## ***PRO Series Portable Radios***

### ***Motorola Original® Accessories let you make the most of your PRO Series portable radio's capabilities.***

You made a sound business decision when you chose your Motorola PRO Series Professional Two-way radio. When you choose performance-matched Motorola Original® accessories, you're making another good call.

That's because every Motorola Original® accessory is designed, built and rigorously tested to the same quality standards as Motorola radios. So you can be sure that each will be ready to do its job, time after time — helping to increase your productivity. After all, if you take a chance on a mismatched battery, a flimsy headset, or an ill-fitting carry case, your radio may not perform at the moment you have to use it.

We're pleased to bring you this collection of proven Motorola Original® accessories for your important business communication needs. You'll find remote speaker microphones for more convenient control. Discreet earpiece systems to help ensure privacy and aid surveillance. Carry cases for ease when on the move. Headsets for hands-free operation. Premium batteries to extend work time, and more. They're all ready to help you work smarter, harder and with greater confidence.

PRO Series Professional Radios are a practical, reliable solution for keeping users communicating and keeping productivity high.

**PRO SERIES PROFESSIONAL RADIOS**

Motorola PRO Series Professional Portable Radios are the right choice for users with advanced communication needs. No matter what PRO portable you use, you'll enjoy the same exceptional quality and user-friendly functionality.

The PRO Series is composed of 4 robust portable radios tailored to meet the requirements of almost any organization. They offer unrivaled crystal-clear audio quality even in noisy surroundings, thanks to Motorola's X-Pand™ voice technology. In addition, they have all passed Motorola's grueling Accelerated Life Test which simulates five years of hard use in the field.

### Windporting Remote Speaker Microphones

The Windporting feature of these microphones helps lessen background noise from high winds and other severe weather conditions. Audio can pass through the speaker grill even when the microphone port is blocked by water. Now public safety professionals can be more confident than ever of clear, understandable communication when Mother Nature is uncooperative. The Windporting Remote Speaker Microphones allow talking and listening without removing the radio from the belt or case. Both have a coiled cord, Push-to-Talk switch, swivel clip, and quick disconnect latch.

PMMN4021*	Remote Speaker Microphone with 3.5mm Audio Jack
PMMN4027*	Remote Speaker Microphone with IP57 Rating

### Remote Speaker Microphone – RSM

This Remote Speaker Microphone is water-resistant and allows talking and listening without removing the radio from the belt or case. It has a coiled cord and Push-to-Talk switch. Clothing clip on the microphone back clips securely onto shirt or collar. Ideal for high-noise environments.

PMMN4039	Noise-Cancelling Remote Speaker Microphone with 3.5mm Audio Jack
HKN9055	Replacement Cable for Remote Speaker Microphone

### Heavy-Duty Remote Speaker Microphone

Ideal for firefighters, police and other public safety professionals, this remote speaker microphone lets users talk and listen without removing the radio from the belt, case or charger. Designed with an exceptionally rugged housing for harsh environmental conditions. Controls include a Push-to-Talk (PTT) Button and Hi-Low Volume Control. Includes coiled cord, clothing clip, and audio jack.

### Ear Microphone System – EMS

This compact, lightweight unit picks up sound through bone vibrations in the ear. The miniature earpiece leaves the hands free and face unobscured, good for rescue and emergency personnel that must retain the ability to help, hear and speak directly to others, those not on the communication system. EMS may be worn with protective masks without reduction in sound clarity. It's ideal for high-noise environments. PTT or Voice-Activated (VOX) Interface Module required, sold separately.

BDN6677*	EMS with PTT Interface. Black. For standard noise levels (up to 95dB).
BDN6678*	EMS with PTT Interface. Beige. For standard noise levels (up to 95dB).

## Temple Transducer:

Representing a significant achievement in headset design and functionality, it allows the user to receive audio without covering the ear.

### Temple Transducer

The receiver portion of this accessory rests on the temples and is capable of converting the receive audio from a two-way radio into sound vibration. Sound vibration is transmitted through the surrounding tissue and bone directly into the inner ear. It features an In-line PTT and noise-cancelling boom microphone. The Temple Transducer can help enhance communication and safety by allowing external sounds, such as machinery and equipment, warning and fire alarms, the intercom, traffic and even casual conversations with co-workers. In high-noise environments it allows the use of earplugs.

RMN4048*	Temple Transducer
RMN5048*	Rugged Temple Transducer
0180305J46	Training CD-ROM. For EMS and Temple Transducer.

### CommPort™ Integrated Microphone/Receiver System

The CommPort System's advanced, self-adjusting microphone and miniature receiver connect to a two-way radio and make it possible to communicate under the most adverse conditions. A variety of Push-to-Talk options allow the user to customize the CommPort system.

NTN1722*	Integrated Ear Microphone/Receiver System with PTT on Radio Adapter. Includes Radio adapter AAHLN9717.

## batteries

### IMPRES™ Batteries

IMPRES™ batteries, when used with an IMPRES™ charger, provide automatic, adaptive reconditioning, end-of-life display and other advanced features. Data is stored in the battery and communicated to the charger via a unique IMPRES™ communication protocol which is designed to maximize talk-time and optimize battery cycle life – all automatically.

### Motorola Original® Batteries

Motorola Original® Batteries are ruggedly designed for lasting durability and are system tested with Motorola two-way radios to ensure optimum performance. We offer various chemistry and capacity alternatives, allowing the user to select the ideal battery for his or her needs.

NiCd is best suited for extreme-temperature operation, and provides the maximum number of charge/discharge cycles. Li-Ion batteries offer extended duty cycles – providing more talk time per shift.

## chargers

### Single-Unit, Rapid-Rate, Universal Chargers

Single-Unit Chargers can rapidly charge batteries on or off the radio in one to three hours. These tri-chemistry chargers feature rapid, trickle, and maintenance modes. The maintenance mode "revert to rapid" feature ensures batteries remain fully charged even when left on the charger for extended periods of time. All chargers are specifically designed to meet the requirements of batteries manufactured by Motorola.

AAHTN3000	Single-Unit, Rapid-Rate Charger, 120 Volt, US plug
HLN9793	Charger Insert Spacer. Compatible with "A" version Chargers only.
HLN9794	Charger Insert Spacer. Compatible with "B", "C" and "D" version Chargers.

### Motorola Conditioning Chargers – MCC

The MCC features Instant Fault Detection technology that detects faulty batteries in seconds. You'll know right away when a battery won't operate at peak performance - saving you time and trouble. Each unit rapidly charges NiCd and NiMH batteries and optimizes battery performance. It's patented negative pulse charging process minimizes overheating and overcharging, extending useful battery life. Batteries can be left on the charger for extended periods of time, without worry of heat build-up. Optional accessories are available that allow the MCC to be used in both AC and DC environments – that's flexibility.

# IMPRES™ Smart Energy System:

The IMPRES Smart Energy System automatically reconditions IMPRES batteries based on actual usage.

## IMPRES Smart Energy Systems

### IMPRES Chargers

Through the use of advanced charging algorithms and automatic reconditioning features, the IMPRES Smart Energy System ensures maximum talk-time and optimized battery cycle life. This smart energy system automatically reconditions IMPRES batteries based on actual usage, keeping them in peak condition. Talk-time and cycle life are optimized and the need for manual maintenance programs is eliminated. Its advanced conditioning features allow batteries to be safely left on the charger for extended periods of time without incurring the damaging heat build-up which can decrease battery cycle life. In addition, batteries left in the charger are kept fully charged so they are always ready when needed. This rapid-rate, tri-chemistry charging system will also charge compatible non-IMPRES batteries and supports multiple radio platforms.

### Battery Maintenance System<sup>PLUS</sup> – BMS<sup>PLUS</sup>

Increase the useful life of your batteries. Using interchangeable battery adapters (sold separately), the BMS<sup>PLUS</sup> is capable of charging and discharging, analyzing, conditioning and cycle testing batteries. It supports NiCd, NiMH and Li-Ion batteries (Li-Ion 6-station units only) and tracks better voltage and capacity (mAh). Its easy-to-use design supports hundreds of two-way, cellular and camcorder batteries. The BMS<sup>PLUS</sup> has a 3-year warranty and includes serial printer\* port (RS-232).

### Battery Optimizing System II – BOS II

No other battery analyzer matches the speed, accuracy, versatility and ease-of-use of the BOS II in providing powerful analyzing capabilities. Users can select from 12 pre-programmed service programs making it quick and easy to get up and running. Because the BOS II is programmable, users can create custom programs to perform a wide variety of tasks specific to individual needs. New enhancements include new navigation keys and an improved, more intuitive menu system. Regular use of the BOS II can optimize battery performance and help extend battery life, helping reduce battery replacement costs.

- Support for NiCd, NiMH, Li-Ion, and SLA batteries 100W  
Power Supply programmable from 100 mAh to 4 Amps per station
- Interchangeable Adapters accommodate all major brands
- Includes a variety of Programs and allows customizable programming
- Proprietary Recondition Cycle restores NiCd and NiMH batteries

## ***PRO Series Mobile Radios***

### ***Motorola Original® Accessories let you make the most of your PRO Series Mobile radio's capabilities.***

You likely chose your Motorola mobile radio for its ease of use and exceptional reliability — certainly a sound business decision. Choosing Motorola Original® accessories for your radio is also the right call to make.

That's because every Motorola Original® accessory is designed, built and rigorously tested to the same quality standards as Motorola radios. So you can be sure that each will be ready to do its job, time after time.

What's more, insisting on Motorola Original® accessories can help increase your productivity. That's because you can count on every accessory to do its job time after time. If you take a chance on a mismatched antenna, a clumsy handset or an ill-fitting mounting, your radio may not perform at the moment you have to use it.

Keep your Motorola radio performing at its peak. Count on this collection of Motorola Original® accessories for your important business communication needs. You'll find Public Address Speakers for more crowd control. In-vehicle mounting accessories for ease of use when on the move. Base Interface Packages that extend area coverage and allow remote monitoring of field units. Control Station accessories for an efficient, streamlined operation. A variety of antennas to extend range, and help maximize communication in urban areas. They'll help you work smarter, harder and with greater convenience.

# PRO Series Professional Radios offer high performance and rugged dependability for users on the move.

## ***PRO SERIES OF PROFESSIONAL RADIOS***

Motorola PRO Series Mobile Radios offer users a compact, ergonomic design with optimal mounting flexibility. No matter what PRO mobile you use, you'll enjoy the same exceptional quality and user-friendly functionality.

The PRO Series is composed of 4 robust mobile radios tailored to meet the requirements of almost any organization. They offer crisp, clean audio even in noisy locations or vehicles, thanks to Motorola's X-Pand™ voice technology and a large front-projecting speaker. Telephone/paging capabilities and Motorola's precision-controlled MDC signaling features boost your effectiveness by giving you a wide range of calling options. In addition, customizable buttons can be programmed for quick access to your favorite features.

The above diagram compares a Unity gain or 0dB antenna with 3dB and 6dB radiation patterns. From the diagram above you can see that it is possible to communicate with a cell site further away. There are a few traps however, these high frequency signals have a tendency to bounce off buildings in built up areas, and off mountains in a valley. This means a high gain antenna is best-used in country areas where wide flat plains are between you and the cell site. In mountainous areas or in city environments where the topography varies considerably, a high gain radiation pattern will not work as efficiently as a unity gain.

### Windporting Remote Speaker Microphones

The Windporting feature of these microphones helps lessen background noise from high winds and other severe weather conditions. Audio can pass through the speaker grill even when the microphone port is blocked by water. Now public safety professionals can be more confident than ever of clear, understandable communication when Mother Nature is uncooperative. The Windporting Remote Speaker Microphones allow talking and listening without removing the radio from the belt or case. Both have a coiled cord, Push-to-Talk switch, swivel clip, and quick disconnect latch.

#### Temple Transducer

The Temple Transducer represents a significant achievement in headset design and functionality. It allows the user to receive audio without covering the ear. The receiver portion of this accessory rests on the temples and is capable of converting the receive audio from a two-way radio into sound vibration. Sound vibration is transmitted through the surrounding tissue and bone directly into the inner ear. It features an In-line PTT and noise-cancelling boom microphone. The Temple Transducer can help enhance communication and safety by allowing external sounds, such as machinery and equipment, warning and fire alarms, the intercom, traffic and even casual conversations with co-workers. In high-noise environments it allows the use of earplugs. Compatible with PRO Series Elite radios.

## chargers

### Single Unit Rapid-Rate, Universal Chargers

Single Unit Chargers can rapidly charge batteries on or off the radio in one to three hours. These tri-chemistry chargers feature rapid, trickle, and maintenance modes. The maintenance mode "revert to rapid" feature ensures batteries remain fully charged even when left on the charger for extended periods of time. All chargers are specifically designed to meet the requirements of batteries manufactured by Motorola.

AAHTN3000 Single-Unit, Rapid-Rate Charger,  
120 Volt, US plug

### IMPRES™ Multi-Unit, Rapid-Rate Charger

Through the use of advanced charging algorithms and automatic reconditioning features, the IMPRES Smart Energy System ensures maximum talk-time and optimized battery cycle life. This smart energy system automatically reconditions IMPRES batteries based on actual usage, keeping them in peak condition. Talk-time and cycle life are optimized and the need for manual maintenance programs is eliminated. Its advanced conditioning features allow batteries to be safely left on the charger for extended periods of time without incurring the damaging heat build-up which can decrease battery cycle life. In addition, batteries left in the charger are kept fully charged so they are always ready when needed. This rapid-rate, tri-chemistry charging system will also charge compatible non-IMPRES batteries including Expert Series non-IMPRES batteries and supports multiple radio platforms.
