

MOTOTRBO™ FOR HOSPITALITY

# SAFETY AND SECURITY

Security teams depend on instant communication at all times in order to handle any situation. Real or potential threats like fire alarms, intruders or suspect packages mean instantaneous, clear communication is essential.

Security teams need to coordinate their responses to threats across large areas and into the more remote sections of large buildings.

Our improved range of MOTOTRBO radios offer:

- **Intelligent Audio**- adjusts volume automatically in line with fluctuating background noise.
- **Indoor and outdoor location tracking**- finds people quickly, outside in the grounds or in the back-of-house area.
- **Integrated accelerometer**- detects movements and issues alerts if the staff member appears to have fallen or be motionless.

These dramatic enhancements to our MOTOTRBO portfolio deliver the audio quality, coverage, battery life and built-in intelligence that help safety and security teams to protect guests, staff and property around the clock.

“A couple of minutes can make all the difference in the world to the guest waiting for someone to show up and fix the problem. With MOTOTRBO, the process is rolling within 30 seconds.”

Director of Engineering, JW Marriott San Antonio Hill Country Resort and Spa
