

# SEE THE BIG PICTURE IN EVERY SITUATION

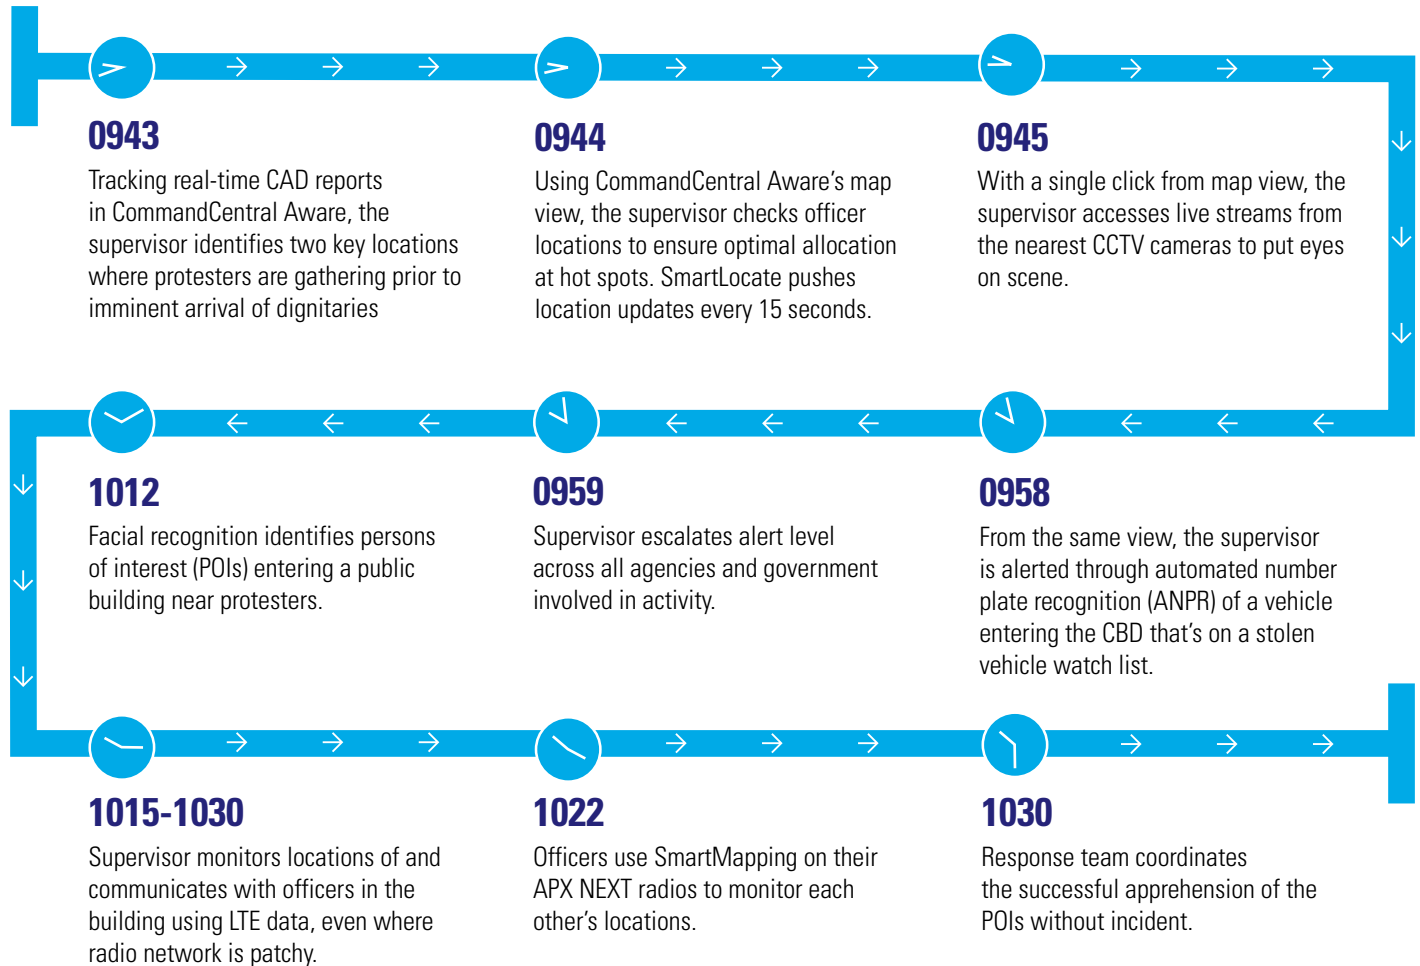

## HARNESS THE INTELLIGENCE OF THE APX NEXT AND COMMANDCENTRAL AWARE ECOSYSTEM

When you're managing complex conditions, you need a clear view of everything impacting your operation. To give you real-time awareness of where your resources are, APX NEXT and CommandCentral Aware work together seamlessly. By transforming data into intelligence, you can make the right decisions that change the situation.

# YOUR COMMAND ECOSYSTEM IN ACTION

The first line supervisor in a major incident response team is monitoring a high-profile event in the CBD using CommandCentral Aware and officers in the field equipped with APX NEXT.

## HOW IT WORKS

Do you need to monitor a huge range of inputs? We've made it possible.

- Integrating seamlessly with your APX NEXT fleet – as well as a range of radio and broadband PTT Wave options – CommandCentral Aware gathers the right information so you can interpret and act.
- If it's your role to direct critical resources, secure assets and make informed decisions that protect personnel and save lives, you need the next-level situational awareness and collaboration this ecosystem brings.

## BENEFITS

### DO IT ALL IN ONE INTERFACE

Simplify your operational view by consolidating your location tracking in a map alongside other relevant data. No more logging in and out of multiple applications.

### STAY ON TOP OF ALERTS

Keep your officers safer by monitoring real-time alerts and escalations from one app.

### UNDERSTAND THE BIG PICTURE

Recognise how an incident is unfolding in real time by layering various data sources over a single map – including video sources.

### LOG IN WHEREVER YOU ARE

Work from any computer, tablet or smartphone with an internet connection, with our secure cloud-based software.

# KEY FEATURES

Help your team stay safe and perform at their peak through the APX NEXT and CommandCentral Aware ecosystem.

## COMMANDCENTRAL AWARE

- Understand the context by layering data, such as critical locations, road closures, dispatch incidents and other events and alarms on your incident map.
- Filter with a click to display only the information you need in the moment.
- Know exactly where your people and assets are.
- Get a real-time view of the scene by accessing CCTV feeds.
- Improve multi-agency coordination by managing events from a single information source.
- Be alerted of stolen or unregistered vehicles from automatic number plate recognition (ANPR), right from the CommandCentral Aware interface.

## APX NEXT SMART RADIO

- Tap the touch screen to do what you need quickly and easily. The ultra-rugged glass works in all weather and light conditions.
- Find your location and your backup on a map.
- Know the message will get through – via LMR or LTE.
- Determine where you are, even when indoors, using server-assisted location.
- Use voice control to change a channel, adjust volume or check battery status.
- Securely share texts, images, videos and voice memos across your extended team.
- Enjoy streamlined fleet management with secure cloud-based programming and automatic updates.

## HOW THE ECOSYSTEM INTEGRATES

Enable better decision making through complete operational intelligence.

### COMMANDCENTRAL AWARE

Command centre software layers intelligence over your computer-aided dispatch.

### APX NEXT

Next-generation smart radios give first responders the lifeline they need.

# DESIGNED SPECIFICALLY FOR PUBLIC SAFETY

Motorola Solutions brings you world-leading mission-critical communications, software and managed services.

Our proven technology ecosystem unifies radio and broadband communications, intelligently captures and analyses video and integrates software solutions end-to-end. These products give us a proven track record of adding value to our customers' communications and safety capabilities.

We have more than 17,000 employees in 60 countries, serving over 100,000 customers in 100 countries. Here in Australasia, Our 450 staff across offices in Perth, Melbourne, Sydney, Adelaide, Canberra, Brisbane, Hobart and Wellington work closely with our business partners across the region.

## INNOVATING TO KEEP PEOPLE SAFE

Motorola Solutions' more than 90 years of operational expertise is underpinned by our ongoing commitment to customer-centred research and development.

We invested \$732 million into research and development in 2021, designing the next generation of technology to promote public safety and operational efficiency.

Our technology platforms include the latest advancements in smart radios and virtual assistants, control room software, video security solutions and managed services. It's why Australia's law enforcement and emergency services trust us with their lives, every day.

### ✓ VIDEO SECURITY AND ANALYTICS

Transform your video system into an active security network by combining cameras, access control, infrastructure and management software with powerful analytics.

### ✓ MISSION-CRITICAL COMMUNICATIONS

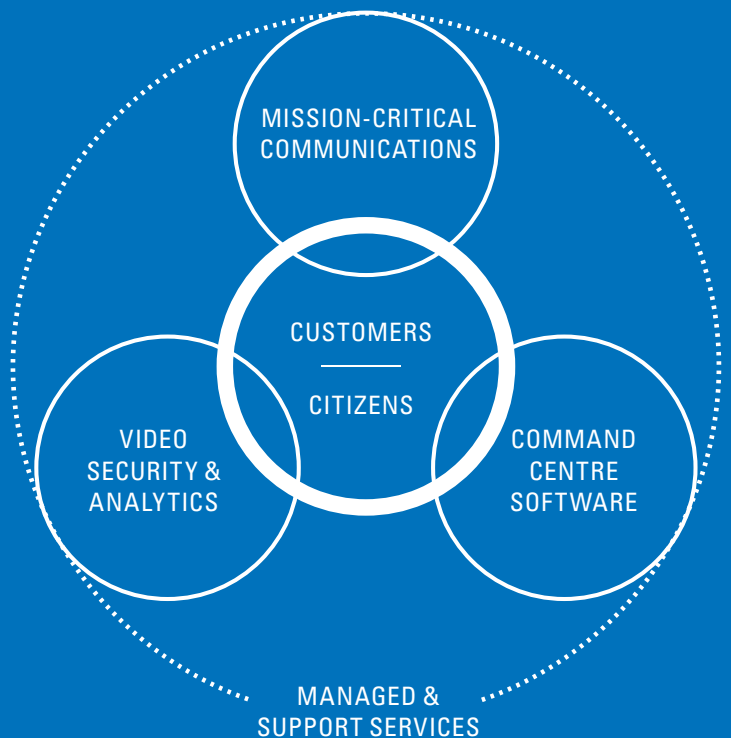

We build infrastructure and devices for seamless communications. You can be sure your investment is future-proofed because we engineer all our products to be highly customisable and scalable.

### ✓ COMMAND CENTRE SOFTWARE

Our world-leading applications and interfaces streamline workflows through communications, data and analytics.

### ✓ MANAGED AND SUPPORT SERVICES

Be confident the systems you depend on are ready whenever you need them with dedicated support services that work to help you achieve your mission.
