V200 Body Camera

Let your body camera be your bodyguard

MOTOROLA SOLUTIONS

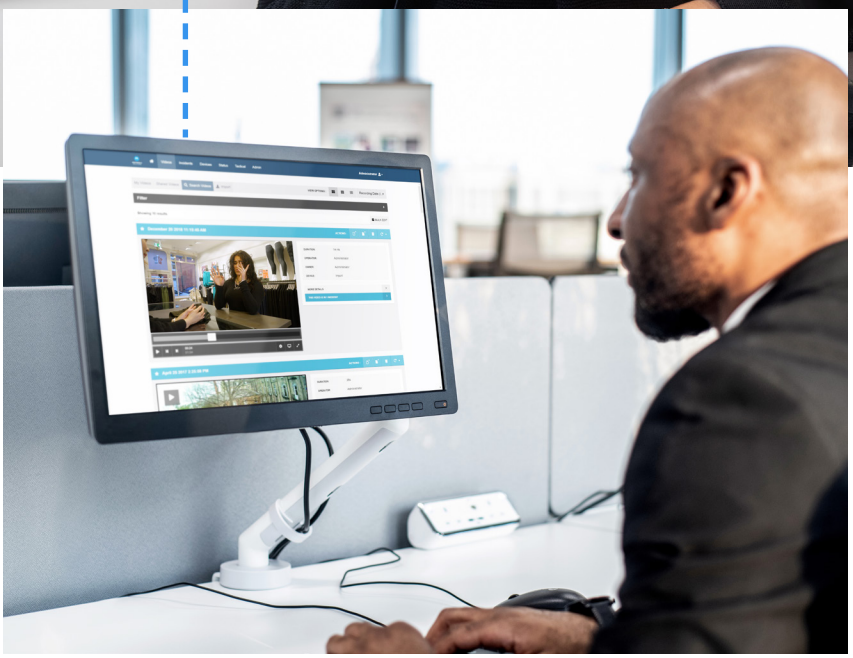

Meet your trusted safety partner

There is a growing global trend towards better prioritizing the safety and security of retail employees worldwide. Concerns ranging from theft to workplace violence are rising to be more complex and require a robust solution to prevent, detect and respond. While equipping employees with body cameras is an obvious option, an even more effective solution is a body camera that helps change the trajectory of an incident before it escalates.

The V200 body camera is designed with recording and escalation buttons to activate Golive Audio, a safety feature that ensures employees have immediate access to a supervisor or security team at a moment's notice while recording every detail from start to finish.

In addition, an intuitive top display allows for a quick glance at the battery status or connection to WiFi and the security monitoring center. These customer-influenced design elements allow employees to feel constantly supported, further enhancing their sense of security and protection throughout a shift.

Stay supported. Stay connected.

Improve real-time response when an issue arises by receiving an instant alert via text or email and viewing livestream video from your employee's camera for a first hand perspective. Exchange verbal guidance to enhance safety, de-escalate situations, and protect both associates and customers.

GoLive Audio

Provide explicit guidance to an employee in crisis and speak directly to the aggressor for effective de-escalation.

Livestream video

View real-time video of an incident and gain a first-hand perspective to enhance situational awareness and informed decision-making.

Intuitively simple and sophisticated.

quickly record and/or alert a supervisor or security team. Additionally, the top display provides details on battery life, WiFi connectivity, and escalation status to ensure an alert is active and the camera is online.

Effortless control

Purpose-built buttons provide precise control over navigation, volume adjustments, and recording functions.

Intuitive top display

Quickly verify battery status, Wi-Fi connectivity to a remote responder, and escalation status.

Shift with ease. From start to finish.

Streamline body camera allocation, charging and video offloading with a more efficient and simple process. Employees can simply swipe their RFID badge to quickly pick up a charged camera at the start of their shift, or dock a camera to offload video and recharge at the end of their shift, all without requiring additional training.

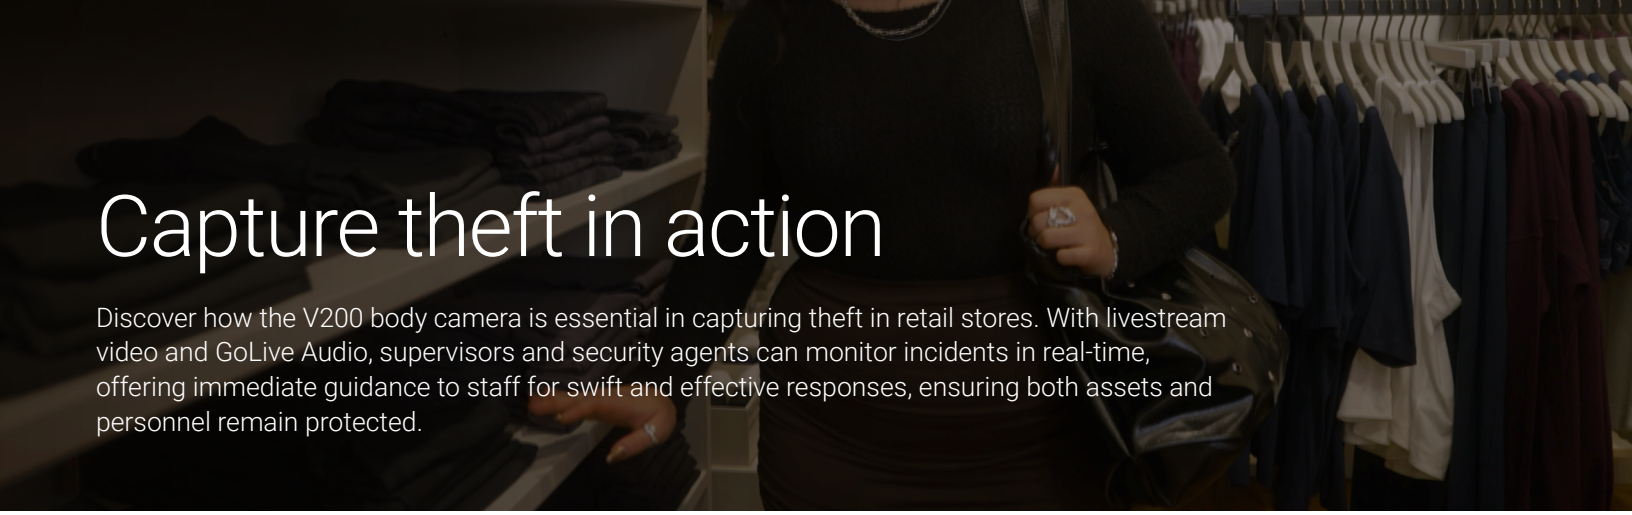

Smart Dock

Combine charging and video offloading into one to maximize space and minimize complexity.

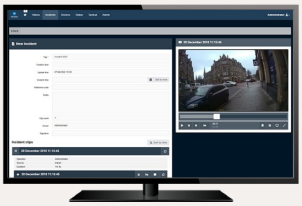

RFID Touch Assign

Checkout a charged body camera with the swipe of a badge to allow workers to focus on the job without distraction.

Capture theft in action

Discover how the V200 body camera is essential in capturing theft in retail stores. With livestream video and GoLive Audio, supervisors and security agents can monitor incidents in real-time, offering immediate guidance to staff for swift and effective responses, ensuring both assets and personnel remain protected.

	Action	Solution(s)	Benefit
If...	A retail associate observes suspicious behavior from a customer and activates a recording	 **V200**	Share livestream video from the body camera to a supervisor or security operation center agent for immediate assistance.
Then...	The security team views the theft in real-time and assigns a security guard	 **VideoManager EX**	Quickly view information directly from the perspective of the associate and send a security guard on scene for support.
And...	A security guard successfully apprehends the assailant while streaming video	 **VB400**	Gain another perspective on site with the VB400 via livestream video feed.
And...	Video footage is automatically uploaded and shared with police	 **VideoManager EX**	Retail management and security review and file the video evidence captured from the V200 and VB400 body cameras as part of the incident report. The files are shared with local law enforcement.

Step into work with comfort and style

Choose from a wide range of mounting accessories for a secure and comfortable fit throughout the day, helping your employees stay focused. And with fully customizable labels, personalize the camera to match uniforms, incorporating colors, fonts, text, and logos to align seamlessly with your company's brand guidelines.

Flexible mounting options

Ensure a comfortable and secure fit throughout the day, empowering employees to feel at ease and perform at their best.

Customizable labels

Personalize your body cameras with a full label design to match your uniforms for a consistent brand image.

Your body cameras are only as good as the software managing them

Spend less time managing body cameras, and more time focusing on what matters. VideoManager EX software is designed to make body camera management easy — so you can administer your body cameras, and the videos they capture quickly and easily, without extensive training and maintenance. Whether you want to livestream footage or simply store it for later, VideoManager EX minimizes time at the computer and maximizes your hardware investment.

Easy to deploy, even easier to use

Get up and running quickly with a plug-and-play model; choose an on-premises installation or a cloud deployment managed by Motorola Solutions.

Personalize the experience

Fit your body cameras' behavior to your workers' needs, and only enable the functionality relevant to your team.

Make your video work for you

However you want to use your footage, we have all the tools you need to manage it – including redaction and sharing – in one convenient user interface.
