

ION AND ANDROID ENTERPRISE RECOMMENDED (AER)

Android is certified by Google as an AER device. Android Enterprise Recommended (AER) is an ecosystem of devices and services that meet Google's strict enterprise requirements for performance, consistency and security updates. AER establishes best practices and requirements backed and conducted by Google's rigorous test processes.

KEY ADVANTAGES OF AER

ENTERPRISE GRADE FEATURES

Devices meet Google's strict enterprise requirements about devices (hardware and software) and services, and partners are trained and supported by Google to deliver successful Android deployment.

STREAMLINED DEPLOYMENT AND MANAGEMENT

AER provides standardized management device setup with a wide range of provisioning capabilities, including Zero-Touch enrollment. This ensures consistent, predictable and scalable deployments.

REGULAR SECURITY UPDATES

AER provides timely security upgrades to make sure devices are running at optimum safety and efficiency.

MANY CHOICES FOR MDMS

Ion can be managed by any MDM that is certified by Google as part of its AER program. Users may select from a wide range of MDMS to best suit their needs.
