

WAVE PTX ON PREM

WITHIN YOUR SECURE IT NETWORK

Installed within your network and on your premises, WAVE PTX provides fast, secure, reliable broadband PTT communication across any network, any device. Moreover, because it is deployed within your secure IT network, WAVE PTX On Prem allows you to control all update and maintenance activity.

TWO MODES ONE APPLICATION

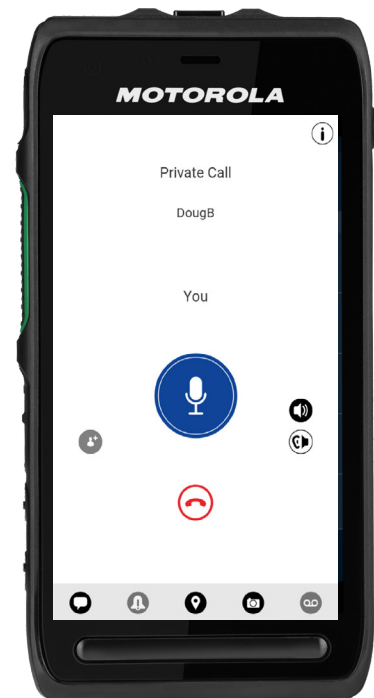

Select the right client mode for each user: PTT Radio, which emulates experience with a conventional two-way radio, and Standard mode, which offers device-based management of contacts, talkgroups, and scan lists.

LET EVERYONE BE PART OF THE CONVERSATION

WAVE PTX On Prem and two-way radio users can join the same talkgroups so critical team members remain connected even when out of radio coverage or off duty.

ENHANCE WORKER SAFETY

A standard feature, emergency calling and alerting provides users in times of distress with priority communication at the touch of a button.

LOCAL CONTROL WITH ENHANCED SECURITY

A premises-based deployment option for 200 – 3,000 users, WAVE PTX On Prem is well suited to provide broadband PTT for customers with unique data security requirements or highly remote locations.

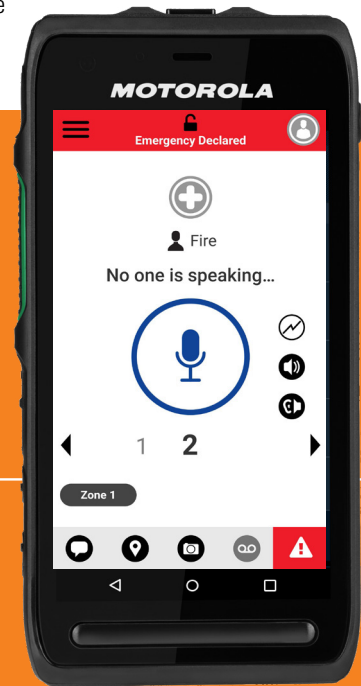

WAVE PTX ON PREM PROVIDES A VAST ARRAY OF STANDARD FEATURES:

- Group and individual PTT calls
- Group and individual text messaging
- Emergency calling and alerting
- Wireline interoperability to DIMETRA™ X Core, MOTOTRBO™ or ASTRO® 25 systems
- Web-based dispatch application
- Presence & location information
- Background calling mode

Wireline interoperability to DIMETRA™ X Core, MOTOTRBO™ or ASTRO® 25 systems

WAVE PTX On Prem also offers an extensive package of optional features, including voice message fallback, priority scanning, geo-fencing, multimedia messaging and location-based temporary talkgroups. The standard deployment model for WAVE PTX On Prem includes software for a non-redundant server configuration, but an option for a geographical redundant server configuration is also available.

FLEXIBLE CHOICE OF DEVICES AND ACCESSORIES

Get the right tool for the job – choose the smartphone or tablet you prefer and the accessories that best fit your needs and budget.

Smartphones and tablets

Android and iOS

Accessories

Add remote speaker microphones, headsets, lapel microphones, and similar accessories to enhance the user experience

CONNECTING YOUR TEAMS ANYWHERE

By extending instantaneous group communication to users on smartphones and tablets as well as two-way radios, WAVE PTX On Prem provides connectivity without limits. The result is team members that can stay connected at the push of a button wherever they may be, whatever network they are using.
