POCKET GUIDE

MOTOROLA SOLUTIONS

TETRA

A FUTURE-PROOF TECHNOLOGY

This pocket guide provides an overview of TETRA radio terminals and systems available along with an overview of the services we can provide to support them.

TETRA is designed for professional users who need critical communications. It is scalable, from small, private, site-specific installations to nationwide public safety networks.

Customers across many segments use our TETRA solutions including: retail, sports and leisure venues, manufacturing plants, oil and gas facilities, and government organisations.

TETRA RADIO TERMINALS

We offer a wide range of TETRA terminals to meet the unique requirements of mission critical communications across a wide variety of industries including transportation and logistics, oil and gas, utilities and public safety.

MXP600

FRONTLINE SAFETY, TODAY AND TOMORROW

MXP600 benefits from innovative audio technology, LMR and Wi-Fi Over-the-Air Programming, HD voice ready-hardware and Bluetooth® 5.0 for a leading-edge user experience today and ready for mission-critical communications tomorrow.

KEY FEATURES

- Class 3 transmit power
- SMA connector
- Bluetooth® 5.0, 4.2, 4.1, 4.0, and 2.1 + EDR
- Full car kit support
- GPS and Galileo or BeiDou or GLONASS
- Large 2.4 inch display
- Integrated NFC
- Rated IP65, IP66, IP67, IP68 (2m, 2 hours) and MIL-STD 810 C, D, E, F, G, H
- Hardware ready for High Definition (HD) voice
- Noise Suppression
- Automatic Howling Suppression
- Wi-Fi 2.4GHz and 5GHz
- TETRA Over-The-Air Programming
- Wi-Fi Over-The-Air Programming and firmware updates

TOUGH, RESILIENT AND EFFICIENT DIMETRA™ TETRA SYSTEMS FOR CRITICAL COMMUNICATIONS

Motorola Solutions' DIMETRA systems have been continuously developed for more than 20 years to meet the needs of all types of TETRA users, from nationwide public safety network operators to users in the commercial or industrial sectors with small systems. Numerous special features have been developed during that time to enhance capacity, reliance, cyber security, operational capability, and efficiency. In addition the virtualised core ensures ease of upgrade to take advantage of developments and cost savings in the IT industry. With a full range of service solutions, application partners and local representation, Motorola Solutions is uniquely placed to supply and support the roll-out of TETRA services for all types and sizes of operators and end users.

DIMETRA X CORE

READY FOR THE FUTURE, TODAY

DIMETRA X Core is a fully scalable TETRA system designed to make the most of your TETRA network today, while preparing you for the additional capabilities of mobile broadband tomorrow. With a software-defined core, enhanced cyber security and smart interfaces, DIMETRA X Core is built for long-term performance, giving you the mission-critical communications you need for the next 15 years or more. DIMETRA X Core is a secure, smart investment for your organisation's future.

KEY FEATURES

- Advanced architecture
- Software-defined virtualised core
- Protected investment in radio access network
- Fully scalable to 5,000+ sites
- Comprehensive feature set
- Lower operational costs
- Lower total cost of ownership
