

# SIMPLIFY PROSECUTOR CASE SHARING

## JUDICIAL SHARING WITH COMMANDCENTRAL EVIDENCE

Successful prosecutions rely heavily on digital evidence. Evidence must be shared in a timely manner and fully tracked and audited, with chain of custody intact. However, many prosecutor's offices are behind the curve in managing digital evidence. This is due in part to rapid technology changes, the proliferation of digital evidence sources and limited budget for the proper tools.

As a result, law enforcement agencies often must download all case-related digital evidence to physical media — such as CDs and USB drives — and physically transport them to the prosecutor's office, taking up valuable time and resources. And when there are case updates? The whole process repeats.

CommandCentral Evidence includes flexible cloud sharing options to keep prosecutors up-to-date, including a streamlined page designed for simplicity and security. This dedicated experience allows judicial partners to access the case content shared with them — even from multiple agencies — from one, secure location.

# SIMPLIFIED SHARING FOR YOUR AGENCY

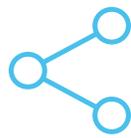

## FASTER AND EASIER JUDICIAL COLLABORATION

The Judicial Sharing experience with CommandCentral Evidence provides benefits to both law enforcement agencies and judicial partners. While other sharing solutions will offer you a way to share digital evidence files, Judicial Sharing with CommandCentral provides a way to share the actual Incident Record, and therefore a more complete incident view as you prepare for court. Here are a few additional benefits to your agency and judicial partners:

### NATIVELY REDACT MEDIA

Our comprehensive redaction suite provides all the tools you need in one place to easily protect the privacy of those involved in an incident and prepare evidence for court.

### SECURE DATA SHARING

After the District Attorney's Office sets up prosecutors as authenticated users in their account, your agency can easily select prosecutors from a list within the Share Manager page and begin sharing.

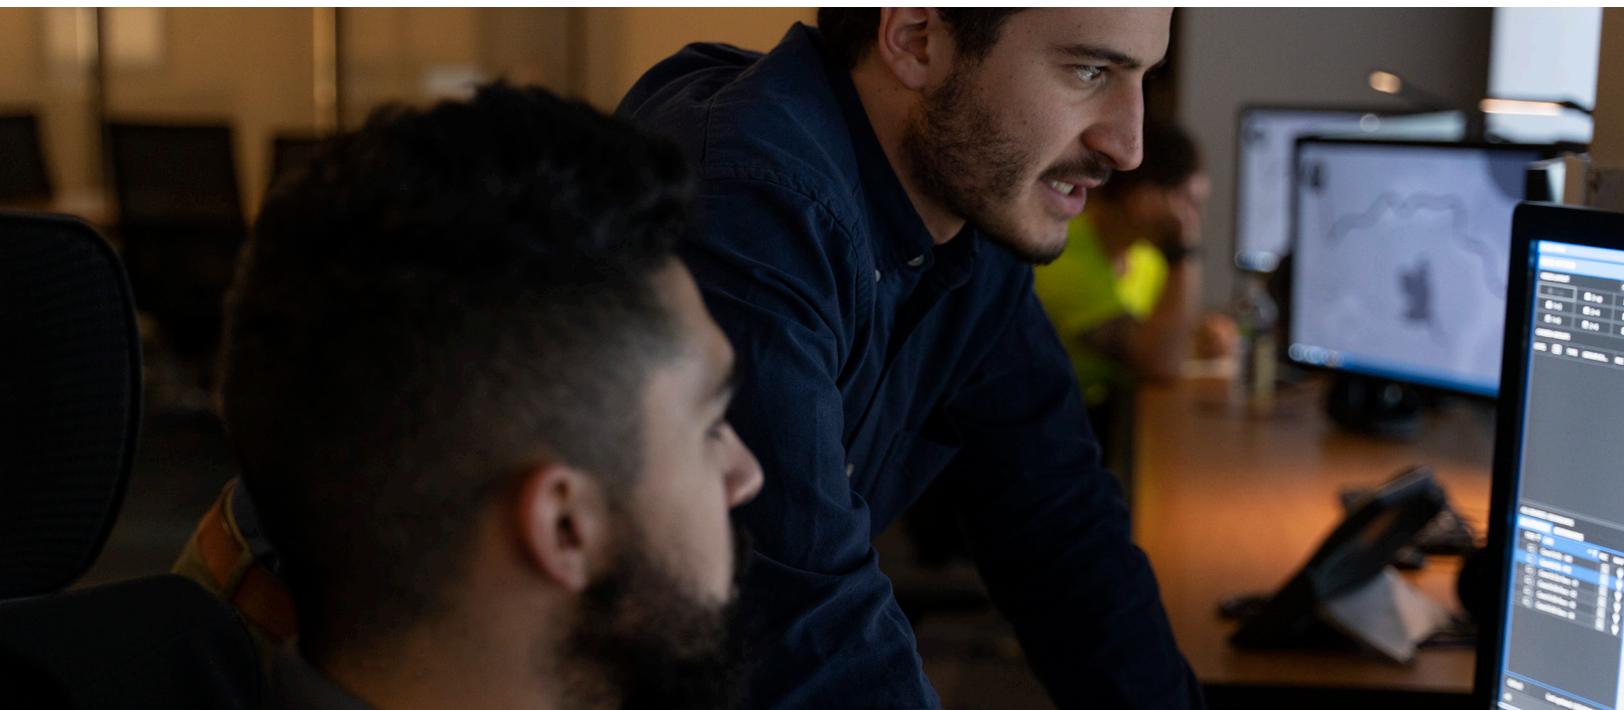

### SET A TIME LIMIT TO VIEW THE CASE

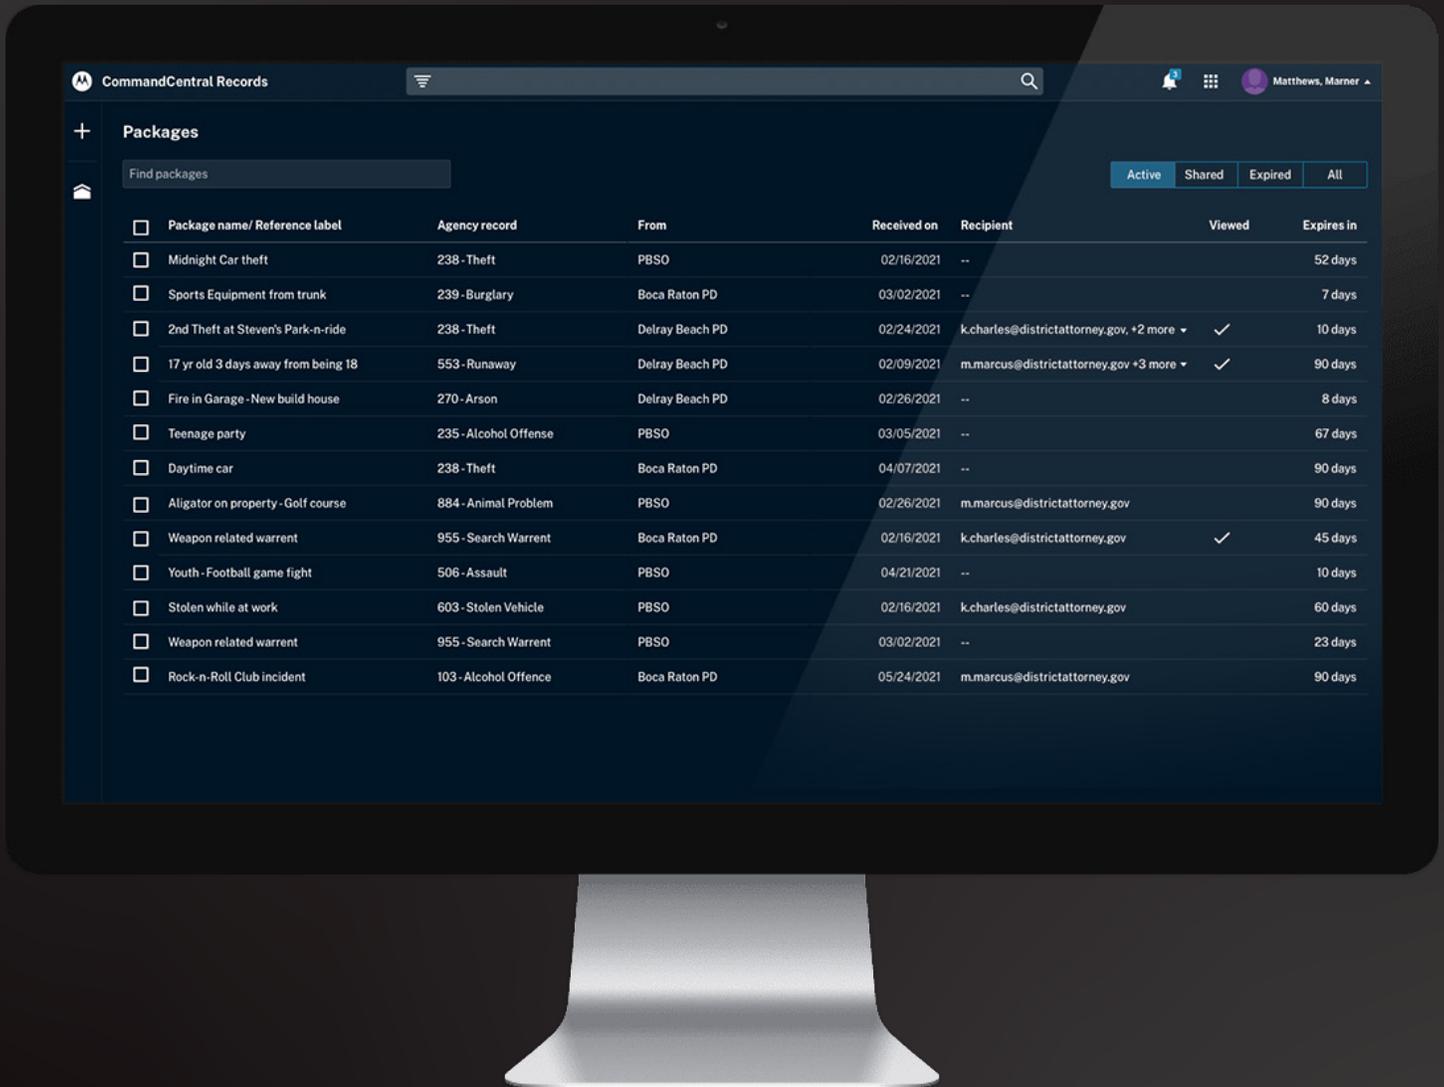

Set a time limit for judicial partners to access the case, so you always know who can view your cases at all times.

### SEE WHEN THE PACKAGE WAS RECEIVED

Check when the shared case package was received by the prosecution, so you know they received it on time, the first time.

# A STREAMLINED EXPERIENCE FOR PROSECUTORS

## ORGANIZE MULTI-AGENCY SUBMISSIONS

Easily track and organize case information, even when submitted from multiple agencies. Shared packages can be sorted by agency or case number, instead of digging for updates in an email inbox.

## SEARCH AND FILTER SHARED CASES

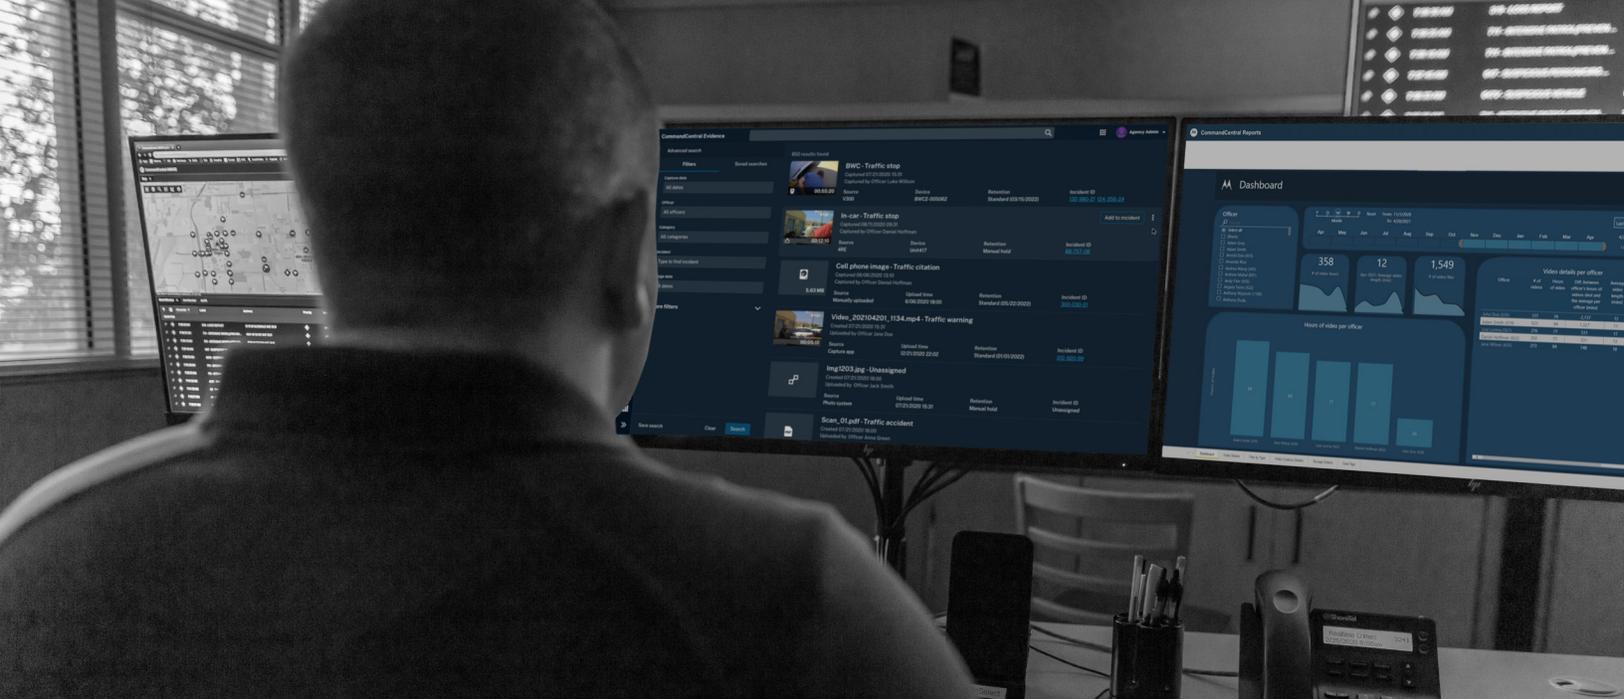

Search shared cases and media to quickly find the information you need. You can also filter by active, shared, or expired packages.

## EASILY TRACK UPDATES

Subscribe to email updates for newly shared or updated case packages. Updated case packages are marked with a blue dot to indicate that new information has been added.

## RESHARE WITH THE DEFENSE

The prosecution can easily reshare information with the defense, saving your agency the additional step of sharing another physical copy.

# BENEFITS BEYOND SHARING WITH COMMANDCENTRAL EVIDENCE

Secure, simplified Judicial Sharing is just one of the benefits of CommandCentral Evidence, which offers agencies a dynamic new approach to data management. A unified case management experience means your agency can enjoy a single, post-incident workflow instead of defaulting to the siloed systems of the past.
