

## Fact Sheet

# AppArmor

Our platform. Your brand.

An informed community is a safer community. Put your health, safety and well-being resources into the hands of your community members with AppArmor, a custom branded personal safety application. AppArmor provides a broad range of engaging features, aesthetic branding opportunities and dynamic content that is easy to update in real-time. Our customization options meet the unique needs of universities, offices of emergency management and corporations of all shapes and sizes.

In a media environment saturated with misleading or false information, AppArmor gives your audience a clear designated channel for truth.

### → Custom branded

AppArmor deployments use the name, colors and logo of your organization. Your app is released under your brand and App Store account, which helps increase downloads and adoption.

### → Configurable

Provide resources and features relevant to your community. All features can be tailored for a curated user experience and can be available to the public, or require a login for access.

### → Content management

Quickly publish changes without having to submit updates to the app stores or use valuable IT resources. Aggregate multiple apps under a unified brand based on user locations or roles.

# Key features

## Stronger community engagement

Deepen connections with your people beyond the receipt of a text, email or voice call during an emergency. Integrated mobile apps can encourage your community to stay engaged and motivated. Enable quick access to useful resources right in your end user's pocket.

## Messaging redundancy

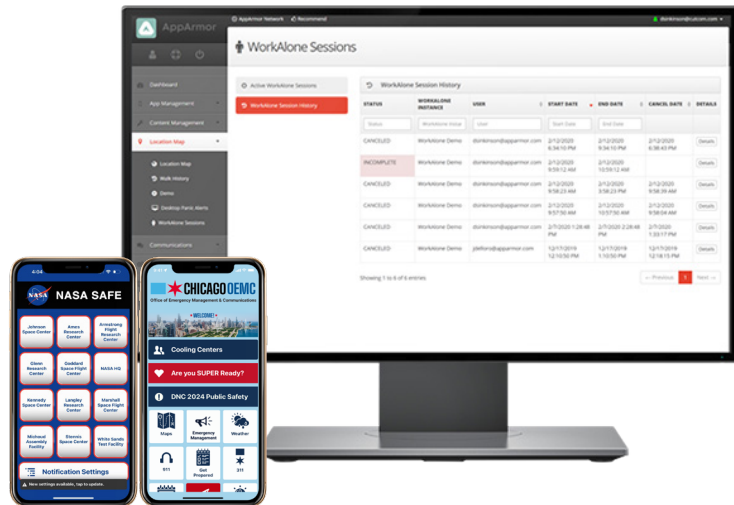

Unlimited push notifications provide secure messaging with more reliable delivery, especially in areas or countries with challenging network conditions that may impact other typical messaging modes.

## Straightforward customization

Make unlimited changes to improve your application's experience and value through timely updates. Apps can either be available to the public, or require a login for access.

## Safety toolbox

Quickly access critical resources, maps, two-way communications features, tip reporting, mobile safe walk functions and more. Content can be stored in the app for offline-ready conditions where end users lack connectivity.

# Critical communication and collaboration

The Rave Suite is purpose-built to enable emergency notifications, critical data sharing, and response coordination.

Enhance emergency preparedness and response, interconnect public, private and 9-1-1 response teams, and provide timely and targeted communications with the full Rave Mobile Safety Suite.
