For further information, you may call Motorola at 1-800-638-5119.

Exposure to Radio Frequency Energy

For More Information

Safely Information in user guides published prior to December 1, 2002.

• To transmit (talk), press the Push to Talk (PTT) button.

For More Information

• Not carry the radio in the breast pocket.

Operational Cautions

• Pull off the road and park before making or answering a call if driving conditions so require.

Medical Devices

• Do not operate or disable the charger if it has received a substantial impact, such as dropping it on the ground.

To talk, press and hold .

• If the radio is left on while charging, the charging time will be increased.

• Do not use the radio with any data feature when standing near metal objects.

• The supply cord of the AC adaptor cannot be replaced. If the cord is damaged or if the plug is not compatible with your outlet, please contact your dealer or Motorola to have the proper plug or outlet installed.

1. To talk, press and hold .

• The extension cord size is 18 AWG for lengths up to 100 feet, and 16 AWG for lengths 101 feet and over.

• Put the radio away when driving.

• Do not—for any reason—to touch the car radio or the car charger if you think the car radio or the car charger is leaking. And do not touch the radio or the car charger if you think the car radio or the car charger is leaking.

Setting the Volume

• Do not place a portable radio in the vehicle near any air bag or in the bag deployment area. Air bags inflate with great force. If a portable radio is placed near an air bag and an air bag inflates, the radio may be propelled with great force and cause serious injury to occupants of the vehicle.

• Check power cord or plug for wear before use.

• ICC Canada

• The ICC Canada note on the back of the user's guide only signifies that the Industry Canada technical specifications were met. Facsimile

For further information, you may call Motorola at 1-800-638-5119 (U.S. and Canada), or e-mail us at getanswercare@motorola.com or visit the Internet at www.motorola.com.

Motorola

To maintain compliances with FCC/Health Canada RF exposure guidelines and reduce the risk of damage to the cord or plug, pull the plug from the electrical outlet before attempting any maintenance or cleaning.

2. With the back of the radio facing you, lift the battery cover latch up and remove the cover.

• To prevent damage to the battery, charge only in temperatures from 50°F to 85°F (10°C to 30°C).

• The radio battery cover and dress cover are secret.

• Do not operate the radio in areas where the RF exposure guidelines set forth in the above standards, always adhere to the recommendations of regulatory authorities.

• When charging in the battery charger, the red light on the charger base will glow continuously.

• Because you can only communicate between the units set to the same channel and Sub-channel number.

• If the radio is not set to a selected channel when the radio is powered on, the radio will display two dashes (— —) to indicate that no channel has been selected.

• To set the call timer, press and hold .

• To reduce the risk of electric shock, plug the radio into the closest electrical outlet.

2. Turn the radio off.

• For more information, visit our Web site at www.motorola.com or shop at getanswercare.com.

3. Gently push until the clip clicks in place.

• Use the radio with caution in the presence of flammable gases or other hazardous conditions. Be alert for signs of unusual behavior the radio may exhibit in such conditions.

• Use care when disposing of a battery pack that is equipped with a sealed battery.

Body-Worn Operation

• Pull the radio out of the accessory port and place it at least 0.5 inch (1.3 cm) from your body when transmitting.

• The channel power indicator should be used to estimate how much battery power is left.

• Do not hold the antennas when the radio is “IN USE.” Holding the antennas affects the effective range.

Push to Talk Timeout Timer

• Do not use the radio on your shoulder.

Battery Charger Safety Instructions:

• Pull the radio out of the accessory port and place it at least 0.5 inch (1.3 cm) from your body when transmitting.

Push to Talk (PTT) button.

For more information, visit our Web site at www.motorola.com or shop at getanswercare.com.

• The radio battery cover and dress cover are secret.

• Do not plug the connector into the mini-USB port.

• Use of a repeating signal device, such as a desktop repeating unit, can be a useful tool in serving as an aid to the hearing impaired.

• See settings on page 11.

• To reduce the risk of electric shock, plug the radio into the closest electrical outlet.

• To maintain compliances with FCC/Health Canada RF exposure guidelines and reduce the risk of damage to the cord or plug, pull the plug from the electrical outlet before attempting any maintenance or cleaning.

• Do not—for any reason—to touch the car radio or the car charger if you think the car radio or the car charger is leaking. And do not touch the radio or the car charger if you think the car radio or the car charger is leaking.

Turning your Radio On and Off

• Set the call timer to zero seconds.

Operational Cautions

• Do not dispose of batteries in a fire.

• Put the radio away when driving.

• To prevent damage to the battery, charge only in temperatures from 50°F to 85°F (10°C to 30°C).

• Do not place a portable radio in the vehicle near any air bag or in the bag deployment area. Air bags inflate with great force. If a portable radio is placed near an air bag and an air bag inflates, the radio may be propelled with great force and cause serious injury to occupants of the vehicle.

• Check power cord or plug for wear before use.

• ICC Canada

• The ICC Canada note on the back of the user's guide only signifies that the Industry Canada technical specifications were met. Facsimile

Safety and General Information

Importance of Safe and Efficient Operation

Read This Information Before Using Your Radio

The information provided in this document is generalized and is subject to change. Motorola reserves the right to make changes to this document without notice.

Use of the radio in a location where the RF exposure guidelines exceed the values set forth in the above standards, always adhere to the recommendations of regulatory authorities.

1. Turn the radio off.

• Do not—for any reason—to touch the car radio or the car charger if you think the car radio or the car charger is leaking. And do not touch the radio or the car charger if you think the car radio or the car charger is leaking.

Exposure to Radio Frequency Energy

For Motorola two-way radio models with the following RF energy emission guidelines, the maximum SAR values were determined in accordance with the guidelines set forth in the above standards, always adhere to the recommendations of regulatory authorities.

Radio Frequency Energy

Motorola two-way radio models with the following RF energy emission guidelines.

• American National Standards Institute (ANSI)/Institute of Electrical and Electronics Engineers (IEEE) C95.1-1992

• Federal Communications Commission’s (FCC) rules and regulations per airline crew instructions.

• Use the radio with caution in the presence of flammable gases or other hazardous conditions. Be alert for signs of unusual behavior the radio may exhibit in such conditions.

• Do not—for any reason—to touch the car radio or the car charger if you think the car radio or the car charger is leaking. And do not touch the radio or the car charger if you think the car radio or the car charger is leaking.

• The ICC Canada note on the back of the user's guide only signifies that the Industry Canada technical specifications were met. Facsimile

Weather Alert

The Weather Alert function allows you to receive weather alerts and warnings from the National Weather Service. When you switch the radio on, the Weather Alert function is active. If you receive a weather alert, the radio will emit an audible alert tone and display the alert message.

Weather Channels

The Weather Channels are used to receive weather alerts and warnings from the National Weather Service. To receive weather channels:

1. Press and hold the Weather Channels button until displays.
2. Press or to select the appropriate channel with good reception in your area.
3. Press to save the weather channel setting.

Setting the Weather Alert

You can set the Weather Alert function to be activated or not. To set the Weather Alert:

1. Press and hold until displays.
2. Press or to activate or deactivate the Weather Alert.
3. Press to confirm your selection or to continue set up.

Note:
- The Weather Alert function is only used for weather alerts and warnings.
- The Weather Alert function is automatically disabled when you turn off the radio.

Keyed Tone

A keyed tone is a tone that is sent when you transmit. The keyed tone allows you to send and receive messages that contain information.

Weather Channels

- WX1 (162.550 MHz): FRS Weather Channel 1
- WX2 (162.475 MHz): FRS Weather Channel 2
- WX3 (162.490 MHz): FRS Weather Channel 3
- WX4 (162.515 MHz): FRS Weather Channel 4
- WX5 (162.530 MHz): FRS Weather Channel 5
