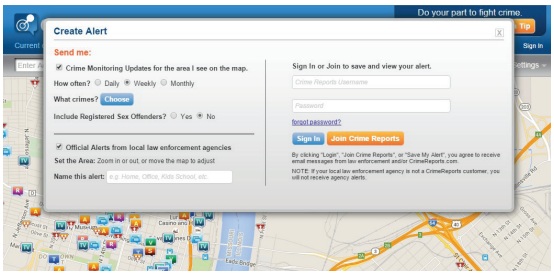
- **Real-Time Data Feed:** Automatically publish the most up-to-date crime information utilizing scheduled sync functionality. No need to wait for weekly or monthly reports. Active intelligence is now available to every staff member.
- **Online Administration Tools:** Easy-to-use tools allow anyone to manage users, create beats, and add the agency's crime map directly to their Website.
- **Custom Narrative Fields:** Increase agency transparency by providing the public with detailed information about each crime.
- **Shape File Support:** Segment your map into separate beats or zones in order to provide staff with crime map reports detailing the criminal activity that occurred during their off days.
- **Sex Offender Data:** Make the public more aware of sex offender locations through federally syndicated criminal sex offender information.
- **Citizen Camera Registration:** Enlist willing citizens to assist your crime fighting efforts by securely identifying and registering the location of their residential or commercial security cameras. As users sign up, providing their contact information, camera information, and location, the information will automatically be available to you. Whenever there is a crime, you can access the list of registered cameras and contact the owners, saving you time and effort during emergency responses and investigations.

FAST DEPLOYMENT

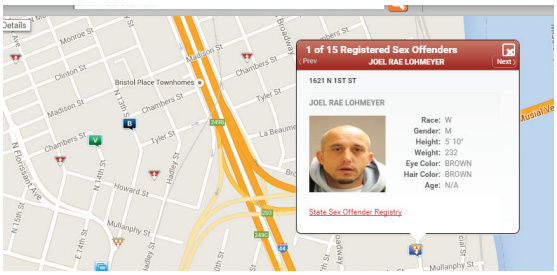
Benefit from CrimeReport's cloud-based back end by receiving software updates directly from Motorola. CrimeReports is a cloud-based application that does not require extra IT investment by you.

WORLD-CLASS SUPPORT

Motorola provides as much training as required for a successful deployment. Live support ensures quick resolution to questions or issues. And after hours on-call support is available for urgent matters.



Citizens can register for alerts about crimes in their community



View federally syndicated information such as sex offender data in addition to crimes in the community
