

COMMANDCENTRAL SOLUTION PARTNER PROGRAM

PARTNER WITH THE INDUSTRY'S MOST INTEGRATED PUBLIC SAFETY SOFTWARE SUITE

Our end-to-end command center software suite, CommandCentral, is designed to meet our customers' evolving challenges and help them make better-informed decisions to save time and lives.

Our customers use complementary operational applications integrated with our suite to optimize their mission-critical software workflows. It's with these tools in mind that we offer the CommandCentral Solution Partner Program, a streamlined and modern way for complementary software vendors to access our Application Programming Interfaces (APIs) and implement joint solutions.

Solution Partners in our program are involved in creating mission-critical software solutions for public safety. Whether that solution is a simple interface or a more tightly integrated and marketable workflow, we have the API offering and partnership platform to deliver integrated technologies that help our customers be their best in the moments that matter.

The breadth of our integrated public safety software offers many areas in which partner tools can further enhance command center performance. From logging systems to emergency alerting applications to traffic management software, there are many areas in the CommandCentral workflow that could benefit from industry partners who provide added value through their own unified solutions. Our APIs and other integration tools enable outside vendors to implement joint solutions that help our customers save valuable time and assist in saving lives.

The CommandCentral Solution Partner Program offers two partner tier options: the Integrator level for partners implementing limited integrations and the Solution Partner level for complementary brands seeking to work on marketable joint solutions. Program partners benefit from streamlined API and SDK licensing and access to integration tools through our comprehensive developer portal. Complementary software vendors can inquire about program membership by visiting us at www.motorolasolutions.com/solutionpartners.

PARTNER BENEFITS BY TIER

Integrator:

- MSI developer portal access
- Ability to submit support issues
- Product news and updates

Solution Partner:

- All integrator benefits, plus:
- Email and phone support
 - Bi-annual roadmap alignment check-ins with MSI
 - Joint go-to-market benefits and inclusion in our Solution Partners list

*Any applicable API fees are not included in program membership

COMMANDCENTRAL SOLUTION PARTNER PROGRAM APIs

SPILLMAN FLEX DATAEXCHANGE

Our tightly integrated Spillman Flex dispatch, records management and jail management applications provide access to comprehensive and accurate data to law enforcement professionals in the moments that matter. Our Flex DataExchange API helps further streamline these customer workflows by enabling you to:

- Extract data from on-prem CAD, RMS or Jail applications for use in your complementary application
- Publish data from your application to a customer's Spillman Flex database
- Use our API resources to customize your queries, add image and other file types to your extraction, and explore new data types to include in your interface
- Leverage our optional, cloud-based test environment to optimize your development

VESTA® 9-1-1

Our VESTA 9-1-1 solution helps Public Safety Answering Points (PSAP) take the crucial first step toward integrated, multimedia communications. As public safety communications continue to evolve, our VESTA APIs are enabling different 9-1-1 data types to flow to other essential PSAP applications:

- **i3 Logging Events:** Subscribe your application to both legacy and Next Gen i3 data that is captured by VESTA 9-1-1
- **Call Detail Records:** Subscribe your application to Call Detail Record data that is captured by VESTA 9-1-1

PREMIERONE™ MOBILE

PremierOne Mobile is an advanced mobile communications solution for law, fire and emergency response units featuring dispatch integration, incident and unit management, state and federal database queries, messaging and mapping. The client application runs on Windows, in-vehicle laptops and tablet devices. Our PremierOne Mobile SDK enables other essential applications to:

- Consume query response and/or CAD Incident data from the PremierOne Mobile Client
- Subscribe to real-time mobile data access for reporting needs

COMMANDCENTRAL AWARE

CommandCentral Aware provides a complete operating picture by integrating real-time intelligence in the command center to remotely assist officers in the field. Aware helps support officer safety by monitoring real-time alerts which third party data providers can enhance by using our Aware API to:

- Publish your situational awareness data to a customer's Aware instance in real-time
- Customize the look and feel of Aware alerts triggered by your data
- Publish real-time updates to your Aware alerts

VESTA® COMMUNICATOR

VESTA Communicator is our employee notification and team mobilization solution which provides multi-modal, two-way communication using voice, email, SMS, mobile app, pagers, social media and more.

The Communicator API provides the tools necessary to build interfaces promoting two-way information exchange between Communicator and other essential systems, such as HR management applications, to streamline mission critical workflows.
