

Lone worker
monitoring for your
mobile workforce

Worker Safety Applications

Teldio offers a variety of worker safety applications to help **increase response times, enhance worker safety and increase situational awareness.**

The applications allow you to ensure employees who work alone are constantly monitored. If an employee suffers a fall, the appropriate people are notified immediately.

1
LW sends a message to Lone Worker

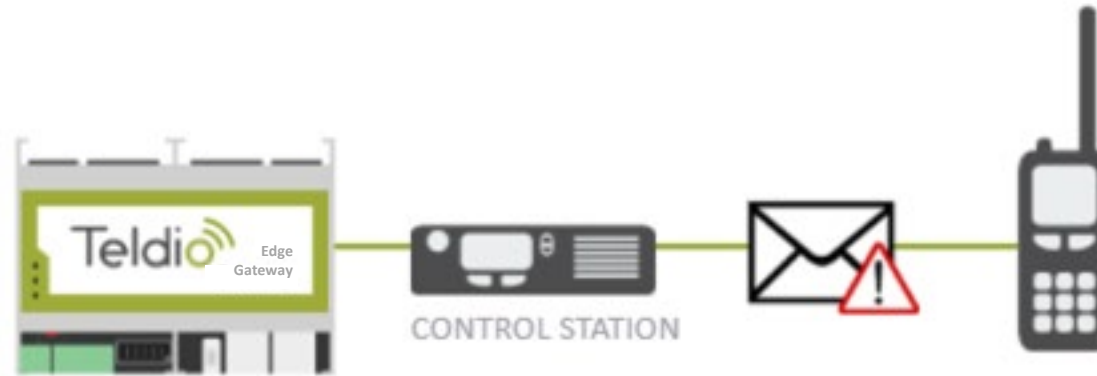

2
LW receives message on radio

3
If OK, he responds to the message

Can be programed to send retry messages before alarm is sent

4
If not OK, LW sends an alarm notification to the appropriate response group
