Motorola Solutions’ NG9-1-1 CallStation and Flex CAD offer a more efficient call management approach by integrating call handling into CAD and easing the call taker’s already stressful job. The result is a more efficient and comfortable workspace. The call taker minimizes keystrokes, reduces errors and speeds response. No more swiveling back and forth between applications. Now, answering a call, creating an incident, dispatching and releasing a call can be accomplished in as few as four keystrokes - all from one workstation.

SPILLMAN FLEX CAD is a fully integrated and flexible off-the-shelf solution. The integration of CALLWORKS CALLSTATION leverages the CallStation call handling functionality to provide a superior, integrated call handling and dispatch application into one.
BENEFITS

INCREASE CALL TAKER FOCUS
With CAD incidents the primary focus, the integration of call handling and CAD makes it easier for the call taker to manage the 9-1-1 call while remaining in the CAD screen. No distractions between two applications. Plus, the Genovation keypad is always active, allowing you to answer the call no matter what’s on your screen at the time.

INCREASE EFFICIENCY
Interacting with two keyboards and multiple screens requires a call taker’s eyes, body, head and neck to constantly move back and forth between applications. With integrated call control, the call taker is able to take the call, plot it on the map and dispatch—all in one motion—improving their workplace efficiency.

BENEFIT FROM ONE MAP
Separate 9-1-1 and CAD systems often come with separate maps that don’t communicate with one another. With CallStation / Flex CAD, the call taker benefits from one, consolidated, multipurpose map. You can easily view the location of calls received and resources available. Calls are coded by call type: incoming, answered and completed, making it easy to view call patterns and quickly identify any new calls unrelated to a known incident, improving coverage in real time.

SAVE TIME, GAIN PEACE OF MIND
Multiple vendors may mean multiple computers at each position and complex cabling which translates to agency headaches. Reduce IT support and costs by reducing hardware at each position. With Motorola Solutions, 9-1-1 agencies have one vendor to contact for support for NG9-1-1 and CAD. Whether by phone, email or online, we are committed to providing a quick response and answers to resolve questions and issues.
