

VISTA[®] HIGH DEFINITION BODY-WORN CAMERA

Ultra-rugged HD body-worn camera with simple controls, allowing officers to capture the highest quality video evidence.

SIMPLE TO USE

One touch is all it takes to start or stop a recording.

EASY TO UNDERSTAND

No guessing about battery level, recording status or memory space when using the backlit LCD.

GET IT DONE IN THE FIELD

Quickly categorize an incident immediately after ending a recording instead of wasting time in front of a computer back at the station.

AUTOMATIC EVENT LINKING WITH IN-CAR SYSTEM

VISTA and 4RE® In-Car system recordings of the same event are automatically linked together in Evidence Library 4 Web or Evidence Library Express evidence management software.

NEVER MISS AN INCIDENT

Record-After-the-Fact® technology provides the power to go back in time and capture important evidence days after it happened – even when there wasn't time to press the record button.

STUNNING VIDEO AND CD QUALITY AUDIO

A setting sun, a car's dark interior and passing traffic don't stop the capture of great video and audio evidence.

DOCK AND GO FILE UPLOAD

Fully automatic uploading of events with no officer involvement via USB dock, ideal for individual officer use, or eight slot Ethernet transfer station for large agencies.

SMART POOLING OF CAMERAS

Rapid Checkout KIOSK feature assigns a pooled body camera to an officer in seconds.

Lens rotates 40° for optimal aiming from any mounting location.

Locking magnetic chest mount is our most popular.

Everything you need to know displayed on a backlit screen.
