COMMAND STAFF PRODUCTIVITY DASHBOARD
CREATE A CULTURE OF ACCOUNTABILITY AMONG AGENCY PERSONNEL

CULTURE OF ACCOUNTABILITY
The Command Staff Productivity Dashboard combines with an agency's CompStat Management Dashboard (sold separately) to provide administrators with easy visibility into each officer's or group's workload, performance, and statistics, helping to create a culture of accountability in the department. Administrators can pull statistics regarding incidents such as accidents, arrests, citations, and warnings. Having this data quickly available allows executives and managers to focus on outcomes and accomplishments in the department, instead of just a process or statistic.

INCREASED TRANSPARENCY
Using the Command Staff Productivity Dashboard, agency administrators can create easy-to-read reports with charts showing various statistics associated with any particular officer or group of officers in the agency. For example, administrators can create a graph showing demographic information for each individual an officer has arrested during the last two years. These detailed reports can also be shared with the community, improving transparency and building overall trust between the agency and their community.

COMPREHENSIVE REPORTS
In addition to the crime, accident, and traffic citation information administrators see when creating reports using the CompStat Management Dashboard, the Command Staff Productivity Dashboard can pull any data entered into an agency's Spillman Flex system that is attached to an officer's name. This allows for more robust and informative reports. The software also includes a mapping feature that allows supervisors to visually present where the work is needed and being performed.
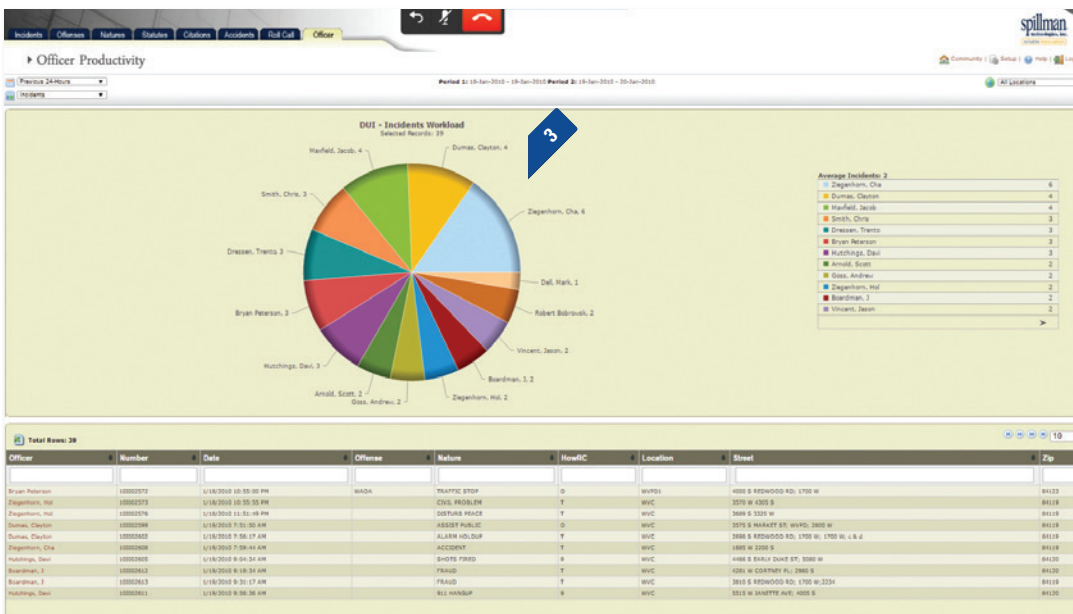

SHAREABLE REPORTS
Workstations created in the Command Staff Productivity Dashboard can be set as "read-only," allowing administrators to share reports with other personnel without giving them the ability to modify any settings or data. This increases shareability, while still protecting the integrity of the report.

FLEX

1. Users can choose the time frame the report will show, making it easy to compare statistics from one period to another.

2. Administrators can quickly see statistics on agency personnel's performance, including accidents, arrests, citations, incidents, and warnings.

3. Administrators can quickly compare the statistics from a particular group using easy-to-read pie charts.

TOTAL SOFTWARE INTEGRATION

Spillman Flex's Integrated Hub™ is an open, centralized database where all agency information is entered, stored, and extracted in real time, providing total software integration. This allows users to enter data once and have it automatically shared among related modules. Agencies using this module can optimize their system and enhance productivity through total integration with other Flex modules.
