REIMAGINE HOW SAFETY IS DELIVERED

MAXIMIZE YOUR SECURITY INVESTMENTS WITH AN INTEGRATED ECOSYSTEM

Businesses depend on an increasingly diverse set of tools and technology to help stay safe and get the job done – effectively detecting and analyzing events, communicating, responding to and reporting any security or operational threats. However, outdated and siloed systems and processes in place today can negatively impact efficiency and productivity, and most importantly, risk the safety and security of people and property. An integrated technology ecosystem reduces inefficiencies, streamlines operations and delivers improved security for your organization.

POWERFUL ALONE, GAME CHANGING TOGETHER

Motorola Solutions has reimagined how safety is delivered by developing the first and only solution that unifies voice, video, data and analytics in a single platform. With one integrated technology ecosystem supported by a single, trusted solution provider, your organization can achieve the foundation of safety that everything else is built on while also reducing costs, stress and risk. Safety Reimagined is a unified solution that enables individuals, businesses and communities to work together in more powerful ways.

The same technology that keeps your team and facility safe also makes you better at everything you do. Safety Reimagined integrates the fundamental technologies to keep your facility connected and operations efficient – providing the assurance of safety you need to deliver on your missions and objectives.

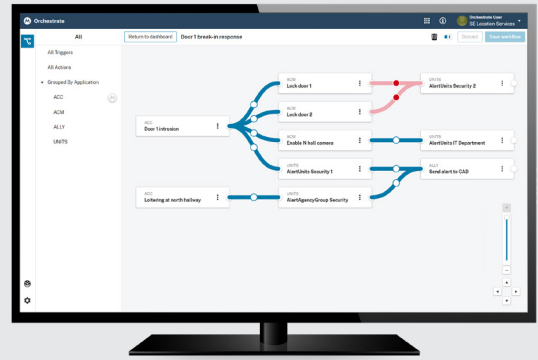

SAFETY #1 PRIORITY

Safety for school staff, students and visitors ranked as top priority.*

MOTOROLA SOLUTIONS

FOCUS ON WHAT MATTERS MOST. AUTOMATE THE REST.

Your organization's time is precious and managing the communications, video and software that comprise your security technology ecosystem can be a time-consuming, challenging task. With Orchestrate, you can automate your workflows, manage operations, configure your technology and control your security ecosystem. For example, your team can utilize Orchestrate to create "if-this-then-that" workflows that automatically send notifications from situational awareness tools instantly to appropriate staff, directly on their communication devices. Orchestrate combines artificial intelligence with digital business logic to help organizations like yours configure how you detect, analyze, communicate and respond to events.

Orchestrate

" Orchestrate enables us to receive alerts immediately from our access control system that are directly sent to our portable radios so security staff can immediately respond to an alert. This is critical in our security-sensitive locations… It enables us to put electronic security in locations that would require uniform security guards in the past."

Chris Lopresti
Director of Hospital Security

ADDRESSING POTENTIAL SECURITY THREATS

PROACTIVE PERIMETER MONITORNG

PROPPED DOOR

BOLO- "BE ON THE LOOKOUT"

DETECT Proactively monitor operational areas

ANALYZE Recognize and accurately evaluate situations as they arise

COMMUNICATE Connect workgroups that need to collaborate

RESPOND Quickly respond to and document issues

These potential security threats are just a few of many examples that utilize the integrated technology ecosystem to provide situational awareness, identify potential risks, communicate with crucial parties and potentially disarm the situation before it escalates. Orchestrate connects every step of threat management with its automated workflow design.

EXPAND CAPABILITIES. MAXIMIZE INVESTMENTS.

Because the ecosystem is modular and customizable, you can choose the solutions that best suit your needs and add to it when the time is right for your organization – while maximizing the value of your existing investments. With Safety Reimagined, you can manage your security operations from a single platform, use artificial intelligence to automate appropriate workflows and empower your team to make better, more informed decisions.

REIMAGINING SAFETY

Cities and enterprises are safer when technology and people work together. Motorola Solutions' business-critical ecosystem helps your essential enterprise secure your people, protect their property and streamline operations. By integrating technology, teams can work safer and faster, from response to resolution, with less susceptibility to disruptions and threats. With this foundation of safety in place, your organization can thrive. Your employees can feel more comfortable in the workplace, resources are better allocated and efficiencies are realized throughout all operations.
