

Lightning Mobile App

Equip responders with the intelligence they need to assess an incident before engaging and maintain situational awareness throughout the response. Real-time information and decision-making support tools help officers stay safer while optimizing response efforts.

The Lightning mobile app is a field intelligence platform that streams live NG9-1-1 call audio, transcripts and AI-powered summaries directly to smartphones and tablets. By delivering critical incident context and operational tools, Lightning keeps field teams connected and ready to respond with confidence.

Real-time event intelligence

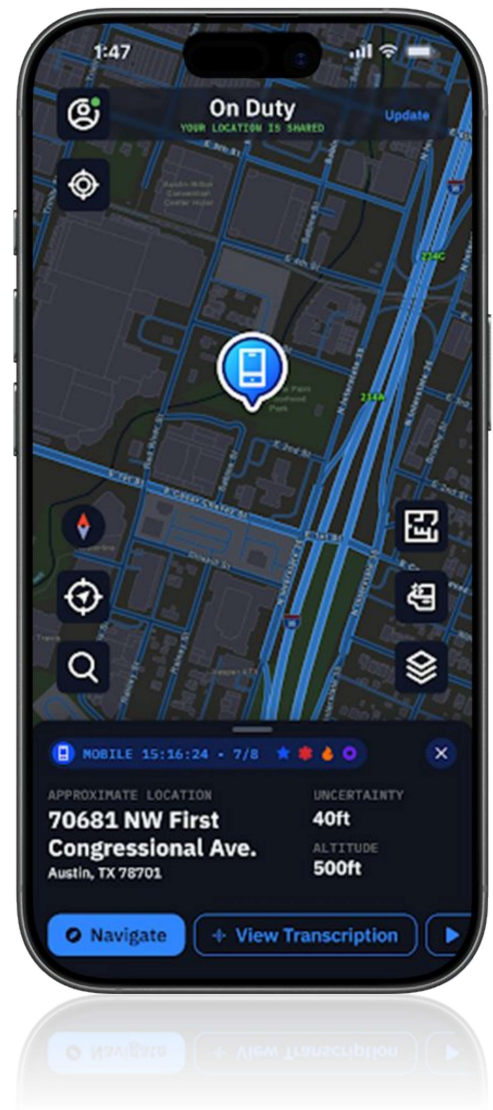

Access critical 9-1-1 call data, proximity alerts, live updates and advanced communication tools instantly.

Situational awareness

Gain a comprehensive view of event details, responder locations, map layers, live incident boards and video feeds.

Informed response

Empower response with critical tools including navigation, indoor floor plans, RapidVideo and Rescue Sheets.

Real-time intelligence for faster field response

Get instant access to critical 9-1-1 call data, live alerts and advanced communication tools in the field—empowering Law Enforcement, Fire, EMS and Emergency Management to act with confidence and precision.

Key features

Precision mapping

Get a full view of event details and responder locations with pinpoint accuracy at your fingertips.

Real-time alerts

Responders get instant in-app notifications of events within their proximity.

Critical mapping layers

Select critical authoritative map layers and commercial maps configured by the PSAP/ECC.

Live video feeds

Access live video from various sources for instant eyes on the scene.

Search and navigation

Easily search, filter and find critical events or responders, and navigate with one-click driving directions.

Stream live 9-1-1 calls

Listen to real-time 9-1-1 calls to assess caller tone and environmental factors that inform response.

9-1-1 transcriptions

Review concise call summaries or full transcriptions to save time and gain context during response.

Live incident boards

Visualize multiple media sources, to monitor ongoing large-scale incidents or planned events.

Disciplines

Filter incidents to tailor data for responders' specific emergency roles.

Advanced tools

Access life-saving capabilities like floor plans, crash telematics and vehicle extraction guides.
