WHAT ARE VIDEOS AND RECORDINGS?

Recordings are the complete footage recorded by a body-worn camera, from the moment it is prompted to start recording until the moment it is prompted to stop (including any pre- and post-record periods). They consist of a series of shorter videos, the length of each depends on how the body-worn camera's device profile has been configured. For example, a 1-hour long recording may be divided into 4 separate 15-minute videos, for ease of review.

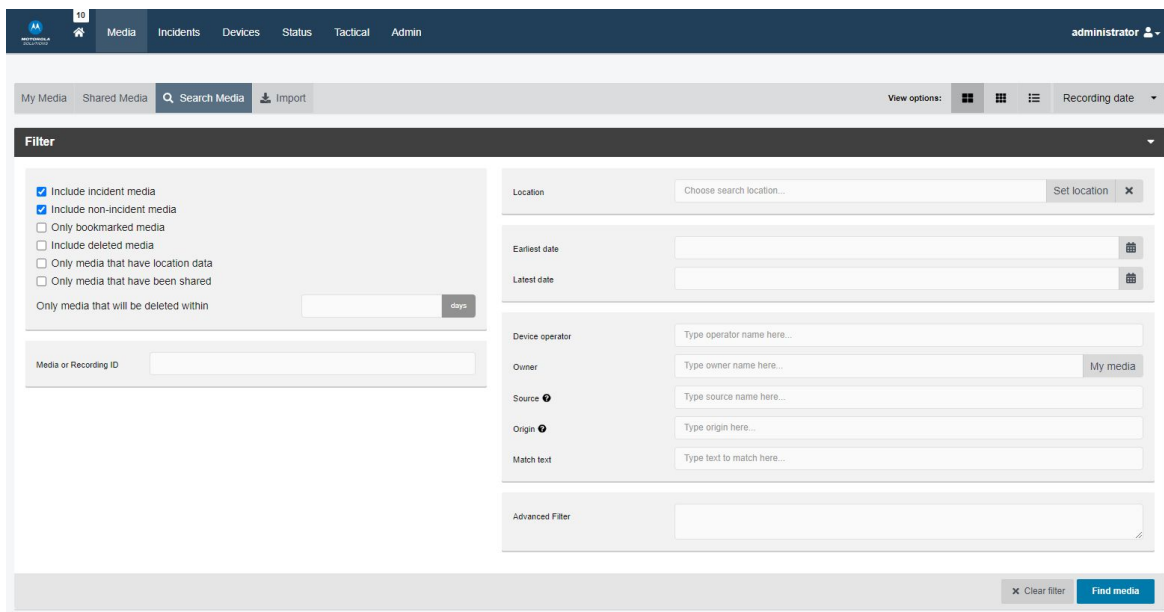

HOW DO I TRANSFER RECORDINGS FROM MY BODY-WORN CAMERA TO VIDEOMANAGER EX?

VideoManager EX automatically offloads your body-worn camera recordings while your camera is charging in its charging dock. Your camera can also offload recordings over Wi-Fi where available and configured.

HOW DO I WATCH VIDEOS ON VIDEOMANAGER EX?

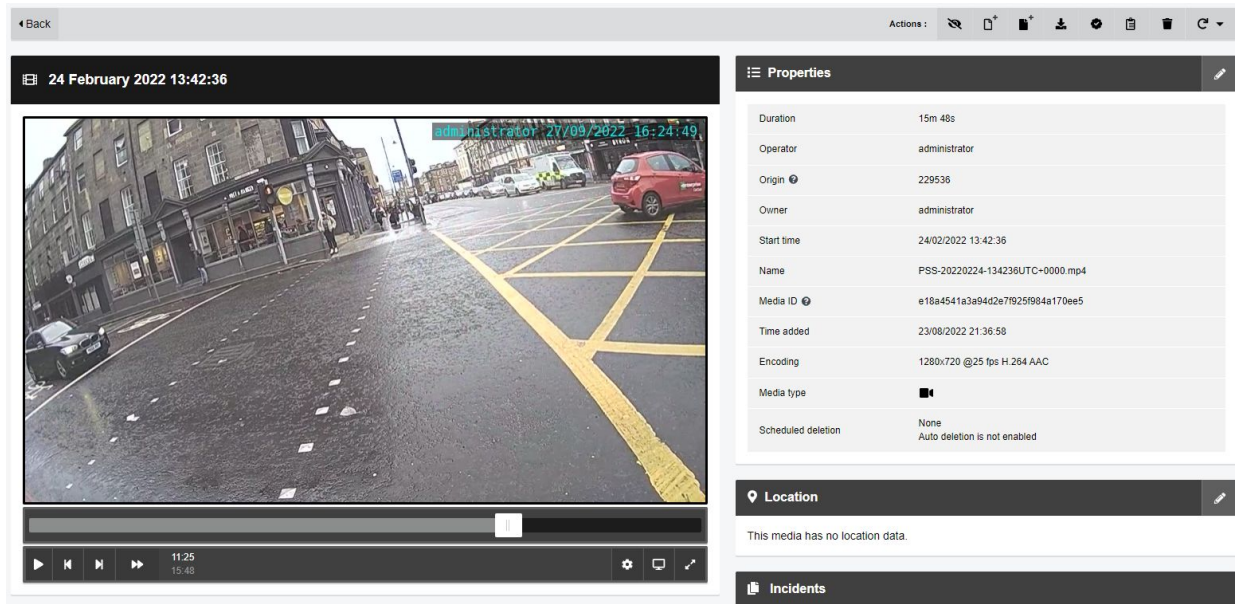

To review videos and recordings on VideoManager EX:

1. Navigate to the **Media** tab.
2. In the **Search Media** pane, filter the videos as necessary, and click **Find Media**.

3. Next to the relevant video, click > .

4. Click  in the top right-hand corner.

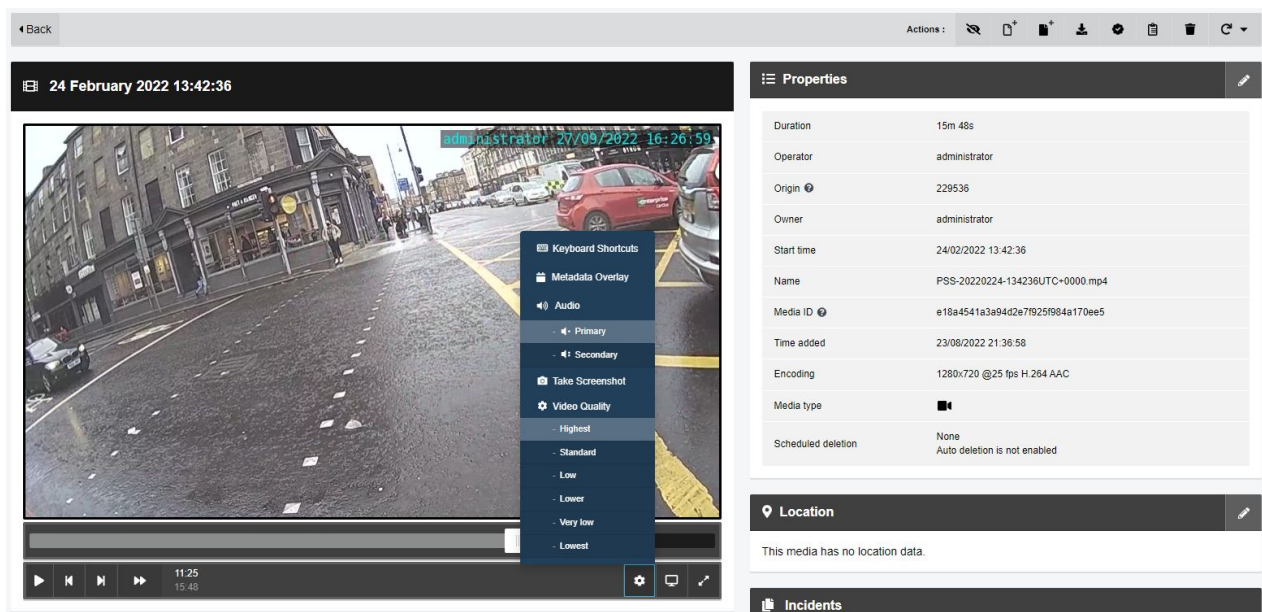

The screenshot shows a video player interface. The video is titled "24 February 2022 13:42:36" and shows a street scene with a red car and a black car. The video player has a progress bar and playback controls. To the right of the video player is a "Properties" panel with the following information:

Duration	15m 48s
Operator	administrator
Origin	229536
Owner	administrator
Start time	24/02/2022 13:42:36
Name	PSS-20220224-134236UTC-0000.mp4
Media ID	e18a4541a3a94d2e7925f984a170ee5
Time added	23/08/2022 21:36:58
Encoding	1280x720 @25 fps H.264 AAC
Media type	Video
Scheduled deletion	None Auto deletion is not enabled

Below the Properties panel is a "Location" panel with the text "This media has no location data." and an "Incidents" panel.

4. Click **Settings**. The **Playback Controls** menu will open.

The screenshot shows the same video player interface as above, but with the "Playback Controls" menu open. The menu options are:

- Keyboard Shortcuts
- Metadata Overlay
- Audio
 - Primary
 - Secondary
- Take Screenshot
- Video Quality
 - Highest
 - Standard
 - Low
 - Lower
 - Very low
 - Lowest

The Properties panel on the right is the same as in the previous screenshot.

In the **Playback Controls** menu, you can perform the following actions:

- **Play** - plays or pauses the video.
- **Step Backward** - steps backwards through footage one frame at a time.
- **Step Forward** - steps forward through footage one frame at a time.
- **Keyboard Shortcuts** - lists keyboard shortcuts that users can take.
- **Date / Time Overlay** - displays or hides the date and time the video was recorded.
- **Audio** - turns audio on or off for the video.
- **Take Screenshot** - take a screenshot of the video in playback. Screenshots are automatically downloaded to your PC.
- **Video Quality** - changes the quality of the video in playback. The default video quality setting is low. It is recommended that the highest setting is only used if there is a good data transfer connection.

To put the video in theater mode, click **Theater**. The video will be maximized to fill the entire active window - click **Theater** again to return the video to its original size.

To put the video in Fullscreen mode, click **Fullscreen**. The video will be maximized to fill the entire screen - click **Fullscreen** again to return the video to its original size.

HOW DO I WATCH RECORDINGS ON VIDEOMANAGER EX?

To watch a whole recording, you can add any video from a recording to an incident. VideoManager EX will offer to collect all the videos together - this then becomes a clip in the incident, and you can use the same controls player. You can also use the event clip tools to select a smaller section of the whole recording.
