

Body cameras for enterprise markets

Support your workers. Improve your business.

Challenge

Whether you manage an airport, hotel, shopping center or restaurant, your workers are the crucial public face of your organization; they represent your brand every day through their actions and appearance. Unfortunately, your employees may also encounter aggression and inappropriate behavior from customers - you have a duty of care to ensure your staff are protected and supported in the workplace, to reduce staff turnover and promote a safe working environment.

Solution

Motorola Solutions has developed a range of body cameras with these issues in mind: our solution supports your staff both during and after a confrontation. As well as capturing high-quality evidential footage, the simple press of a button can trigger other cameras in the vicinity to start recording immediately, so all angles of an incident are captured. Initiating a recording can also trigger an alert in the control room, ensuring that backup is summoned promptly. And once the situation has been resolved, you can use our VideoManager EX software to quickly review and share the footage for training or prosecutorial purposes. Body cameras play a vital role in ensuring that when a confrontation is escalating, you have your workers' backs. Additionally, the cameras' sleek and customer-friendly appearance ensures that they blend seamlessly into uniforms and dress codes, further enhancing your brand identity.

VB400 Body Camera

With a ruggedized exterior, 1080p HD video, and the ability to record for 12 hours on a single charge, the VB400 is ideal for security professionals who deal with frequent customer confrontations. It is also equipped with features, including, but not limited to WiFi and Bluetooth, to ensure your team is connected and accounted for at all times.

VideoManager EX

Designed for intuitive use with minimal training required, VideoManager EX simultaneously manages your suite of body cameras while also enabling you to play back, categorize, and process evidential footage recorded by those cameras. Sophisticated livestream functionality means you're only a click away from seeing what your employee sees in real time - Avigilon Unity Video software and third-party ONVIF support also ensures that VideoManager EX can be quickly integrated into your existing technology. With the ability to choose between on-premises and cloud architecture, as well as specialized storage options, you're sure to find the software solution that fits your organization's unique needs.
