

Solution brief

Responder Assist Suite

Empower your frontline with AI-assisted response and reporting

Responders are under pressure

40%

of shift time can be consumed by admin. No one joins the force for the paperwork

70%

of officers believe AI-Assisted report drafts would significantly reduce their workload

50%

of officers say real-time language translation would make their jobs easier

The result

Decreased community presence and high burnout

Assist saves time.
Time saves lives.

Introducing the Responder Assist Suite

In the high-stakes environment of modern policing, attention is the most valuable resource. The Responder Assist Suite transforms the officer's workflow to enhance safety, increase patrol time and strengthen credibility.

It begins on scene, where voice becomes the primary interface to information with **Patrol Assist**. Officers can maximize situational awareness with voice-based commands through their APX radio and SVX video remote speaker microphone (RSM), to manage radio channels, run database queries, update dispatch status and more, without ever taking their eyes off the incident, when interacting with the public, language barriers are instantly dissolved through real-time translation, fostering immediate understanding and equitable service across diverse communities.

The efficiency continues well after the incident, as reports are written and cases built with the heavy burden of administrative work lifted. Instead of hours spent on manual recall and typing, evidence can be effortlessly reviewed with **Review Assist** and comprehensive, accurate incident narratives built from that evidence using **Narrative Assist**. What used to be a tedious process of manual redaction is now automated with the instant detection and anonymization of objects and speakers across hours of footage with **Redaction Assist**, delivering privacy compliance without the burnout.

Cure situational blindness

Make sure your officers aren't operating in a dangerous information gap. Real-time intelligence enhances decision-making.

Solve the deskwork crisis

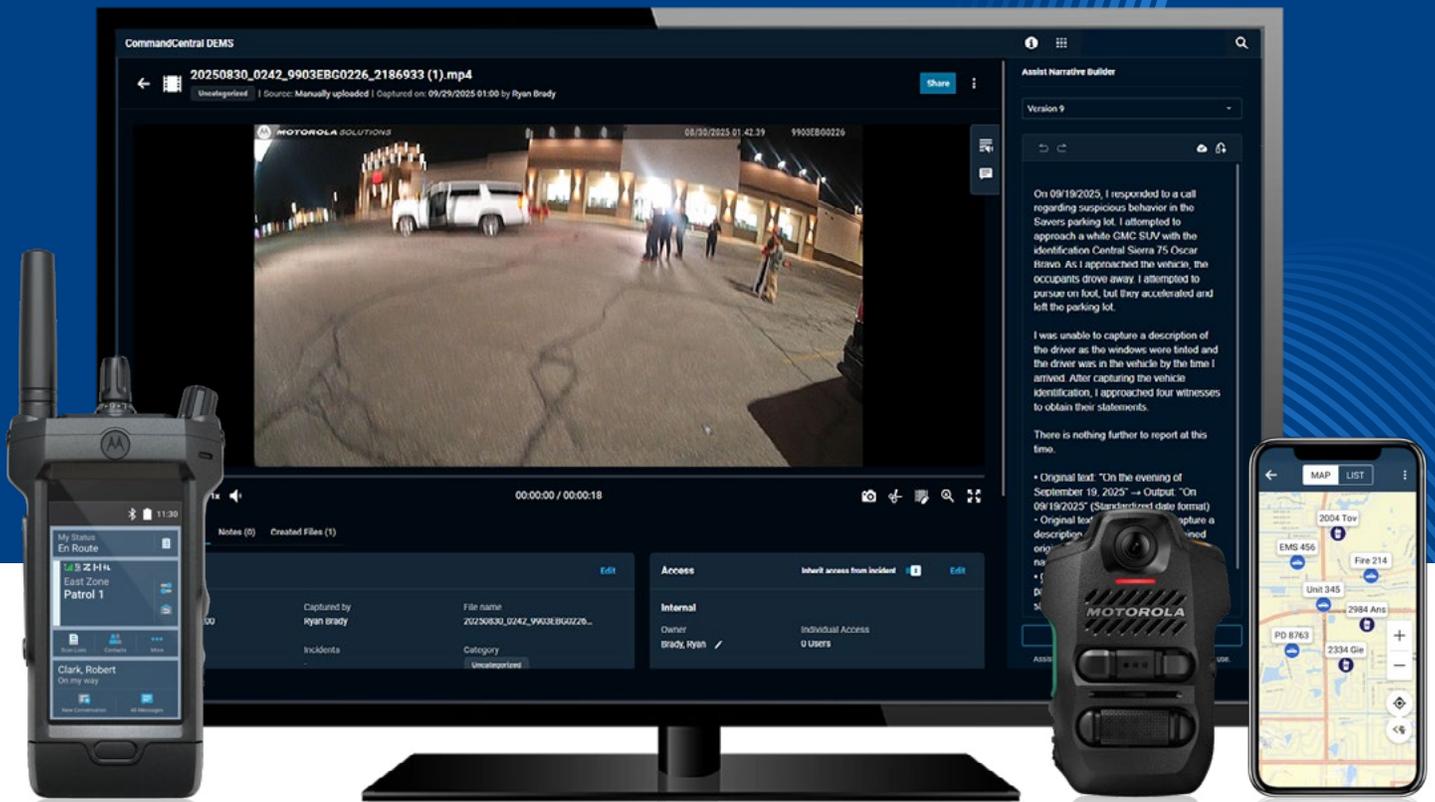

Alleviate administrative burden, and cut the "paperwork tax" that causes officer burnout and keeps police off the streets.

Strengthen case integrity

Draft narratives with the help of AI, backed by the evidence, to help to ensure completeness, and protect agency credibility in court.

Powerful AI, securely integrated with the products officers rely on

The Responder Assist Suite is available within the products your officers rely on day in and day out. To take full advantage of what the suite has to offer, explore our Responder Plans.

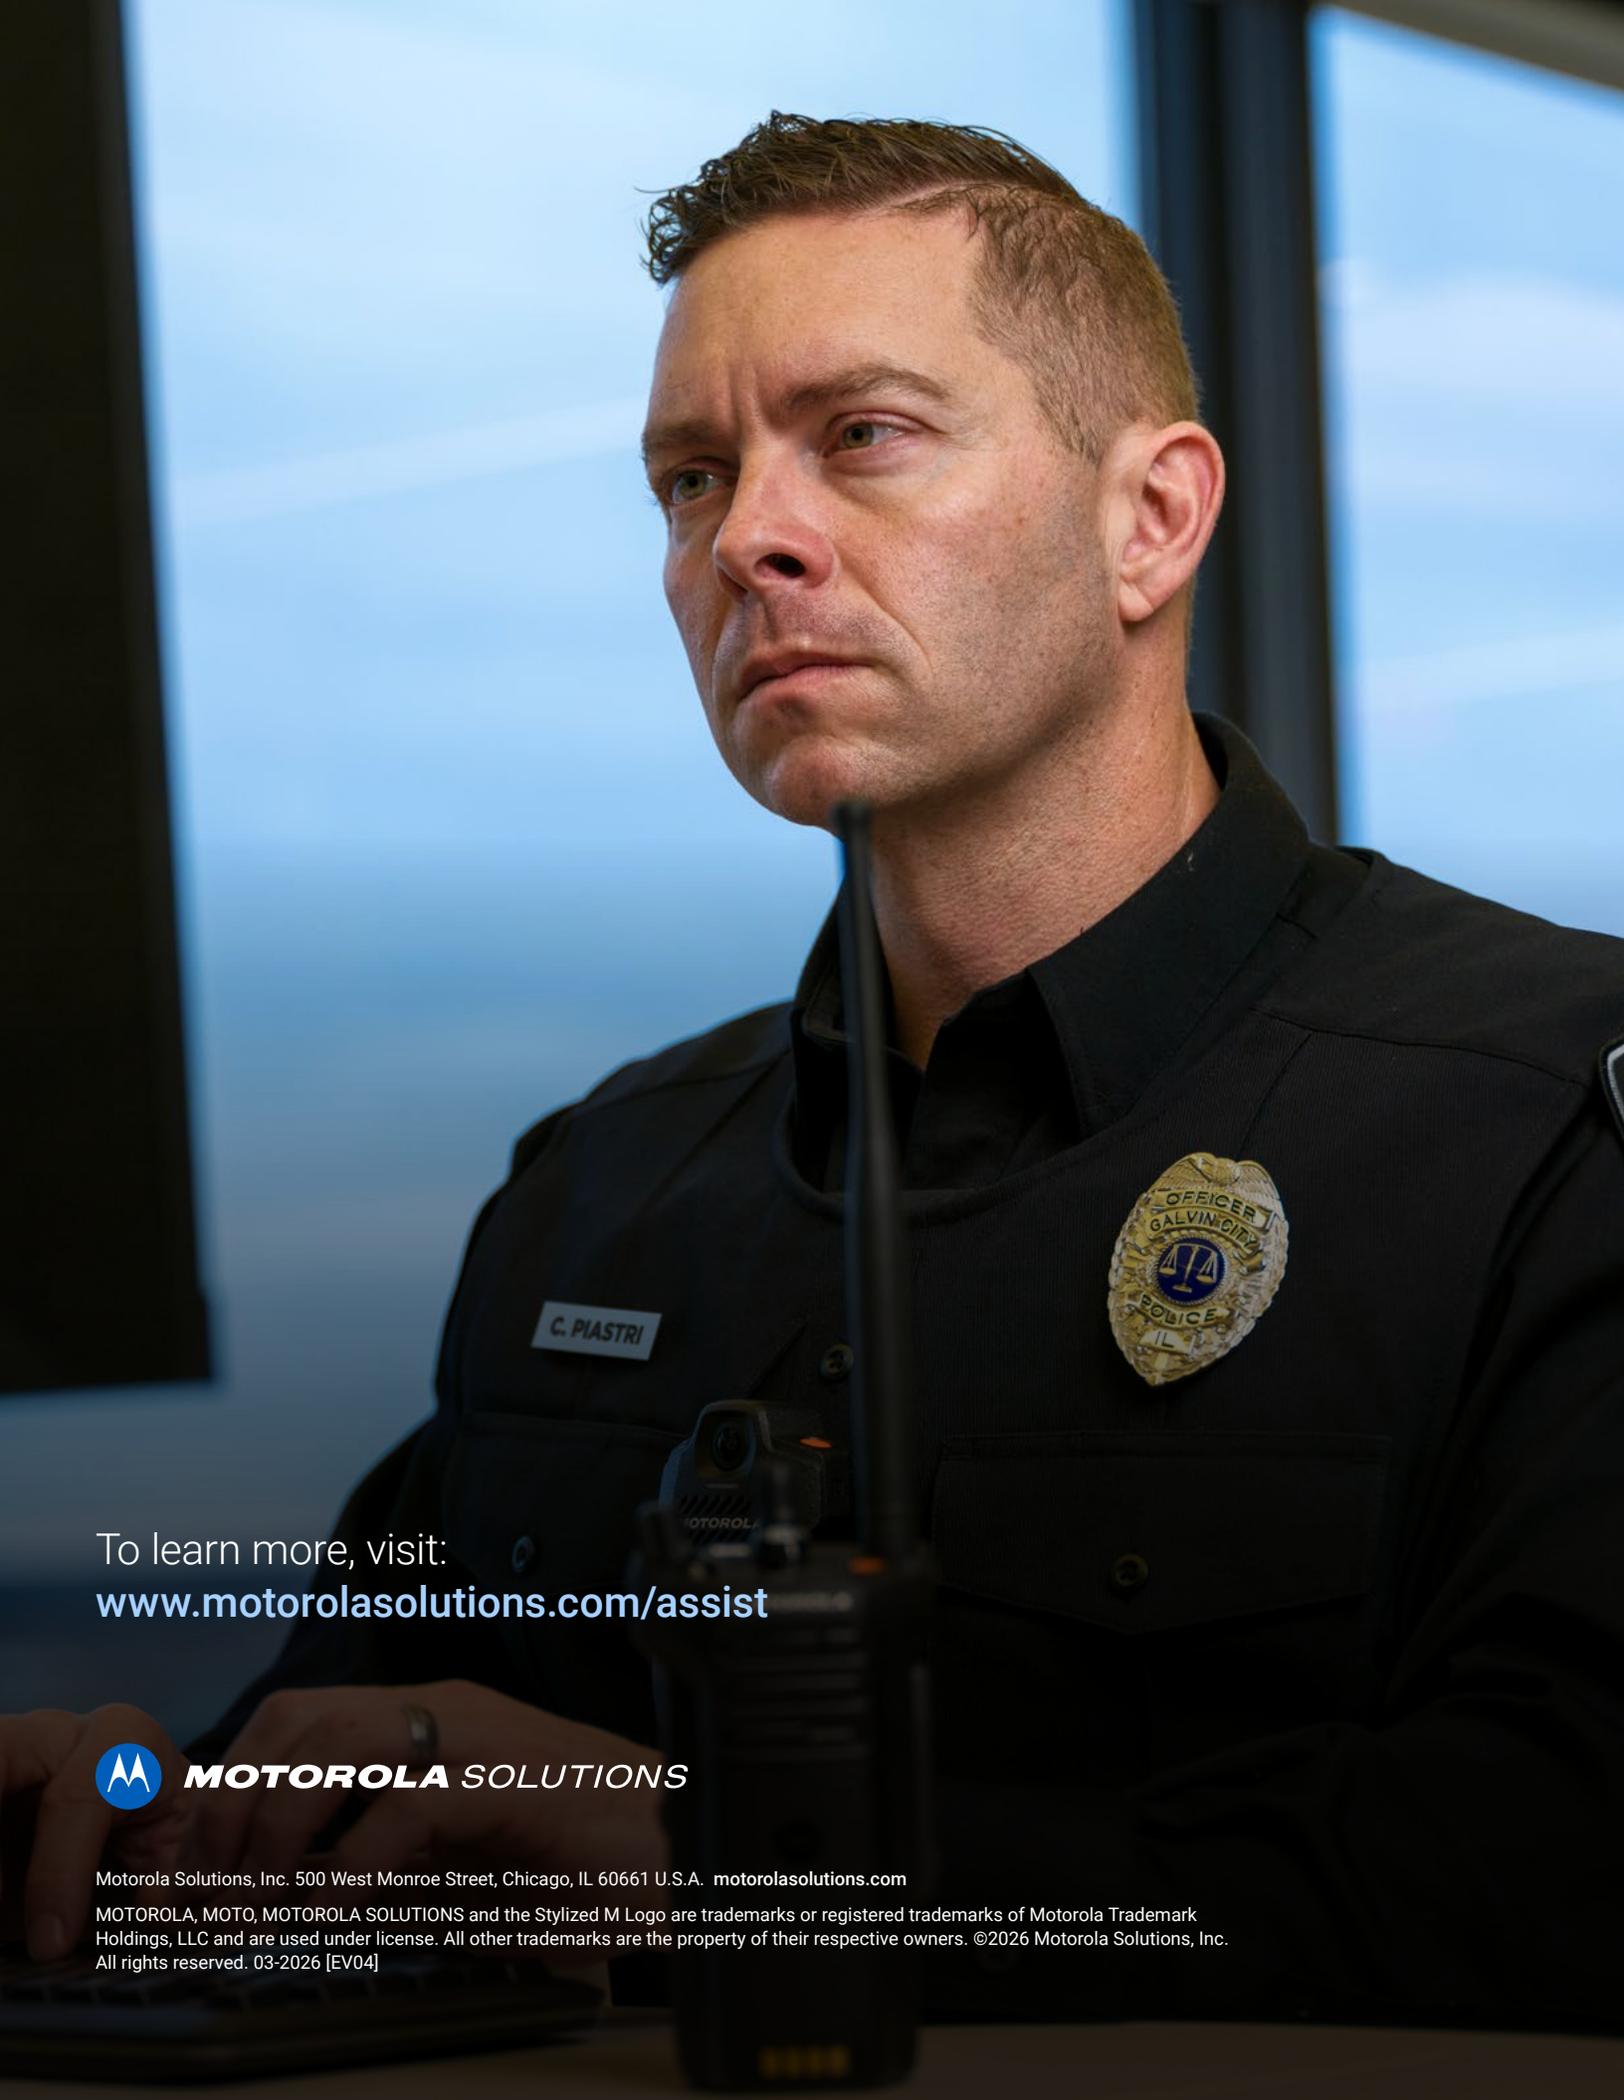

Responder Connectivity Plan

Amplify the power of your APX NEXT or N70 radios and the SVX video remote speaker mic with our Responder Connectivity Plan. This plan enhances your radio with AI-enabled APX Smart Applications that extend connectivity, strengthen communication and increase awareness to maximize focus throughout a response.

Responder Productivity Plan

Equip your frontline with records and digital evidence management as well as a suite of mobile applications, with the Responder Productivity Plan. This plan provides officers with a new level of real-time information accessibility and AI-powered productivity that keeps them on patrol more and responding safer.
