ViQi VOICE CONTROL
STAY EYES-UP AND FOCUSED FORWARD
OPERATE YOUR RADIO USING SIMPLE VOICE COMMANDS.

DETAILS
While it’s easy to change settings on your APX NEXT® family of radios using the traditional hard controls or the touchscreen soft controls, there are situations where you need to keep your eyes up and stay focused on your environment.

Using ViQi Voice Control, you can operate the radio with your voice. From switching channel and zone, to adjusting the volume, to changing your audio profile, all you need to do is press and hold the ViQi button, and speak into the mic.

There are 14 available actions, each accessible using several intuitive commands. With multiple options, you’ll find a ViQi command to suit you.

ViQi Voice Control is optimized for public safety situations, and performs well in extreme high-noise environments. The 3-dot buttons on APX NEXT radios and XV and XVE500 RSM are configured as the ViQi button by default. Through RadioCentral™, the ViQi function can be assigned to any other programmable control except the purple “monitor” button.

BENEFITS
First responders do not have to look down at the touchscreen, or concentrate on the position of the hard controls. All changes can be done eyes-up and without distraction.

COMPATIBLE PRODUCTS
APX NEXT and APX NEXT XE.

DEPENDENCIES
Radio Firmware: R01.00.00 or later.

INFRASTRUCTURE IMPACT
None.

SECURITY
ViQi button must be pressed when commands are issued. There is no “wake word” requiring an open mic.

DELIVERY
Optional feature.

ORDERING INFORMATION
• H-Option: QA09028 ViQi Voice Control.
• Included in Core Trunking Bundle: BD00001AA.
ZONE AND CHANNEL
CHANGE COMMANDS
“Change zone to Z channel to C”
“Change zone to Z and channel to C”
“Change to zone Z channel C”
“Zone Z channel C”
“Change zone to Z and channel to C”
“Switch zone to Z channel to C”
“Switch zone to Z and channel to C”
“Switch to zone Z channel C”
“Switch to zone Z and channel C”
“Go to zone Z channel C”
“Go to zone Z and channel C”

ZONE QUERY COMMANDS
“What is my zone?”
“What is my zone and channel?”
“Zone”
“What is my zone?”
“What is my zone and channel?”
“Current zone”
“What is my current zone and channel?”
“Current zone and channel”
“What is my current zone and channel?”
Response:
Either: “<zone name>, <channel name>”
Or: “Already on <zone name>, <channel name>”

CHANNEL CHANGE COMMANDS
“Change channel to C”
“Change to channel C”
“Switch channel to C”
“Go to channel C”
“Channel C”

CHANNEL QUERY COMMANDS
“What is my channel?”
“What is my channel and zone?”
“Current channel”
“What is my current channel?”
“What is my zone and channel?”
“Zone and channel”
“What is my current zone and channel?”
Response:
Either: “<zone name>, <channel name>”
Response (channel):
“<channel name>”
Response (zone and channel):
“<zone name>, <channel name>”

VOLUME CHANGE COMMANDS
“Volume V” (17 variations)
V is 1-10 in 10% increments, or
Min, low, minimum (=10%)
Medium (=50%)
High, max, maximum (=100%).
“V volume” (7 variations)
V is low, min, minimum (=10%)
Medium (=50%)
High, max, or maximum (=100%)
Response:
Either: “Volume <#>” (1 to 10)
Or: “Volume already <#>”

VOLUME QUERY COMMANDS
“Volume”
“What is my volume?”
“What is my current volume?”
“Current volume”
“Volume check”
Response:
“Volume <#>” (1 to 10)

RADIO PROFILE CHANGE COMMANDS
“Change to P profile”
“P profile”
“P mode”
“Switch to P profile”
“Go to P profile”
“Change to P mode”
“Switch to P mode”
“Go to P mode”
Response:
Either: “<profile name> profile”
Response (channel):
<profile name> profile”
Response (zone and channel):
“already on <profile name> profile”
