

VEHICLE IMPOUND

MANAGE AND TRACK IMPOUNDED VEHICLES

DETAILED IMPOUND RECORDS

With the Vehicle Impound module, a record can be added for every vehicle that is impounded. Personnel can enter detailed information such as owner, driver, vehicle, lien holder, and impound information. The Vehicle Impound module also allows users to track the status and location of an impounded vehicle or enter a sale date and price.

ACCURATE FEE MANAGEMENT

Personnel can use the fee screen to track all impound, towing, and storage fee transactions associated with the impounded vehicle. The module instantly calculates storage costs for each day the vehicle is impounded, and, when users enter a fee record, the balance due and total storage charges are automatically displayed.

AUTOMATED SALES TRACKING

The Vehicle Impound module records and tracks the sale of vehicles that the agency has impounded. Users can enter sale information for single or multiple vehicles. When agency personnel marks a vehicle as sold, all charges and fees are automatically stopped.

VEHICLE REPORTS AND PREFORMATTED NOTIFICATIONS

Impound clerks can use the module to condense information into concise, easy-to-read reports and printouts. Report options include vehicle inventory status and summary, sale list, charges and payments, and invalid VINs. Additionally, preformatted impound and intent to sell Notifications make it easy to notify owners, lien holders, and other responsible parties of vehicle impounds and intentions to sell.

VISUAL INVOLVEMENTS®

The Vehicle Impound module automatically displays Visual Involvements that link pertinent data associated with both vehicle and impound records to all involved records throughout the Spillman Flex system. For example, users can view relationships between impound records, their associated incident reports, and any other record linked to the incident report.

 Reason: Abandoned

1. Users can **enter detailed information** about the owner, driver, or lien holder of the impounded vehicle.
2. Agencies can **record impound data** such as the towing company, location and destination of tow, vehicle storage location, reason for impounding the vehicle, and status.
3. Personnel can **track sale information** for impounded vehicles, including the buyer's name and address, date of sale, and price.

TOTAL SOFTWARE INTEGRATION

Spillman Flex's Integrated Hub™ is an open, centralized database where all agency information is entered, stored, and extracted in real time, providing total software integration. This allows users to enter data once and have it automatically shared among related modules. Agencies using this module can optimize their system and enhance productivity through total integration with other Flex modules.
