

CommandCentral AXS Radio Dispatch Console

For ASTRO® and DIMETRA™ X Core

Say hello to the future of dispatch

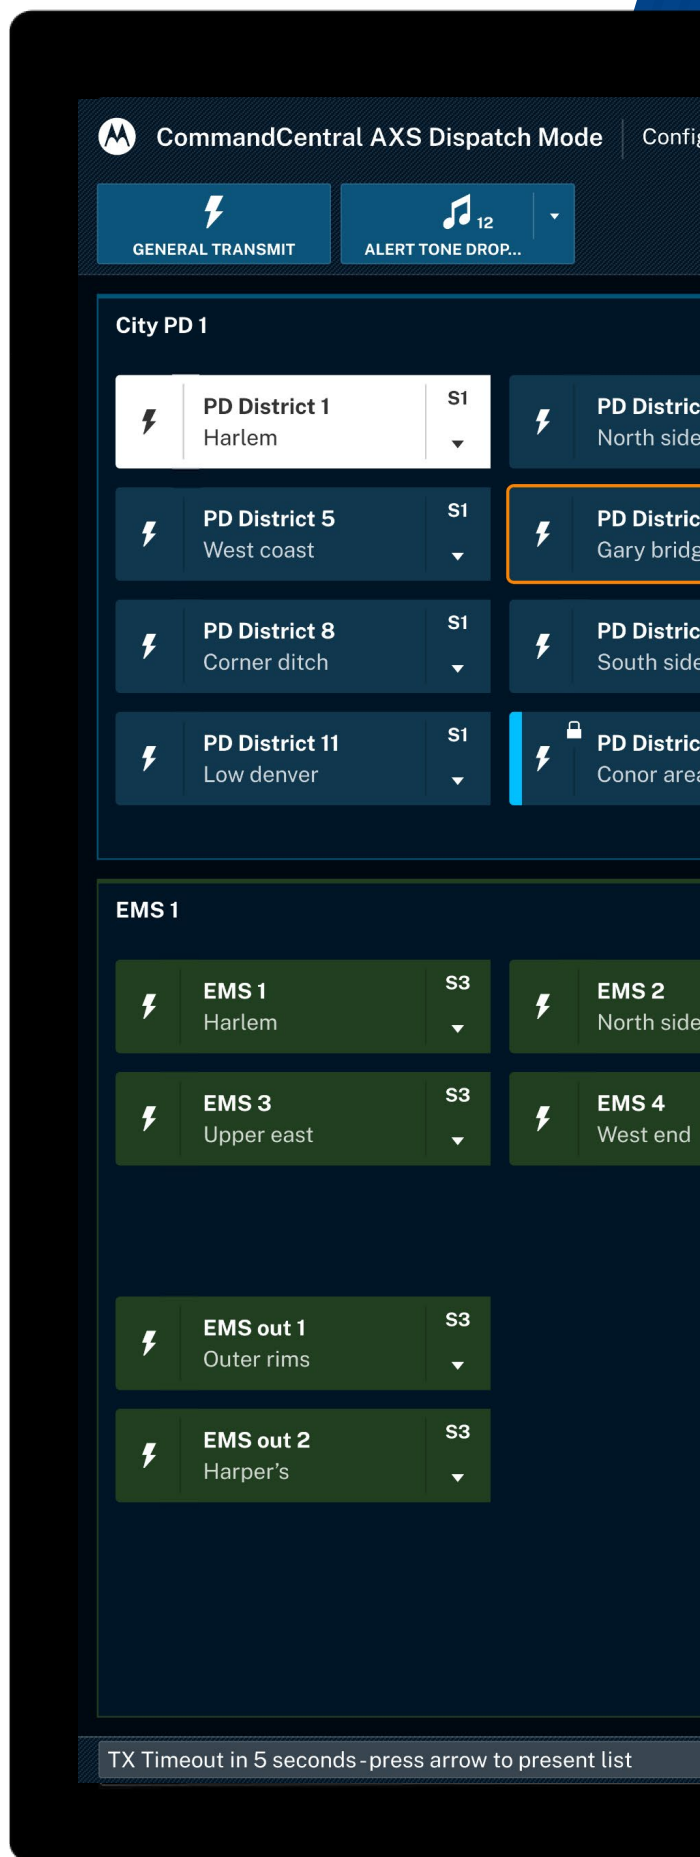

In today's dispatching world, there's more information, resources and tools competing for your attention than ever before. Cut through the noise and be ready for any crisis, now and into the future, with CommandCentral AXS, the modern, intuitive dispatch solution purpose-built for ASTRO® and DIMETRA™ X Core radio networks. It simplifies complex information, offering familiar workflows for migrating agencies and a future-ready experience for new users. It's a purpose-built radio dispatch console — integrated, proven, and modernised.

Next generation dispatch experience

Designed to work the way you do

As a dispatcher, you face crisis situations every day. You need more than a new app or device. You need new thinking — a next generation platform that works for you, not the other way around.

CommandCentral AXS brings an improved interface built on the familiar MCC 7500 workflows used for decades in radio dispatch deployments. Based on input from dispatchers worldwide, the enhancements are purposely designed to streamline navigation, surface critical information faster and reduce common errors. The result is an optimised upgrade that feels familiar, but improves efficiency where dispatchers need it most. Touch, type, or click — AXS adapts to you.

The radio resource—everything within reach

Instant transmit button

Received call information

Expansion panels

- Received call stack panel
- Speaker assignment panel
- Emergency alarm panel
- Signalling panel

Speaker or volume

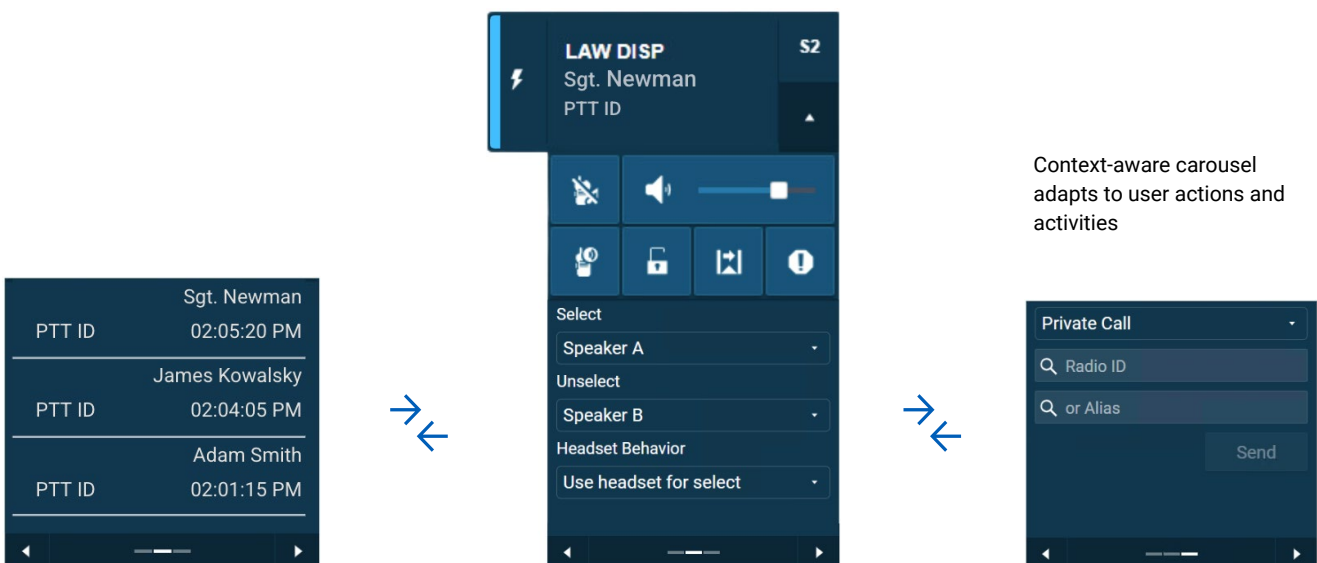

Button panel (example config)

- Channel marker
- Volume
- Remote monitor / Ambience listening
- Encryption mode
- Repeat control
- Emergency

Access important features directly within the resource

Improve accuracy and efficiency

CommandCentral AXS is all about having the important elements right where they need to be based on their priority. We put important tasks and frequently used functions directly within the resource. That way you can keep your eyes trained on what matters – even in pressure-packed moments. Whether struggling through complicated menus or accidentally pressing the wrong button, CommandCentral AXS helps minimise mistakes and confusion. Now, stay focused on the task at hand, supporting your team’s need for accuracy and efficiency.

Context-aware carousel adapts to user actions and activities

Highly flexible and configurable

Create the dispatch experience your agency needs

Interact with the console, however you see fit – touch, type or click. Have a console that represents your agency's identity and procedures. With this level of configurability, dispatchers can focus on what matters. Extend that flexibility and deploy it however you want. And rest assured that it will grow with you when the time comes.

Configurable colours

Create a unique visual experience with the colours of your choice or choose a predefined colour theme. Colour elements include resources, folder groups, buttons and more.

Configurable folder and tab organisation

Take control of the layout with the ability to quickly and easily organise it how you see fit. With the availability of dynamic and fixed folders, you can always have important resources front and centre.

Configurable for individual roles, teams and agencies

Configure the console's look and feel for an individual user, or create an agency-wide look and feel.

Configurable alerts and tones

Choose from a wide array of alerts and tones from our library.

Configurable iconography

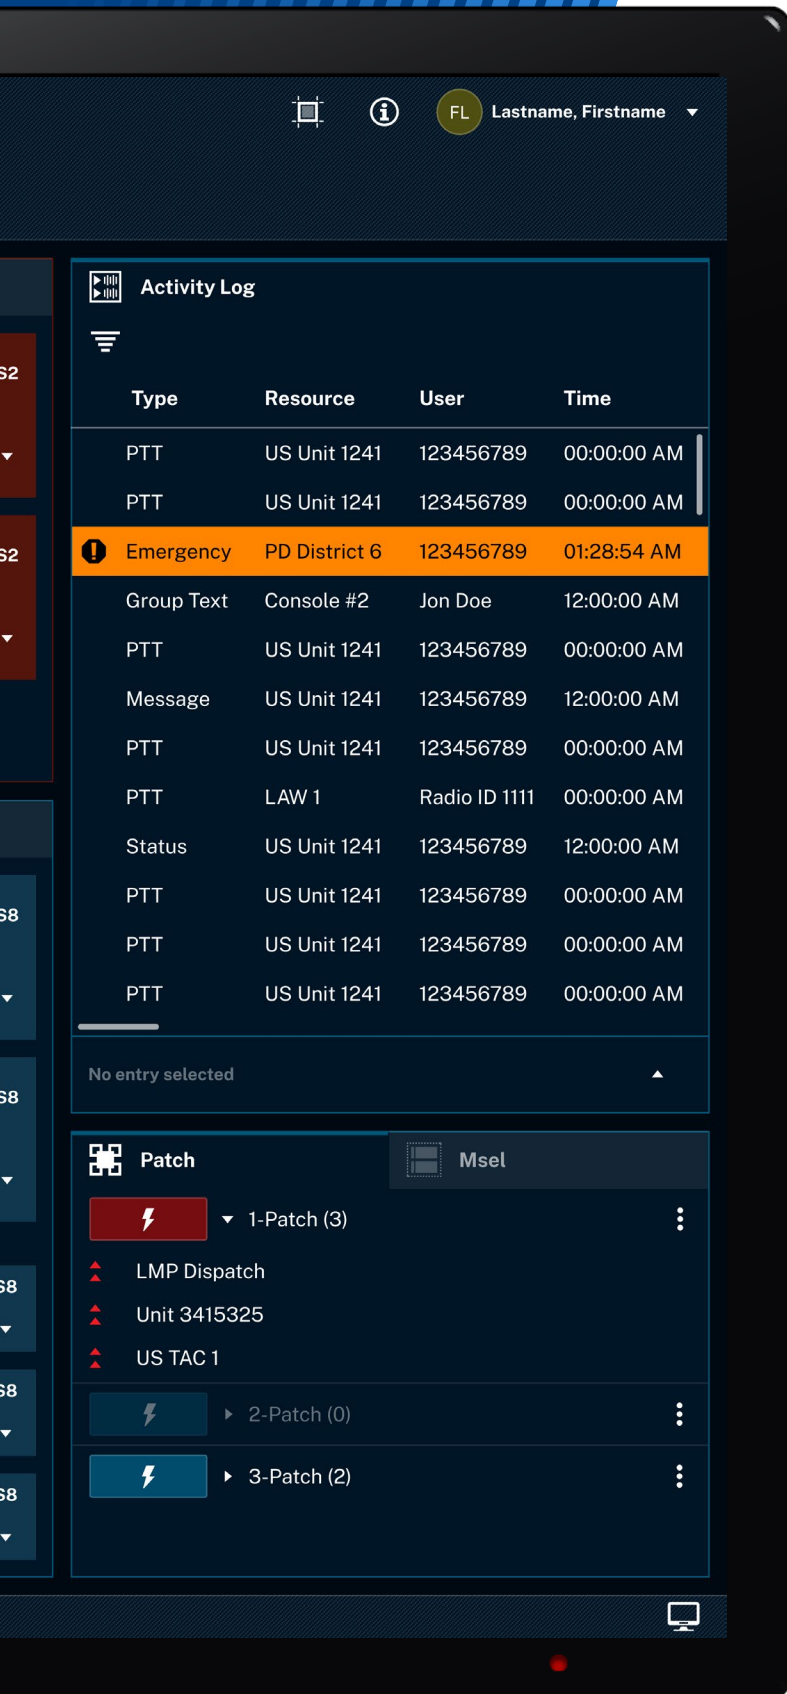

Choose from a wide array of icons from our library.

Touch, type or click

Stay connected in the way that suits you best with a resource-centric design and the flexibility to interact with the console by touch, type or click.

Support panes

Think fast, work faster

Access built-in services to help you work faster while providing greater support to users in the field. Choose from a variety of support pane services, such as patching, multi-select and an activity log.

Flexible deployment configurations

One console, multiple deployment options

CommandCentral AXS leverages an elegant, intuitive GUI based on more than 5,000 hours of research with customers like you. Virtually unlimited screen layout options ensure you can configure AXS with the precise functionality to fit your organisation's needs and workflows.

Purpose-built

Smooth migration. Modern experience. Same trusted foundation.

CommandCentral AXS brings a refreshed, modern look and enhanced security — yet at its core, it's still a Motorola Solutions' radio dispatch console with all the benefits that brings. For MCC 7500 series users, you get a smooth, straightforward migration to CommandCentral AXS at a pace you are comfortable with.

Streamline operations

Use the same network management tools for both your radio system and CommandCentral AXS radio dispatch consoles. Get the same support from one point of contact for both the radio system and consoles.

Improve field safety

Give dispatchers the ability to prioritise talkgroups during tactical situations and remotely listen to the audio in the vicinity of a radio.

Simplify deployment

Integrates directly with your ASTRO or DIMETRA radio network, without need for additional hardware.

Part of an integrated public safety command centre

A consistent interface – train less, respond faster

CommandCentral AXS uses a common UI, consistent with other CommandCentral applications across the Motorola Solutions ecosystem. Dispatchers can move fluidly between tools without wasting time relearning controls, reducing both onboarding and retraining costs. Familiar layouts and streamlined workflows minimise errors in critical moments, while building operator confidence under pressure. Whether managing radio resources, coordinating mutual aid, or leveraging other CommandCentral solutions, a unified interface ensures your team adapts quickly and stays mission-focused.

Mission-critical accessories

Make the most of your console with dispatch accessories you can count on. Put your trust in dispatch audio accessories that have been designed and tested for mission-critical performance and reliability.

To learn more about accessories, please visit www.motorolasolutions.com/axs

Customise your services

Tailor any additional services and expert support based on your agency's unique needs.

Choose from a wide range of service options, starting from entry-level technical support, repair, software maintenance and security updates, through to more advanced services such as lifecycle management, preventative maintenance and cybersecurity.
