# V200 Body Camera

For airline cabin crew and ground staff

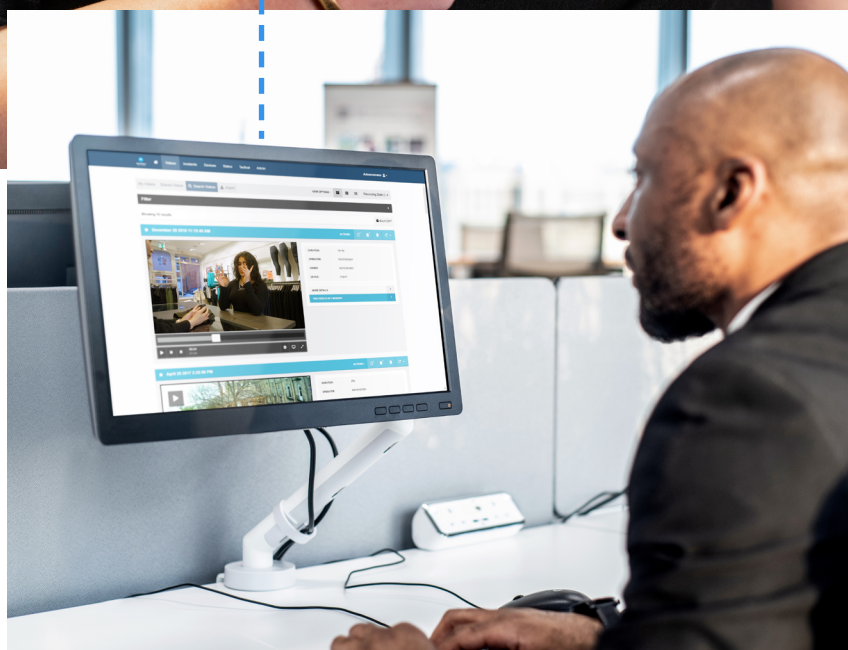

## Meet your trusted safety partner

There is a growing global trend towards better prioritising the safety and security of airline and airport employees worldwide. Concerns ranging from aggressive passengers to security incidents are rising and require a robust solution to prevent, detect, and respond.

While equipping employees with body cameras is an obvious option, an even more effective solution is a body camera that helps change the trajectory of an incident before it escalates.

The V200 body camera is designed with recording and escalation buttons to activate GoLive Audio , a safety feature that ensures employees have immediate access to a supervisor or security team at a moment's notice while recording every detail from start to finish. In addition, an intuitive top display allows for a quick glance at the battery status or connection to Wi-Fi and the alarm receiving centre. These design elements allow employees to feel constantly supported, further enhancing their sense of security and protection throughout a shift.

## Stay supported. Stay connected.

Improve real-time response when an issue arises by receiving an instant alert via text or email and viewing livestream video from your employee's camera for a first hand perspective. Exchange verbal guidance to enhance safety, de-escalate situations, and protect both associates and customers.

### GoLive Audio

Provide explicit guidance to an employee in crisis and speak directly to the aggressor for effective de-escalation.

### Livestream video

View real-time video of an incident and gain a first-hand perspective to enhance situational awareness and informed decision-making.

### Enhanced noise cancellation

Ensure clear audio capture for effective communication and evidence capture.

# Intuitively simple and sophisticated.

Remarkably straightforward and compact, the V200 features two dedicated buttons allowing staff to quickly record and/or alert a supervisor or security team. Additionally, the top display provides details on battery life, WiFi connectivity, and escalation status to ensure an alert is active and the camera is online.

## Effortless control

Purpose-built buttons provide precise control over navigation, volume adjustments, and recording functions.

## Intuitive top display

Quickly verify battery status, Wi-Fi connectivity to a remote responder, and escalation status.

# Shift with ease. From start to finish.

Streamline body camera allocation, charging and video offloading with a more efficient and simple process. Employees can simply swipe their RFID badge to quickly pick up a charged camera at the start of their shift, or dock a camera to offload video and recharge at the end of their shift, all without requiring additional training.

## Smart Dock

Combine charging and video offloading into one to maximise space and minimise complexity.

## RFID Touch Assign

Checkout a charged body camera with the swipe of a badge to allow workers to focus on the job without distraction.

# Check-in counter safety. Ground staff secure.

Discover how the V200 body camera is essential in capturing and managing gate agent, supervisor and passenger incidents in real-time. With livestream video and GoLive Audio, supervisors and security agents can monitor incidents in real-time, offering immediate

Action	Solution(s)	Benefit
<b>If...</b>  A ticketing agent observes escalating behavior from a passenger before they board the airplane (e.g., verbal abuse, non-compliance) and activates a recording	  <b>V200</b>	<b>Instant Situational Awareness:</b>  The agent triggers an escalation notification to the supervisor for immediate threat assessment.
<b>Then...</b>  The supervisor views the live stream and uses <b>GoLive Audio</b> to provide <b>direct, immediate instructions</b> to the agent via the V200 speaker and dispatches a security guard.	  <b>VideoManager &amp; V200 GoLive Audio</b>	<b>Remote De-Escalation &amp; Guidance:</b>  Supervisors can provide precise, real-time direction, often stabilizing the situation before security is physically on scene, protecting the agent.
<b>And...</b>  A security guard arrives to successfully de-escalate or apprehend the assailant.	  <b>VB400</b>	<b>Comprehensive Evidence Capture:</b>  Gain a second, verifiable, livestream perspective from the arriving security guard (VB400) to document the intervention and subsequent actions.
<b>And...</b>  Video footage from both cameras is automatically uploaded and shared with authorities.	  <b>VideoManager</b>	<b>Accelerated Resolution:</b>  Management and security can review the combined V200 and VB400 evidence in a single platform, securely file the incident report, and rapidly share the encrypted files with local law enforcement if required.

# Step into work with comfort and style

Choose from a wide range of mounting accessories for a secure and comfortable fit throughout the day, helping your employees stay focused. And with fully customisable labels, personalise the camera to match uniforms, incorporating colours, fonts, text, and logos to align seamlessly with your airline's brand guidelines.

## Flexible mounting options

Ensure a comfortable and secure fit throughout the day, empowering employees to feel at ease and perform at their best.

## Customisable labels

Personalise your body cameras with a full label design to match your uniforms for a consistent brand image.

# Your body cameras are only as good as the software managing them

Spend less time managing body cameras, and more time focusing on what matters. VideoManager software is designed to make body camera management easy — so you can administer your body cameras, and the videos they capture quickly and easily, without extensive training and maintenance. Whether you want to livestream footage or simply store it for later, VideoManager minimises time at the computer and maximises your hardware investment.

## Easy to deploy, even easier to use

Get up and running quickly with a plug-and-play model; choose an on-premises installation or a cloud deployment managed by Motorola Solutions.

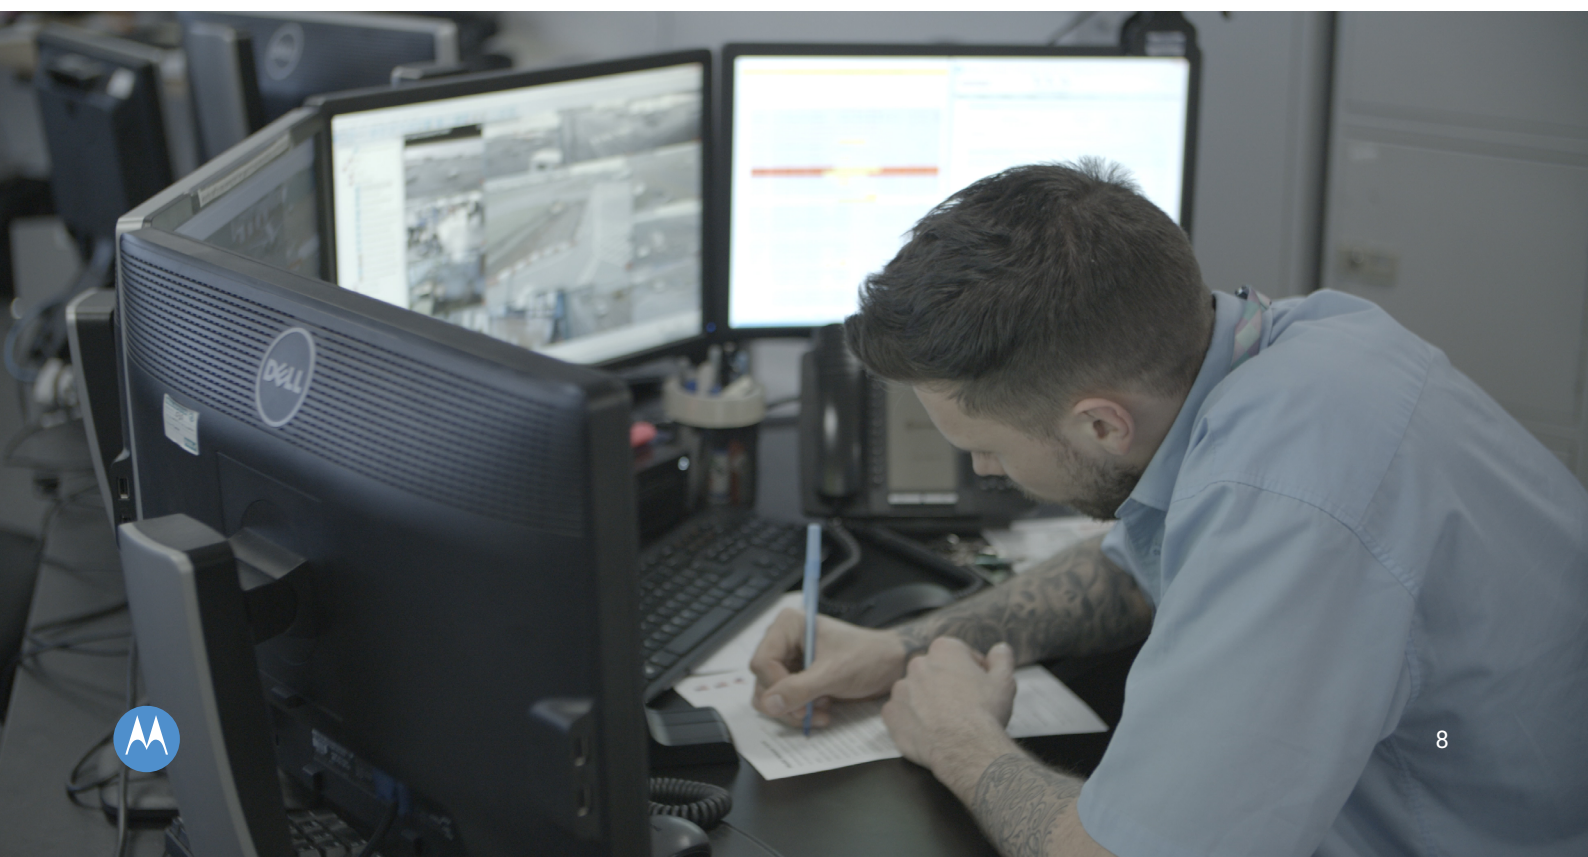

## Personalise the experience

Fit your body cameras' behavior to your workers' needs, and only enable the functionality relevant to your team.

## Make your video work for you

However you want to use your footage, we have all the tools you need to manage it — including redaction and sharing — in one convenient user interface.
