

A Car Manufacturer Streamlines Their Outdoor Test Track

A tier one car manufacturer in North America who tests and monitors new cars, features, and more for the company's wide range of vehicle models was looking to update how they control the lights and gates in and around the test track to simplify testing and increase efficiency.

THE OBJECTIVES?

Easy & streamlined method to control the eight gates in and around the test track, as well as the six lights in and around the test track.

HOW WERE THE OBJECTIVES ACHIEVED?

Using the Teldio Edge Gateway, staff are able to:

- Control all gates (opening & closing)
- Control all lights (on, off, flashing, colour change)

All gates and lights are controlled in an easily operated web browser dashboard built custom for the test track's specific needs.

*"We saved time and increased efficiencies.
The solution is very intuitive and easy to use!"*

THE RESULTS?

This custom solution using the Teldio Edge Gateway allowed the company to save time and increase ease of use for new and existing staff members.
