

AVIGILON SCHOOL SAFETY & SECURITY SOLUTIONS

INTELLIGENT VIDEO SURVEILLANCE SOLUTIONS FOR A SAFER CAMPUS

Keeping your building and campus secure is a main priority. Avigilon's video surveillance and access control solutions are powered by artificial intelligence, providing a complete set of surveillance solutions that help you create a safe and secure environment and protect what is most valuable—your students, staff, and faculty.

avigilon™
a Motorola Solutions Company

CAPTURE, DETECT, ALERT CAPTURE WITH INTELLIGENT, HD CAMERAS

Avigilon High Definition Stream Management (HDSM)™ technology preserves video image integrity while intelligently managing bandwidth. When coupled with Avigilon's broad range of megapixel cameras, you get high quality imaging and maximum coverage.

DETECT CONCERNS AND PROVIDE REAL-TIME ALERTS

Improve response times in active situations. Self-learning analytics recognize and detect the movements of people and vehicles. Flag unusual motion with Avigilon's Unusual Motion Detection (UMD) and deploy Avigilon Presence Detector for accurate human presence detection in indoor areas where traditional devices may be limited. With automatic alerts via desktop browser or mobile app, instantly notify operators, real-time, of events on campus that may need further investigation.

VERIFY & ACT ACCESS CONTROL

Maintain a secure perimeter. Avigilon Control Center™ Software integrates with the Access Control Manager (ACM) system and H4 Video Intercom allowing you to remotely communicate with visitors, verify identity, and grant or deny access. The H4 Intercom combines a 3 MP wide dynamic range, low-light camera, with a high performance intercom featuring noise reduction and echo-cancelling technologies. Meanwhile, ACM™ generated door events allow you to create rule-based actions and notifications for quick on-site responses, including immediate school-wide lockdown.

AVIGILON APPEARANCE SEARCH TECHNOLOGY

Avigilon Appearance Search™ technology allows operators to quickly and efficiently search for a person or vehicle of interest across an entire campus, and track their route, real-time or during investigations. Search for a person by selecting specific physical descriptions. Appearance Search™ technology also incorporates the characteristics of a person's face to search for the same person, even if items such as their clothing change over time.

RESOLVE POWERFUL, INTELLIGENT SEARCH

Quickly and easily search footage for quicker investigations. Powerful search tools enable you to quickly search hours of recorded video for motion, the presence of classified objects (people or vehicles), background changes in the scene (thumbnail search), and for events.

EASE OF USE

User-friendly software is straightforward and intuitive, allowing staff to operate and manage the system, whether they are an IT novice or an expert.
