MISSION CRITICAL COMMUNICATION SOLUTIONS

MTP6000 SERIES TETRA PORTABLES

When the stakes are high, front line officers need to be ready. This means providing access to critical information anytime and anywhere, to enhance their safety and to increase their effectiveness. It also means that officers focus more time on critical activities, and less time on administrative tasks.

The MTP6000 series of TETRA portables lets your front line officers respond to incidents equipped with the collective intelligence of the entire team and the community. With integrated multimedia capabilities, MTP6000 radios provide you with a platform for capturing and sharing critical intelligence across the force. Designed for operation in high stress environments, MTP6000 radios offer unmatched usability and performance, ensuring that front line officers can focus on the job, not the technology.

DIGITAL MEDIA INTELLIGENCE GATHERING

From enhanced intelligence gathering to efficient reporting, the multimedia capabilities of the MTP6000 radios create many possibilities for public safety.

With an integrated high-resolution camera, the first of its kind in a TETRA radio, the MTP6750 makes it easy for law enforcement officers to capture critical crime scene information. Building a case for prosecution will typically involve bring together digital media evidence from a wide range of sources such as agency radio traffic and digital video footage. The MTP6750 attaches meta-data to each image, enhancing investigative capabilities and enabling investigators to reconstruct the events that took place during a critical incident.

FROM INTELLIGENCE TO ADMISSIBLE PHOTOGRAPHIC EVIDENCE

To be admitted in court, photographs must be verified as authentic. The MTP6750 attaches a digital signature to every captured image to verify its authenticity. For added security, we've ensured that the digital signature uses a government-grade cryptographic algorithm.

Capturing images is just the beginning. To simplify the discovery process, photographic evidence needs to be stored and catalogued in a logical and structured manner. Motorola provides software tools and services that help streamline the process of storing images and make them easily accessible to back office intelligence databases.

PROTECT YOUR INVESTMENT FROM THE UNEXPECTED

Service from the Start* provides complete peace of mind with mission-critical support for your TETRA radios. It offers multi-year coverage against normal wear and tear, fast repair turnaround times and expert telephone technical support; all backed by Motorola's globally integrated services infrastructure, highly qualified support technicians and certified repair facilities. Service from the Start with Comprehensive Coverage provides even greater support with the additional benefit of coverage for internal and external components damaged through accidental breakage. With Service from the Start you're covered – keeping your devices running and in the hands of the user.

*A disponibilidade pode variar segundo o país. Para mais detalhes, entre em contato com seu representante Motorola local.

EFFICIENT DATA SHARING

If you are a paramedic, a fire incident commander or a law enforcement officer, you need access to critical information in the field. For efficient information sharing, MTP6000 radios offer unmatched TETRA data connectivity in a handheld device. As your use of data applications increases, you will also have the assurance of a radio that is hardware-ready to support much faster data transfer speeds using the TETRA Enhanced Data Service (TEDS) - delivering up to 20x faster data connectivity.

A large, vibrant colour display makes the MTP6000 an ideal solution for consuming rich content and viewing multiple lines of text. The high-resolution display also makes it easy to view detailed images and elevates the user experience for mobile applications with visual content.

STREAMLINED DISPATCH AND TASKING OPERATIONS

In an emergency, every second counts. Reaching a successful outcome is about mobilising the most appropriate resources, nearest to the incident. The optional built-in GPS ensures that dispatchers receive accurate personnel location data, helping to optimise response times.

A suite of information "push" services allows dispatchers to send messages directly to the radio's screen. With the Call Out feature, messages requiring a mandatory acknowledgement can be pushed to the radio's screen, helping to ensure that critical messages get out to selected users.

REDEFINING SAFETY FOR THE EMERGENCY RESPONDER

From intuitive mission critical design and industry-leading audio to unmatched coverage performance, MTP6000 radios have been engineered to deliver uncompromising performance. Rugged and reliable, you can be sure that these radios will stand up to the harshest conditions - and even continue to operate after submersion in water. By enabling emergency responders to stay connected with their team members at all times, these capabilities are vital to keeping them safe.

FEATURES

- PATENTED HELICAL GPS ANTENNA INTEGRATED INTO TETRA ANTENNA
- EMERGENCY ALERT BUTTON
- PROGRAMMABLE MULTI-FUNCTION ROTARY KNOB SUPPORTING VOLUME SETTING, TALKGROUP SELECTION
- ANTENNA RING ACCESSORY FOR COLOUR-CODED LABELLING
- STATUS INDICATOR
- EXTERNAL ANTENNA CONNECTOR
- LED FLASH*
- TOP MICROPHONE
- 5 MEGAPIXEL CAMERA WITH AUTO-FOCUS*
- LARGE 2" QVGA DISPLAY WITH 262,000 COLOURS WITH FAST RESPONSE USER INTERFACE
- GRIP TEXTURE
- PTT WITH ENHANCED TACTILITY
- MOTOROLA GCAI RUGGED SIDE CONNECTOR FOR AUDIO ACCESSORIES. INCLUDES USB SUPPORT
- PROGRAMMABLE KEY
- MICRO SD CARD MEDIA STORAGE
- ROBUST KEYPAD WITH ENHANCED TACTILITY
- HIGH PERFORMANCE AUDIO BASED ON MOTOROLA SLIM PORT TECHNOLOGY
- AUTOMATIC KEYPAD BACKLIGHT
- INTEGRATED BLUETOOTH TECHNOLOGY
- MAN-DOWN FEATURE ACTIVATES EMERGENCY ALERTING BASED ON MOTION DETECTION AND INCLINE ANGLE THRESHOLD
- RUGGED PRODUCT DESIGN WITH IP57 SUBMERSIBILITY
- ROBUST BATTERY LATCH
- BOTTOM MICROPHONE
- RUGGED BOTTOM CONNECTOR WITH SELF-CLEANING DESIGN AND CORROSION RESISTANCE. OFFERS USB SUPPORT

Contacts | Options

*Only available on MTP6750

MTP6000 RADIO MODELS

	MTP6750	MTP6550
Camera	5MP Auto Focus Built-in LED Flash	None
Keypad	Automatic keypad backlight 4 direction navigation key 3 selection keys 4 x 3 keypad	
One Touch Buttons	Single button activation for multiple functions	
Controls	Large PTT button with enhanced tactility Emergency Button Programmable multi-function rotary switch 2 programmable side keys	
Additional Storage	Micro SD card *	
Battery Options	Standard battery: 1650 mAh High capacity battery: 2150 mAh	

SIZE AND WEIGHT

Height	132mm
Width	59mm
Depth	34mm (with standard battery)
Weight (Weights refer to MTP6550 model) with standard battery	287g (with 55mm stubby antenna)

RF SPECIFICATIONS

Frequency Bands	350-470 MHz
Transmitter RF Power	Class 3L (1.8W) & Class 4 (1W)
RF Power Level Accuracy	+/- 2 dB
Adaptive Power Control	Per EN 300 392-2
Receiver Class	A and B
Receiver Static Sensitivity	-114dBm (min); -116dBm (typical)
Receiver Dynamic Sensitivity	-105 dBm (min); -107 dBm (typical)

DMO REPEATER SERVICES

ETSI type 1A DMO Repeater for channel efficient operation

Repeats DMO voice and tone signalling on selected talkgroup

Repeats SDS and Status messaging on selected talkgroup

Transmission of Repeater Presence Signal

Emergency Call (Pre-emptive Priority Call)

Monitoring of and participation in calls whilst in Repeater mode

LOCATION SERVICES

GPS Tracking Sensitivity	-159 dBm (guaranteed) - 160 dBm (typical)
GPS Accuracy	<5m (probable at -130dBm)
Protocols	ETSI LIP Motorola LRRP

LICENSED OPTIONS

Software upgrade optional features	TETRA Enhanced Data Service (TEDS) Multi-Slot Packet Data (MSPD) WAP Browser WAP Push Service Bluetooth Support GPS Call Out Enhanced Security: OTAR/DMO SCK Air interface encryption End to End Encryption Options Permanent disable Temporary disable RUA/RUI Man-Down feature Class 3L (1.8W) transmit power RF Repeater Language options

ACCESSORIES

Antennas (short stubby, long stubby, whip)

Coloured rubber antenna ring labels

Batteries (Li Ion 1650 mAh and 2150 mAh)

Battery chargers and vehicle adapters

Various carry options

Audio headsets

Remote speaker microphones

Earpieces

In-Vehicle Solutions

USB programming and data cables

* Micro SD card slot not available on models that support hardware-based End to End Encryption.

SECURITY SERVICES

Authentication		Infrastructure initiated and made mutual by radio terminal
Air Interface Encryption	Algorithms	TEA1, TEA2, TEA3
Protocols	Security Classes	Class 1 (Clear), Class 2 (SCK), Class 3 (GCK)
End to End Encryption		Enhanced End to End Encryption with OTAK supported through AES128 or AES256 Hardware or SIM based

DATA SERVICES

Short Data	STATUS messaging in TMO & DMO SDS messaging in TMO & DMO Short Data applications
TNP1	Simultaneous operation of Packet Data and Short Data Services over a common Peripheral Equipment Interface (PEI)
AT Commands	Full Set of AT Commands (including Voice Control)
Radio Fleet Management	Compatible with Motorola Integrated Terminal Management (iTM) solution

USER INTERFACE

Display	Large 2" QVGA with 262K vivid colours Backlight | Flip screen, large icons and scalable text font options Screen saver gif image & text (user defined) Universal time display
Multiple languages	
Keypad lock	
Talkgroup Management	User friendly, flexible, efficient, fast and efficient interface
Favourite Folders	Up to 3 (to store any favourite talkgroup)
Menu	Customisable to user needs Menu shortcuts Menu configuration
Contacts management	Cellular feature phone style (rapid search)
Multiple dialling methods	User selects how to dial
Fast, flexible call response	Private call response to a group call via One Touch Button
Vibrator and multiple ring tones	
Message manager	Cellular feature phone style (flexible)
Text message list	20
Intelligent keypad text input	
Status list	400 alias messages
Country/Network Code List	100
Scan lists	40 lists of 20 groups
Covert Mode	20

MAIN VOICE SERVICES

Full Duplex	TMO	Private, PABX, PSTN, Emergency
Half Duplex	TMO	Private, Group, Emergency
	DMO	Private, Group, Emergency Inter-MNI, Gateway, Repeater
Dialling	Direct, Scroll, Speed, One touch button/key, Alpha Search, Call History Redial	
Emergency call (user customised)	Tactical	Emergency Group Call to ATTACHED talkgroup
	Non-Tactical	Emergency Group Call to DEDICATED talkgroup
	Individual	Emergency Call to PREDEFINED party (half/full duplex)
	HOT MIC	Allows user to talk without needing to press PTT (user enabled)
Status Message	DMO to TMO	Sent to dispatch console (user enabled) Enter DMO emergency (with/without gateway) or enter TMO emergency
Preemptive Priority Calls		
PTT Double Push		

ENVIRONMENTAL SPECIFICATIONS

Operating Temperature °C	-30 to +60*
Storage Temperature °C	-40 to +85
Humidity	ETSI 300 019-1-7 class 7.3E
Dust and Water Ingress Protection	IP57 and IP55 per IEC 60529
Shock, drop and vibration	ETSI 300-019 1-7 class 5M3

RECOMENDED SERVICES

Service from the Start with Comprehensive Coverage**

* Operating temperature range for camera functionality to be confirmed.
** Availability may vary by country. For more details, please contact your local Motorola representative.
