

SCIP - Substances of Concern In articles as such or in complex objects (Products)

SCIP is the database for information on Substances of Concern In articles. As part of the European Union Waste Framework Directive (WFD), the European Chemicals Agency (ECHA) has built a database for storing safe-use information for substances of very high concern (SVHCs) present in articles placed on the market in the European Economic Area (EEA = EU plus Iceland, Liechtenstein and Norway). Companies supplying products containing substances of very high concern (SVHCs) on the Candidate List in a concentration above 0.1% weight by weight (w/w) on the EU market have to submit information on these articles to ECHA, as from 5 January 2021.
