## Uniquely positioned for long-term value creation

#### **Strong Competitive Advantage**

- Purpose-built solutions meet extreme performance requirements
- Mission-critical ecosystem across video, software and LMR creates competitive differentiation

#### **Portfolio Transformation**

- Nearly half of revenue now Video, Software, and recurring Services
- Cloud and SaaS revenue growing rapidly
- Ongoing margin expansion

#### **Well-Positioned For Growth**

- Digitization of public safety workflows driving demand for our solutions
- Increased demand for security and access control solutions driving enterprise growth

#### **Prudent Capital Deployment**

- Strong balance sheet and durable cash flows drive capital allocation framework
- Reduced outstanding shares by 52% since 2011\*
- ~\$6B\*\* in accretive acquisitions since 2015

## Video Security & Access Control

Our video security and access control systems, powered by Al, can alert you when action is needed, focusing human attention to help cover more ground and act with more certainty.

Video Security & Access Control

## Current environment

- 5M+ fixed cameras across
   300k+ installations (1)
  - Less than 20% of events are detected after the first 20 minutes of live monitoring by a person (2)

100TB of body-worn video per month in a large city, 90% of citizens prefer use of body cameras (3)

## Our approach

More than just cameras and footage, our video solutions combine computer vision with AI, helping to recognize what's important and what's not.

Our Vision: To make video monitoring obsolete.

**Mobile Video** 

## ~50% of video sales in government & public safety, education and healthcare

### **Growth & Monetization**

Video Security & Access Control

#### Rapidly gaining share in video security

- \$1.7B+ in sales growing double digits in \$26B TAM
- 5M+ fixed video cameras deployed across 300K+ sites
- 90% of our fixed video camera portfolio has embedded Al capabilities
- Broad on-prem and cloud fixed video portfolio with global go-to-market reach provides competitive advantage
- Gaining share in mobile video by utilizing existing LMR relationships in U.S. and strong international growth
- Expanding further into government... NDAA and FCC compliance
- Radio and video integration extends video portfolio into radio install base

## Land Mobile Radio Communications

Our critical communications devices and networks are designed for the harshest conditions, helping you stay connected and communicate with clarity when it matters most - from everyday routines to a crisis unfolding.

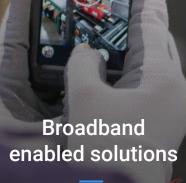

#### **Public safety** communications

Highly survivable networks, total control of coverage, capacity, maintenance

communications

Secure, encrypted networks protect sensitive communications and shield enterprise data

**Broadband solutions** enhance voice and data applications

## services

4M users under managed services, software upgrades, remote monitoring, cybersecurity

### **Growth & Monetization**

**LMR Communications** 

#### A global leader in critical communications

- Platform business growing by mid-single digits
- 13k+ LMR networks globally, 50+ nationwide & statewide systems
- Networks monetized with recurring services and devices replaced every 6-8 years
- Multi-year services agreements shifting to higher margin offerings: software upgrades, cybersecurity, remote monitoring
- Customers with unique requirements & high expectations for 'always-on' performance provides a competitive advantage
- Portfolio investments drive refresh and upsell opportunities
- Worldwide network of channel partners to amplify market reach and penetration
- Trust in Motorola Solutions built over 95 years

## Current environment

- Over 60% of PSAPS rely on our call handling software
- 10k more lives could be saved each year if 911 could get to callers one minute faster. (1)

## Our approach

Native cloud, hybrid and on-prem software solutions that support the complex process of the public safety workflow from "911 call to case closure"

## **Command Center**

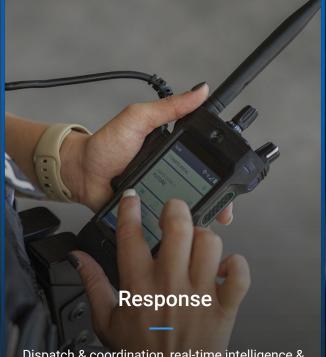

Our command center technologies can bring voice, video and data into a single view to help simplify workflows and provide the overarching perspective to make decisions with greater focus, accuracy and speed.

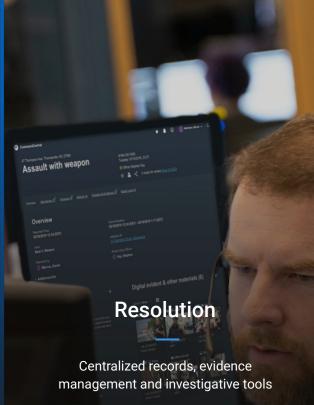

#### Command Center

Community tipping, mass notification, panic buttons and 911 call handling & routing

Dispatch & coordination, real-time intelligence & collaboration and field reporting

Helping public safety agencies, enterprises and communities to work together through the phases of an incident as it unfolds.

### **Growth & Monetization**

Command Center

#### End-to-end platform offered in the cloud and on-prem

- Large software install base of 3,600 911 centers in the U.S. creates significant expansion opportunity
- ~60% of our Command Center customers have one or more of our cloud solutions
- Sales of over \$700M growing double digits in \$14B TAM
- Margin expansion driven by transition to SaaS cloud offerings and platform rationalization
- Rave bridges enterprise security and public safety with panic button alerting, mass notification and Smart 911 app suite in a recurring revenue stream
- Video intelligence automates incident triggers and analytics speed operations

## Solving with Al

Taking a proactive and responsible approach to enabling the use of Al and generative Al in our solutions and within our teams

Human-Centered Application in 3 Areas

Automate the mundane
Human attention

Detect key events and automate workflows

Accelerate analysis

Human action

Find answers without drowning in information

Protect privacy
Human judgement

Share information quickly while keeping the privacy of unrelated individuals and objects intact

## Our impact

Our technologies can directly support some of the world's largest societal challenges every day.

#### Safer schools

More than 370,000 students have been exposed to gun violence in schools since the 1999 Columbine shooting.

Video cameras and access control can both alert and provide visibility to schools and law enforcement of what's happening, and radios support coordination and response.

Office of Community Oriented Policing. Services offers \$73M funding for School Violence Prevention Programs.

#### **Natural disasters**

U.S. natural disasters have cost \$2.655 trillion since 1980 across 376 disasters on record.

Land mobile radio devices and networks are built for redundancy and can withstand extreme conditions, offering reliable communication that's critical to coordinate emergency response.

Omdia projects active LMR users will increase to 60.5M by 2026.

#### **Community-policing relationships**

Only 43% of U.S. adults have confidence in police, indicating low levels of trust between the public and officers.

Body-worn cameras can increase transparency and accountability while community apps help the public share tips and images with public safety agencies.

14 U.S. states and certain federal agencies mandate body worn cameras for officers.

#### Soaring cyber attacks

368 confirmed cyber attacks impacted public safety agencies globally in 2023, a 64% increase over 2022.

24/7 cybersecurity services can identify system and network risks, helping to protect against attacks and supporting agencies and businesses to respond to threats.

Cybercrime is projected to cost ~\$13.82T annually by 2028.

#### Responding faster to 911

~10K lives could be saved each year if 911 could get to callers just one minute faster.

A command center can unify information about an incident, from the first 911 call to field reports, helping to keep officers informed, reduce response times and protect the chain of custody.

240M 911 calls are made to 911 each year.

### Safe harbor

A number of forward-looking statements will be made during this presentation. Forward-looking statements are any statements that are not historical facts. These forward-looking statements are based on the current expectations of Motorola Solutions, and we can give no assurance that any future results or events discussed in these statements will be achieved. Any forward-looking statements represent our views only as of today and should not be relied upon as representing our views as of any subsequent date. Forward-looking statements are subject to a variety of risks and uncertainties that could cause our actual results to differ materially from the statements contained in this presentation.

Risks, uncertainties and other factors that may cause actual results to differ materially from those expressed or implied in the forward-looking statements include, without limitation; (i) the impact including increased costs and potential liabilities, associated with changes in laws and regulations regarding privacy, data protection, information security and cybersecurity; (ii) challenges relating to existing or future legislation and regulations pertaining to artificial intelligence ("Al"), Al-enabled products and the use of biometrics and other video analytics; (iii) the impact of government regulation of radio frequencies; (iv) audits and regulations and laws applicable to our U.S. government customer contracts and grants; (v) the impact, including increased costs and additional compliance obligations, associated with existing or future telecommunications-related laws and regulations; (vi) the evolving state of environmental regulation relating to climate change, and the physical risks of climate change; (vii) impact of product regulatory and safety, consumer, worker safety and environmental laws; (viii) impact of tax matters; (ix) increased areas of risk, increased competition and additional compliance obligations associated with the expansion of our technologies within our Products and Systems Integration and Software and Services segments; (x) the effectiveness of our investments in new products and technologies; (xi) impact of catastrophic events on our business or our customers' or suppliers' business; (xii) social, ethical and competitive risks relating to the use of AI in our products and services; (xiii) the effectiveness of our strategic acquisitions, including the integrations of such acquired businesses; (xiv) increased cybersecurity threats, a security breach or other significant disruption of our IT systems or those of our outsource partners, suppliers or customers; (xv) our inability to protect our intellectual property or potential infringement of intellectual property rights of third parties; (xvi) risks relating to intellectual property licenses and intellectual property indemnities in our customer and supplier contracts; (xvii) our license of the MOTOROLA, MOTO, MOTOROLA SOLUTIONS and the Stylized M logo and all derivatives and formatives thereof from Motorola Trademark Holdings, LLC; (xviii) our inability to purchase at acceptable prices a sufficient amount of materials, parts, and components, as well as software and services, to meet the demands of our customers, and any disruption to our suppliers or significant increase in the price of supplies; (xix) risks related to our large, multi-year system and services contracts (including, but not limited to, with respect to the ESN and Airwave contracts); (xx) the global nature of our employees, customers, suppliers and outsource partners; (xxi) our use of third-parties to develop, design and/or manufacture many of our components and some of our products, and to perform portions of our business operations; (xxii) the inability of our subcontractors to perform in a timely and compliant manner or adhere to our Human Rights Policy; (xxiii) the inability of our products to meet our customers' expectations or regulatory or industry standards; (xxiv) increasing scrutiny and evolving expectations from investors, customers, lawmakers, regulators and other stakeholders regarding environmental, social and governance-related practices and disclosures; (xxv) inability to attract and retain senior management and key employees; (xxvi) impact of current global economic and political conditions in the markets in which we operate (including, but not limited to, inflation); (xxxii) impact of returns on pension and retirement plan assets and interest rate changes; (xxxiii) inability to access the capital markets for financing on acceptable terms and conditions; (xxix) exposure to exchange rate fluctuations on cross-border transactions and the translation of local currency results into U.S. dollars; and (xxx) the return of capital to shareholders through dividends and/or repurchasing shares. Motorola Solutions undertakes no obligation to publicly update any forward-looking statement or risk factor, whether as a result of new information, future events or otherwise. For additional information on identifying factors that may cause actual results to vary materially from those stated in forward-looking statements, see our reports on Forms 10-K, 10-Q and 8-K filed with or furnished to the SEC from time to time available for free on the SEC's website at www.sec.gov, and on Motorola Solutions' website at www.motorolasolutions.com/investor

Unless otherwise indicated, information in this presentation was updated on the 16th day of April 2024. For the avoidance of doubt, the 2024 fiscal year guidance was provided as of February 8th, 2024 and has not been updated or reaffirmed as of the date of this presentation. The content of this presentation contains time-sensitive information that is accurate only as of the time hereof. If any portion of this presentation is rebroadcast, retransmitted or redistributed at a later date, Motorola Solutions will not be reviewing or updating the material that is contained herein.

### Use of non-GAAP measures

In addition to the results presented in accordance with accounting principles generally accepted in the U.S. ("GAAP") in this presentation, Motorola Solutions, Inc. ("Motorola Solutions" or the "Company") has provided certain non-GAAP measurements. Motorola Solutions has provided these non-GAAP measurements to help investors better understand its core operating performance, enhance comparisons of Motorola Solutions' core operating performance from period-to-period and to allow better comparisons of Motorola Solutions' operating performance to that of its competitors. Among other things, the Company's management uses these operating results, excluding the identified items, to evaluate the performance of its businesses and to evaluate results relative to incentive compensation targets.

Management uses operating results excluding these items because it believes these measurements enable it to make better period-to-period evaluations of the financial performance of core business operations. There are inherent limitations in the use of operating results excluding these items because the Company's GAAP results include the impact of these items. The non-GAAP measures are intended only as a supplement to the comparable GAAP measures and the Company compensates for the limitations inherent in the use of non-GAAP measures by using GAAP measures in conjunction with the non-GAAP measures. As a result, investors should consider these non-GAAP measures in addition to, and not in substitution for, or as superior to, measures of financial performance prepared in accordance with GAAP.

Details of these items and reconciliations of the non-GAAP measurements provided during this presentation to GAAP measurements can be found in this Appendix to this presentation and on Motorola Solutions' website at investors.motorolasolutions.com

The Company has not quantitatively reconciled its guidance for forward-looking non-GAAP metrics to their most comparable GAAP measures because the Company does not provide specific guidance for the various reconciling items, as certain items that impact these measures have not occurred, are out of the Company's control, or cannot be reasonably predicted. Accordingly, a reconciliation to the most comparable GAAP financial measure is not available without unreasonable effort. Please note that the unavailable reconciling items could significantly impact the Company's results.

"Adjusted Operating Cash Flow," "Free Cash Flow," "Adjusted Free Cash Flow," "EBITDA," "Adjusted EBITDA," "Adjusted EBITDA Margin," "Net Debt," and "Net Debt to Adj. EBITDA Ratio," are non-GAAP measures and should not be considered as a replacement for GAAP results. These non-GAAP measures may not be comparable to similarly-titled measures reported by other companies. The primary limitation of these measures are that they exclude the financial impact of items that would otherwise either increase or decrease our reported results. These limitations are best addressed by using these non-GAAP measures in combination with the most directly comparable GAAP measures in order to better understand the amounts, character and impact of any increase or decrease in reported amounts. The following provides additional information regarding these non-GAAP measures.

Adjusted Operating Cash Flow - Represents operating cash flow under GAAP excluding a \$500 million voluntary, debt-funded U.S. pension contribution in the first quarter of 2018. The Company has excluded the impact of this contribution because the Company believes that this item does not reflect expected future operating cash flows and does not contribute to a meaningful evaluation of the Company's current operating cash flow performance or comparisons to the Company's past operating cash flow performance.

Free Cash Flow - Represents net cash provided by operating activities ("operating cash flow") less capital expenditures. The Company believes that free cash flow is also useful to investors as the basis for comparing its performance and coverage ratios with other companies in the Company's industries, although the Company's measure of free cash flow may not be directly comparable to similar measures used by other companies. This measure is also used as a component of incentive compensation.

## Use of non-GAAP measures

Adjusted Free Cash Flow - Represents Free Cash Flow excluding a \$500 million voluntary, debt-funded U.S. pension contribution in the first quarter 2018. The Company has excluded the impact of this contribution because the Company believes that this item does not reflect expected future free cash flows and does not contribute to a meaningful evaluation of the Company's current free cash flow performance or comparisons to the Company's past free cash flow performance.

EBITDA - Represents net income before interest expense, interest income, income taxes, depreciation, and amortization.

Adjusted EBITDA - Represents EBITDA adjusted for net other income, income from discontinued operations, share based compensation expense, U.S. pension settlement loss, and special items including charges or income related to reorganization and other charges, acquisition related charges, impairment charges, and other income or charges, if any. The Company believes Adjusted EBITDA provides improved period-to-period comparability for decision making and better measures the ongoing earnings results of its strategic and operating decisions by excluding the earnings effects of reorganization activities.

Adjusted EBITDA Margin - Adj. EBITDA Margin is calculated as Adjusted EBITDA divided by Revenue.

Net Debt and Net Debt to Adj. EBITDA Ratio - Net Debt is calculated as Long-term Debt, including the Current Portion of Long-term Debt, less Cash and Cash Equivalents. Net Debt to Adj. EBITDA Ratio is calculated by dividing Net Debt by Trailing 12 month Adjusted EBITDA.

Diluted weighted average shares outstanding

- \* Amounts attributable to Motorola Solutions, Inc. common shareholders.
- \*\* Under U.S. GAAP, the accounting for a net loss from continuing operations results in the presentation of dilutive earnings per share equal to basic earnings per share, as any increase in basic shares would be anti-dilutive to earnings per share. As a result of the highlighted items identified during Q4 2017, the Company reported a net loss from continuing operations within our GAAP Consolidated Statement of Operations, while reporting income on a non-GAAP basis. An adjustment is shown to reflect the dilution of 7.2 million dilutive shares outstanding in Q4 2017 and 6.4 million dilutive shares for the full year of 2017.
- \*\*\*Highlighted items: The company has excluded the effects of highlighted items including, but not limited to, acquisition-related transaction fees, tangible and intangible asset impairments, reorganization of business charges, certain non-cash pension adjustments, legal settlements and other contingencies, gains and losses on investments and businesses, Hytera-related legal expenses, gains and losses on the extinguishment of debt and the income tax effects of significant tax matters, from its non-GAAP operating expenses and net income measurements because the company believes that these historical items do not reflect expected future operating earnings or expenses and do not contribute to a meaningful evaluation of the company's current operating performance or comparisons to the company's past operating performance, the company uses financial statements that exclude highlighted items, as these charges do not contribute to a meaningful evaluation of the company's current operating performance.
