

# MOTOTRBO™ ION SMART RADIO FOR BUSINESS

**The Power of the Motorola Solutions Unified Technology Ecosystem. The Simplicity of One Device.**

What's the ideal device for workers on the job? Is it an Android app-based touchscreen smartphone? Or a reliable, rugged instant communication Push-to-Talk (PTT) radio?

**Now you don't need to choose. With the new MOTOTRBO™ Ion smart radio, you get it all.**

MOTOTRBO Ion works like you do. It's the first business-ready rugged communication device with all-on voice and broadband data capabilities. It brings together renowned PTT performance, an open app ecosystem on the Android platform and access to the Motorola Solutions unified technology ecosystem — from video security and analytics solutions, to best-in-class network security, to powerful new software and technology services like smart virtual assistants.

**Communicate With Anyone.  
Anywhere. Over Any Device.**

Even the most advanced technology ecosystem is only as powerful as your ability to access it. That's why MOTOTRBO Ion allows you to communicate with virtually anyone, anywhere, using any device. With Seamless Voice Handover, your device automatically switches to broadband when you roam beyond your radio system coverage, so you're always connected to your teams and data. Plus, the Motorola Solutions WAVE PTX app provides full interoperability with any device. Now, your teams can easily and quickly connect and share multimedia over laptops, tablets, phones and PTT radios.

# A UNIFIED TECHNOLOGY ECOSYSTEM IN THE PALM OF YOUR HAND

We believe safety is the foundation on which everything else is built. This foundation is built using technology that works for you and works together. That's why at Motorola Solutions we built the first and only [technology ecosystem](#) that unifies voice, video, data and analytics on one common platform.

By seamlessly integrating video security and analytics, command center software and critical communications technologies, you can eliminate organizational silos, simplify management and easily automate custom workflows. Now, you can more effectively detect, analyze, communicate and respond to any security and operational threats.

MOTOTRBO Ion brings the Motorola Solutions unified technology ecosystem to the palm of your hand. Stream live video from security cameras and other devices, then share those clips with your teams. See real-time alerts from access control and analytics-based sensors configured through our workflow automation tool. Focus on what matters the most and automate the rest with Orchestrate, our cloud-based workflow automation tool that lets you automatically control your integrated technology ecosystem. Or download 3rd party workflow apps to help automate other routine business processes.

## MOTOTRBO ION: IN ACTION DURING A TYPICAL WORK DAY

Across industries, the ability to quickly and efficiently detect, analyze, communicate and respond to potential threats and everyday challenges is critical to operating a well-run business.

### Hospitality

In the hospitality industry, ensuring customer satisfaction is key. That means complex operations must happen smoothly, often out of view from guests. And that requires seamless communication between many different teams and functions, often using different devices and technology. MOTOTRBO Ion allows hospitality workers to stay connected regardless of network or device, with deep technology integrations that speed results to keep guests safe and happy.

#### Integration with IoT Devices

When a thermostat malfunctions in a guest's room, it can automatically send an alert to the facilities supervisor's radio. The supervisor can then open a work ticket and radio out to dispatch a maintenance team member. Within a few minutes, the supervisor receives an alert that the ticket has been resolved.

#### Work Ticketing

When a worker notices a leaking pipe, they can instantly radio maintenance along with an image of the issue. Maintenance arrives the first time with the right part to quickly fix the issue.

#### Video Security Integration

When a video camera sees someone in a restricted area, its self-learning video analytics automatically alert security staff. Staff can radio the nearest personnel, along with an image of the person to the entire security, events and guest services teams.

#### Intelligence at a Glance

When a shuttle driver needs to communicate with hotel staff, they only need to use one device regardless of who they're trying to reach. At the same time, the front desk can track the shuttle's location directly on their MOTOTRBO Ion smart radio, eliminating distractions for the driver while providing hotel staff with more information at a glance.

# ALWAYS BE ON WITH MOTOTRBO ION

With MOTOTRBO Ion, teams stay connected across networks and devices. Business-critical data and workflows are unified and simplified. And the capabilities your workforce needs to be at their best are always on. Explore the MOTOTRBO Ion smart radio and experience how the power of the Motorola Solutions technology ecosystem can transform your operations.

**The best part? You can do it all right on your MOTOTRBO Ion smart radio.**

## A Universe Of Business Apps In Your Hand

MOTOTRBO Ion arrives ready to access a universe of Android-based apps. Your teams receive full multimedia capabilities and the complete Google Play store experience with all of G-Suite, including Gmail, Calendar and more. Plus, you receive access to thousands of 3rd party apps for business including ticketing, scanning, searching, collaborating and more.
