

CONFIGURE YOUR TECHNOLOGY. AUTOMATE WORKFLOWS. MANAGE OPERATIONS.

Time is precious. And managing the communications, video and software that comprise your security technology ecosystem can be a time-consuming, challenging task. What if there was a way for you to focus on what matters most, and automate the rest?

That's why we created Orchestrator.

It's a simple, user-friendly and cloud-based interface tool that gives administrators the ability to configure and automate workflows that control their integrated security technology ecosystem. These intelligent, automated workflows also enhance efficiency as well as improve response times, effectiveness and overall personnel safety. It equips your security network operations teams with the capabilities they need to detect

triggers across a number of installed devices and quickly take actions to reduce risk of breaches and downtime by automatically alerting the appropriate teams and executing the proper procedure. Orchestrator makes managing your day-to-day operations effortless by providing a self-service workflow management tool at your fingertips.

90%

of the time¹ that organisations allow to perform tasks is consumed by transfer time.

SAFETY REIMAGINED WITH ORCHESTRATE

Technology for a safer world.

Safety, efficiency and productivity are deeply interrelated. The technologies that make us safer can also make us better at everything we do - technologies that are unified by a common platform built to empower you to address the unique challenges of your operation. We've made that vision real by creating the first ecosystem to unify the technologies that keep us safe and enable individuals, businesses and communities to work together in more powerful ways. We call it "Safety Reimagined". Our ecosystem integrates video, radio and software to provide a seamless workflow for you to help solve a wide variety of problems that you may have. Orchestrate is the tool that automates it all.

ORCHESTRATE KEY FEATURES

Complex workflows, simplified.

Our business workflow automation solution, Orchestrate, is designed for your unique ecosystem. It allows you to integrate individual processes, fully manage and optimise workflows, and deliver a consistent response every time. The number

and complexity of workflows can scale to meet the needs of your operations. Because Orchestrate is a secure, cloud-based, cross-technology platform, users can access and build customised solutions from anywhere, at any time.

INTEGRATED WORKFLOWS

- Real-time holistic view of operations
- Rule-based event triage
- Secure connection across technology

PROCESS MAPPING

AUTOMATED SERVICE

- Collect data from multiple sources
- Analytics-driven logic
- Automated escalation and notification

DECISION AUTOMATION

SELF-SERVICE PORTAL

- Scalable operational views
- Secure cloud-based cross-technology
- Intuitive, visual rule design

DRAG-AND-DROP INTERFACE

A MANDATE TO AUTOMATE

Take care of what matters the most. Automate the rest.

Timeliness, productivity and controlled costs are key to well-run, successful operations. Yet, 90 percent of the time¹ that organisations allow to perform tasks is consumed by transfer time. Conventional workflows, which are typically handled manually on a one-by-one basis, take time to plot and assign. Even when assignments are automated, 45 percent of organisations² say they address their automation strategies in an ad-hoc way. Additionally, cross-silo integration challenges and lack of continuity across systems and

technology are hobbling organisations. Resources are challenged, too. Businesses report a 92 percent workforce gap³ in the skill sets needed to automate operations. Clearly, a solution with integrated automation capabilities that addresses operational efficiencies and breaks down the barriers of siloed automation to allow businesses to do more with less would be a game-changer.

MAXIMIZING INCIDENT RESPONSE

Leveraging Safety Reimagined to deliver a portfolio of outcomes, Orchestrate combines artificial intelligence with digital business logic to help organisations determine how they detect, analyze, communicate and respond to operational events.

ORCHESTRATE HELPS BY...

Automatically monitoring remote areas, maximising resources
Securely harvesting operational data 24/7

Leveraging and evaluating real-time data
Providing actions and alerts based on trigger type

Setting up role-based workflows
Initiating trigger-conditional logic

Dispatching response teams
Automatically logging of incident information

ORCHESTRATE BENEFITS

Instant awareness. Immediate response.

Orchestrate greatly improves your operation's situational awareness and ability to immediately respond with the appropriate actions. Directly alert necessary personnel with real-time visibility to unfolding events. Enable and restrict access with automated responses to intrusion system alerts and other security triggers by immediately locking/unlocking doors, enabling/disabling access cards and closing/opening perimeter gates. Receive automatic alerting in response to unknown or unwanted vehicles on your property. Orchestrate's reusable, standardised workflows improve efficiency and scale to your organisation's requirements.

		
INTUITIVE	INTEGRATED	INTELLIGENT
<p>Simple drag-and-drop design tool Access from anywhere, anytime No coding required</p> <p>EASY TO USE</p>	<p>Expedite detection & response Reusable, standardised workflows Cross-technology connections</p> <p>ACCELERATE OPERATIONS</p>	<p>End-to-end automated workflows Streamlined processes Advanced video analytics triggers</p> <p>AUTOMATE TO SCALE</p>

HOW ORCHESTRATE WORKS

Self-service workflow creation.

Administrators can create rule-based, automated workflows between their technology sleeves to enhance efficiency as well as improve response times, effectiveness and overall safety.

EXPLORE

Easily scale operational views for effective workflow management

DEFINE

Establish business logic with a simple-to-use, graphical interface

CONFIGURE

Create automated workflows for machine-assisted decision-making

ACTIVATE

Leverage analytics to trigger conditional logic, alerting and informing relevant teams

THE ORCHESTRATE TOOL BOX

Integrated workflows for voice, video and software operations.

Orchestrate configures your technology ecosystem to connect workflows, accelerate incident engagement and boost productivity.

ORCHESTRATE TECHNOLOGY ECOSYSTEM

ORCHESTRATE COMPONENTS

BUILT IN SECURITY FROM THE START

We know you take your system security seriously and we do too. Our philosophy is that security needs to be injected into every phase of development and integration, with understanding and oversight into cybersecurity risk and mitigation options. Our adherence to the **Software Development Lifecycle (SDLC)** underscores our commitment to maintain and provide up-to-date standards, approved frameworks, checklists and guidance that can be followed all the way through the development lifecycle and beyond.

ORCHESTRATE IN ACTION

Restricted door opened

Orchestrate alleviates the requirement of someone having to be in the command center / video wall to receive a notification of a potential threat. Intelligence and notifications are automatically shared beyond the command center and into the field where they can quickly be acted upon.

DETECT PROPPED DOOR ALERT

Alert sent to security about a door propped open in restricted area outside of the facility.

ANALYZE LOITERING ALERT

Security alerted to group of individuals loitering outside of propped door entrance.

COMMUNICATE NOTIFICATION COMMUNICATED

After initial alerts, image and location of the individuals are sent to field security teams to disperse the crowd and secure the door.

RESPOND CORRECTIVE ACTION TAKEN

Security locates the loiterers, who are seasonal employees taking a smoking break. The supervisor corrects action and an incident is logged with pre-populated fields and relevant data allowing for further training and analysis.

EMPOWER YOUR OPERATIONS

Address the unique challenges of your operation, automatically.

TECHNICAL SUPPORT FOR ORCHESTRATE

Expert help when you need it.

Orchestrate is backed by the same expert support that you've come to know and trust from Motorola Solutions. Our experienced and certified experts are available **9am - 6pm GMT+8 in Asia** and **9am - 6pm AEDT in ANZ**. Tapping into our rich knowledge base ensures a rapid response and quick resolution of issues.

AUTOMATE WITH ORCHESTRATE

Let intelligent workflows do the work.

Your organisation is being continually challenged to do more with less - and to do it quickly, efficiently and cost-effectively - all while protecting people's safety. When you are able to immediately recognise and respond to threats and unexpected events, you are able to focus on the work at hand. Ensuring nothing is missed. From simple machine-assisted decision-making to complex workgroup action and event management, Orchestrate empowers you to address the unique challenges of your operation, automatically. All so you can keep your focus on what matters most.
