

# Enhancing safety for education

In today's world of unknowns, it can be challenging to oversee widespread, diverse areas of your school or university grounds. Your faculty and staff not only have to manage delivering quality lesson plans and fostering a welcoming environment for students, but they also must maintain grounds-wide safety and security, anticipate unexpected events and prepare to respond to emergencies. Whether it be school violence, student mental health, a severe weather event, an active assailant threat or other disruptions, your school's technology must support your top priorities, safety and growth for your students.

# Create a nurturing learning environment by bringing together technology

## From the cafeteria to the car park

From the moment a student gets on the bus to the moment they leave their extracurricular activities, prepare your staff for challenges by connecting your critical communications, video security, access control, data and analytics. Our safety and security ecosystem works together to help your teams respond to and recognise patterns, anticipate actions, and prevent situations before they escalate into emergencies.

IF YOU NEED HELP WITH	OUR ECOSYSTEM PROVIDES
Campus security	Unified communications and integrated technology at every layer, from your school perimeter through to your classrooms
Education disruptions	Critical task management and automated workflows to keep class flowing and students learning
Staff communication	Notifications and alerts to keep staff informed in any situation
Effective emergency response	Public safety coordination and collaboration technology to provide authorities with situational intelligence to help better respond to school emergencies

# Discover the technology that helps your school tackle everyday and extreme challenges and turn them into positive outcomes

## Utmost student and staff safety

- Panic buttons to empower faculty and staff to get help instantly with the push of a button
- Body cameras provide an unbiased witness in the case of a disruptive individual
- Video security to provide visibility across vast areas to identify anomalies and enable 24/7 situational awareness
- Access control to secure entry points and automatically alert when a door is propped open or breached
- AI-powered video analytics to identify banned individuals, vehicle number plates, weapons or unusual activity
- Mass notifications via text, email and voice to notify the right people with the right information at the right time
- Vape, temperature and chemical detection sensors that immediately alert staff
- Anonymous tipping capabilities for students to report dangerous threats or bullying incidents

## Undisrupted education

- Efficient and unified staff communications create a seamless experience for students and visitors
- Tactical incident management and workflow automation to ensure key stakeholders follow all necessary routine or critical incident response steps
- Body cameras create transparency in on-campus interactions, capturing evidence and alerting designated staff upon activation
- The entire ecosystem of safety and security technologies work together to provide a safer environment for students, staff and visitors

## Reliable and efficient alerting

- Mass notifications to instantly notify parents, guardians and community members of incidents, statuses, important announcements, or other relevant information
- Ability to notify through voice, text, or email
- Anonymous tipping capabilities to report suspicious activity or information about threats to school safety

## Public safety situational intelligence

- Incident management software for proven incident and records management to enhance response and reduce risk
- Access control to unlock specific doors and entry points when authorities arrive on the grounds

# Take your school's safety & security to the next level

From inspiration to graduation, formals to finals, safer schools help teachers inspire and students thrive. Our safety and security ecosystem helps nurture the next generation of thinkers by bringing together the technologies and solutions you need to detect, analyse, communicate and manage. Because the only thing students should have to worry about is their next exam.

## Key ecosystem components we recommended for safer schools

### Avigilon video security & access control

Strengthen safety and security with integrated school grounds video security and access control systems built to secure vulnerable areas and provide frictionless access.

- Complete situational awareness
- Cloud versatility
- Driven by AI
- Manage from anywhere

### Body cameras

Having an objective, unbiased witness matters. Our body cameras can capture evidence-grade video of any situation, from playground incidents to hallway altercations.

- Maintain evidential integrity
- Pre and post-incident recording
- Secure video footage viewable by authorised users
- Video redaction capabilities

### MOTOTRBO™ Radios

Communications to instantly and reliably connect your security, administration, bus drivers and staff – so you and your team are always aware. Ensure your team can hear and be heard, loud and clear, across the grounds.

- Durable and easy to use
- Pristine audio quality
- Long battery life
- Full multimedia and app capabilities

### Halo Smart sensor

Empower school staff to get immediate help HALO3C smart sensor can help with Vape and THC Detection, Air Quality Monitoring, and more. Utilising the latest in smart technology, HALO3C has been designed with privacy in mind, as it adds a layer of security in places that are not covered by video security.

- Real-time alerts
- Easy to install
- Air quality monitoring
- Discreet and compliant
