MOBILE ARREST FORM
CONVENIENTLY RECORD ARREST DATA WHILE COMPLETING A FIELD REPORT

TIME-SAVING PROCESSES
The Mobile Arrest Form enables agency personnel to complete many incident and arrest-related tasks in a single application while responding in the field. When added on to the Mobile Field Report with Field Interview module, the arrest form enables personnel to outline detailed arrest information when creating incident records. This includes information such as name, location, arrest type, and offense codes. Using the Mobile Arrest Form enables field personnel to follow a more natural workflow while responding to calls for service, saving time and reducing the need to duplicate work.

JAIL INTEGRATION
Both the arresting agency and receiving corrections facility can save time with the Mobile Arrest Form’s smooth integration capabilities. For jails on the same Spillman Flex system as the arresting agency, data entered into the form is automatically populated into the appropriate jail records through the central Hub. For jails on a separate Flex system or a non-Flex system, the Mobile Field Report with Field Interview module generates a printable booking sheet that can be customized to meet the needs of jail personnel.

MULTIPLE ARREST CAPABILITY
Some calls for service require responding officers to arrest multiple individuals at once. Re-entering the same incident data into each offender record, such as date, time, location, and booking agency, can be a time-consuming process. The Mobile Arrest Form includes a duplicating feature that enables the arresting officer to quickly and easily attach multiple offender records to the same incident record. After completing the first offender record, the officer can select “Additional Offender” and the applicable fields will automatically populate, saving time and promoting data consistency.

ACURATE REPORTING
The Mobile Arrest Form expedites the crime reporting process for public safety agencies by placing all required fields, including state-specific incident-based reporting (IBR) requirements, in one location. With the form, first responders can quickly enter required data in the field while the information is fresh in their minds. This creates more accurate reports because records clerks do not have to capture all incident details after the fact.

Flex’s Mobile Field Report with Field Interview module is required to run the Mobile Arrest Form.

SPILLMAN FLEX | MOBILE ARREST FORM
TOTAL SOFTWARE INTEGRATION

Spillman Flex’s Integrated Hub™ is an open, centralized database where all agency information is entered, stored, and extracted in real time, providing total software integration. This allows users to enter data once and have it automatically shared among related modules. Agencies using this module can optimize their system and enhance productivity through total integration with other Flex modules.

1. The Mobile Arrest Form allows field personnel to efficiently log incident and arrest data in one application.

2. Personnel can easily attach multiple offender records to one incident using the “Additional Offender” function, which automatically duplicates basic information about the call.

3. The form enables personnel to quickly capture all data required for crime reporting, including state-specific IBR requirements.
