

Safety bundle: video + voice

Powerful alone. Game-changing together.

Unlock efficiency and work smarter with your VT100 body camera and Curve or TLK 25 business radio to enhance security, minimize inventory loss, and ensure a safer, more efficient retail environment.

Safeguard your staff

Deter aggression with your VT100 body camera and live-stream video while sharing immediate details from your radio to remote colleagues, enhancing situational awareness and coordinating an effective response.

Protect your business

When suspicious activity is detected, such as shoplifting or attempted theft, discreetly activate your body camera and alert the security team via radio communication.

Complete evidence collection

The VT100 body camera footage serves as valuable evidence in cases of theft or criminal activity. It provides clear documentation of the incident, including the actions of the perpetrator and any interactions with store personnel.

Take advantage of a fully customizable device and intuitive software that's easy to set up and even easier to use.

Key products

Body camera

The VT100 body camera has a lightweight and discreet, customer-friendly design with a range of mounting options suitable for virtually any style of uniform and clothing. It's easy to use, and requires minimal staff training. Seamlessly connect to your fixed video camera system and configure the device to alert your security team. Activate a live video stream from the body camera to the control center for maximum situational awareness.

Device and video management software

VideoManager EX is designed to make body camera management easy – so you can administer your body cameras, and the videos they capture, without extensive training and maintenance. Whether you want to livestream footage or simply store it for later, VideoManager EX minimizes time at the computer and maximizes your hardware investment instead.

Business radios and wearable WAVE PTX device

Choose your radio companion: Curve or TLK 25.

Curve combines simple, intuitive radio operation with advanced, Wi-Fi-enabled features that help your team stay in touch while remaining productive and focused on their work. Built for business, designed to last.

TLK 25 is a wearable WAVE PTX device that expands beyond push-to-talk communication with a dedicated emergency button that helps you streamline responses. Compact, powerful, and equipped with an intuitive voice assistant for seamless operations, TLK 25 is designed for ease of use, efficiency and safety.

For instance, in an emergency, the user initiates the TLK 25's emergency button and verbally communicates their situation. With LocationTech enabled, the users' precise indoor location is shared with the team, and the body camera streams live footage for greater situational awareness to help guide an informed response.

Safer retail

Providing clear and reliable video documentation alongside instant communication enables staff to quickly de-escalate situations, effectively respond to challenges including theft, coordinate tasks and ensure the well-being of both employees and customers

The power of video and voice

Whether it's addressing security concerns, assisting customers or managing everyday operations, body cameras and radios keep everyone on the same page, fostering a culture of transparency and ultimately contributing to a more secure and productive environment.

At Motorola Solutions, we build the best possible technologies across every part of the safety and security ecosystem to help protect people, property and places. We're connecting technologies and people in one ecosystem, enabling a new kind of safety. With our solutions, people can collaborate. Information flows where it's needed. Performance improves. Lives are protected. And safety becomes more than momentary. It becomes the constant that a better world – with safer communities, safer schools, safer hospitals, safer businesses, safer everywhere – is built on.
