

MTP6000 SERIES ACCESSORIES FACT SHEET

SAFETY FOCUSED. EXCEPTIONAL USABILITY.

MTP6000 SERIES ACCESSORIES FOR MOTOROLA® TETRA RADIOS SAFER. SMARTER. FASTER.

Responding to an incident in the mine or managing multiple mine sites, you depend on communications that perform in demanding environments. That's why it's critical to choose the only accessories designed, tested and certified to work optimally with Motorola TETRA radios. Our comprehensive portfolio of MTP6000 accessories delivers on that promise – new enhancements for exceptional audio, integrated Bluetooth® and secure connections.

EXCEPTIONAL AUDIO EVERY DAY

The audio profiles on our MTP6000 accessories make hearing clearly almost effortless. They ensure you get the best performance possible by adapting to how your accessory is worn – in the ear, on a lapel and more. Simply select the accessory you are wearing from the radio menu and the radio automatically optimises the accessory audio for an exceptional listening experience.

IMPRES ACCESSORIES ARE AUTOMATIC

Plug in our smart IMPRES accessories – such as the remote speaker microphone (RSM) – and your radio identifies it and automatically loads the correct profile to optimise audio performance. What's more, our smart IMPRES large-speaker RSMs match the high-powered speaker on your radio for even better communications in high-noise environments – essential when on noisy mine sites.

INTEGRATED BLUETOOTH®

Bluetooth audio is embedded in the radio enabling connectivity with a variety of wireless accessories. Our exclusive Operations Critical Wireless accessories handle loud environments, while an optional wireless push-to-talk (PTT) seamlessly links to any accessory. Just put the PTT in a pocket or on a lapel and connect instantly.

TESTED TOUGH AND PROVEN TOUGH

Power your radio with the only batteries that are Proven Tough. Time after time, in lab test after test – for Drop, Vibration and ESD (Electrostatic Discharge) – Motorola batteries withstand shocks, knocks, drops and shakes and outperform the leading brands. If your radio gets banged on a ride, rattled by heavy equipment or shocked by static electricity, you can depend on our batteries to stay true and stand tough.

Save energy and money by using your existing TETRA chargers to power up your MTP6000 series radios and accessories. Simply mix and match in your existing 6 unit chargers. The multi-unit radio chargers and dual-desktop chargers feature a mini-USB port that supports a connection to Integrated Terminal Management (iTM) software to download images and fingerprints from the MTP6750 camera model.
