## BE HEARD ABOVE ALL ELSE

**PROVIDING NEXT-LEVEL NOISE CANCELLATION, LOUDNESS, AND CLARITY, SO YOU CAN HEAR AND BE HEARD ANYWHERE ON SCHOOL GROUNDS.**

How long does it take for your team to hear and be heard in a crowded lunchroom, energetic assembly, or noisy hallways? How is the delay in communications affecting safety and security at your school?

**Hear clearly the first time – when it matters most – with MOTOTRBO R7.**

MOTOTRBO R7 is a digital portable two-way radio offering game-changing audio capabilities in a rugged, future-ready device. Its advanced audio processing ensures that your communications are heard loud and clear today, while its rugged construction and advanced connectivity options ensure your teachers, security officers, and staff are ready to meet tomorrow's challenges.

### SHARP, CLEAR AUDIO TO COMMUNICATE IN ANY SITUATION

Providing next-level noise cancellation, loudness and audio clarity, MOTOTRBO R7 excels where audio communications can be challenging. Featuring Adaptive Dual Microphone Noise Suppression for increased clarity, Automatic Acoustic Feedback Suppression for a seamless voice experience in crowded areas, and Intelligent Audio to monitor and adjust the speaker volume over background noise, the MOTOTRBO R7 lets your teachers, security officers, and staff hear and be heard the first time, everytime.

### BUILT TO OUTPERFORM AND CONNECT WHEN IT COUNTS

Powered by MOTOTRBO systems, R7 is ready to connect your team with customized voice coverage anywhere on school grounds. Built rugged to meet military standards, but with a sleek body style and modern ergonomic form, the MOTOTRBO R7 is ready to outperform all your expectations.

### LOUD, CLEAR AUDIO TO BE HEARD THE FIRST TIME

Classrooms, hallways, gymnasium and lunchroom can be extremely noisy places within your school building and your radio conversations can't always wait for you to move to a quiet area. Be heard no matter where you are, or what is going on around you, with MOTOTRBO R7's front and back microphones for advanced noise cancelling and a powerful forward-facing speaker delivering booming audio at four times louder than a shouting conversation.

# MOTOTRBO R7 IN ACTION DURING A TYPICAL SCHOOL DAY

Everyday security officers, teachers and staff encounter a variety of different environments across your campus. Some are quiet like classrooms or the library while others can be excessively noisy like the lunchroom or an all-school assembly. No matter where your team is located, hearing and sharing radio communications loudly and clearly the first time – in any environment – is critical to the safety and security of everyone on campus.

## CONNECTED WHEN IT COUNTS

School grounds are dynamic, accessible to a variety of individuals, and your responsibilities for students and staff can extend well beyond your physical building or campus. Keep your staff connected no matter where they are, across campus or around town, with MOTOTRBO R7's superior signal strength and robust networks. And the right people are only a button's push away when you need to send a communication to all staff, a specific individual or an entire team.

## BIG FEATURES, COMPACT DESIGN

Light and comfortable enough to carry around the building all day and simple enough to navigate in an emergency, the MOTOTRBO R7 includes more user-ready features than ever before. A substantial 2.4 inch screen provides critical information at first glance while Bluetooth enables simple connectivity with your accessories and other devices. A large emergency button is easily available in case you need it, and the slim long-lasting battery means you can spend more time using your radio than charging it.

## BE AWARE IN EVERY SITUATION

Is there a door propped open, a student in the hallway during class time, or a suspicious vehicle in the parking lot? Different situations require different levels of awareness and attention from security officers, teachers and staff. Ensure the right people on your team are always in the know with integrated awareness tools, like [Orchestrate](#), capable of sending automatic alerts to predefined user groups so the right people can quickly respond to and resolve the situation.
