

CONNECTED AND PROTECTED SMART BASES

SUPPORTING THE DIGITAL TRANSFORMATION OF MILITARY BASES

In a challenging and increasingly unpredictable world, Motorola Solutions offers the first and only integrated mission-critical technology ecosystem unifying voice, video, data and analytics, providing real-time information and situational awareness to help protect your military facilities and keep personnel and assets safe and secure, both inside and out.

Effective Command & Control

Command Centre Solutions

- Orchestrate the seamless flow of multi-modal information from military bases
- Reduce the cognitive workload on Commanders and their teams, enabling mission success

Observe, Learn & Predict

Video Security & Analytics

- A broad range of smart cameras continuously scan, analyse and learn from the base environment
- Powerful AI video analytics, including unusual motion detection and facial recognition, helps teams with enhanced situational awareness

Secure People & Assets

Access Control & Alarm Systems

Base perimeter monitoring, access control and alarm systems provide the flexibility to:

- Proactively manage physical site security
- Coordinate notification and emergency alert systems over mission-critical networks

Proactive Monitoring

Threat Detection & Alerting

Receive real-time alerts from sensors to support proactive enforcement and a coordinated emergency response:

- Perimeter sensors, intrusion detection & access control systems
- Concealed weapons & gunshot detection systems
- Cybersecurity & weather alerts

See & Be Seen

Body-Worn Video

- Heighten situational awareness, calm difficult encounters for base security teams and military police
- Provide crucial evidence for after-action analysis

Always Connected & Protected

Personal & Platform Radio Solutions

- Ensure the uncompromised flow of external and internal secure voice and data communications
- Leverage portable and mobile software defined narrow and wide band radios, offering secure push-to-talk and broadband connectivity

Monitor, Detect & Respond

Cybersecurity Services

A comprehensive suite of cybersecurity services support:

- 24/7 systems monitoring & analytics
- Risk assessment & consulting services
