

# COMMANDCENTRAL ANALYTICS

## UNCOVER MORE ACTIONABLE INSIGHTS

Community expectations of public safety are rising. Yet, budgets and resources are never enough, bringing new meaning to the phrase “do more with less”. When it comes to untapped potential, your data is a good place to start.

Crime analysis is not a new term but it’s importance is growing. Analysts are capable of identifying trends and patterns like few others can. But, they often face obstacles to being most impactful - manual processes to access and utilize data, generic business applications that lack purpose-built tools for public safety needs and a lacking ability to collaborate effectively and share the insights they’ve uncovered.

### FIGHT CRIME SMARTER - AND HARDER

CommandCentral Analytics leverages data from your agency’s CAD, RMS and other systems, a nationwide public safety data exchange and over 10,000 public records databases to deliver role-based intelligence to users across your operation.

With CommandCentral Analytics, analysts are equipped to identify crime trends and patterns quicker, detectives can more easily track down leads and invaluable insights can be communicated seamlessly across your agency so officers can more proactively engage with the community and fight crime smarter - and harder.

In our 2017 Crime Analytics Survey of over 140 public safety professionals in the United States,

**84%**

indicated that they are still using Microsoft Excel for their crime analysis needs.

## KEY FEATURES

### Unlimited Dashboard Creation

Enable your analysts to configure and save an unlimited number of dynamically updating dashboards for quick reference.

### Robust Analytic Visualizations

Intuitively present data on dashboards with various graphical widgets that help analysts identify patterns and communicate trends.

### Simple Visualization Controls

Simple, yet extensive controls enable analysts to narrow in on the data they want to examine on a dashboard or particular visual.

### Searchable Incident Reports

With the ability to surface granular levels of data from source systems, analysts can conduct all their analysis from one place.

### Advanced Entity Searching

Quickly surface information from across systems on people, vehicles, businesses, virtual identities and even phone numbers.

### LexID & Link Analysis

Organize search results and verify identities with 99.7% accuracy so that raw, mass information can become intelligence.

### Investigative Project Creation

To ensure all information can be easily found pertaining to an investigation, teams can save their work-in-progress as projects.

### Accurint for Law Enforcement

Leverage an included enterprise subscription with our 'Plus' offering for conducting more detailed public records search.

### Easy Dashboard Sharing

In-app dashboard sharing enables intelligence to be communicated across teams for more seamless collaboration.

### Comprehensive Reporting

Create standard reports that can be run on a specific cadence and can then be sent directly to stakeholders via email.

### Data Downloading

Make the most of your data not only within CommandCentral Analytics, but in other programs with multi-format export support.

### Predictive Crime Analysis

Enable officers on the street to better understand how crime is moving and reacting in order to proactively patrol.

## WHY COMMANDCENTRAL ANALYTICS?

### Built To Leverage More Data

CommandCentral Analytics can utilize data from across a variety of your systems including from any CAD or RMS. It also can access 298M interjurisdictional records from other agencies and public records from over 10,000 sources.

### Configurable For Any Role

Meet all of your agency's analysis needs with a solution that is optimized based on role and responsibility. Whether a chief or an officer, a detective or an analyst, experiences are tailored with tools purpose-built for the unique nature of their jobs.

### Delivered as-a-Service

Cloud-based software-as-a-service is cost effective and optimizes your operation by being secure and reliable while delivering new capabilities regularly. It also allows us to iterate and implement feedback to better meet your needs.

## THE FUTURE OF PUBLIC SAFETY SOFTWARE

CommandCentral Analytics is built for uncovering more actionable insights. But, it's also a part of something more. We build software for mission-critical environments where every second matters. By unifying big data onto a common platform and streamlining workflows from call to case closure through a suite of intuitive applications, CommandCentral puts your information to better use, improves safety and efficiency for critical personnel and helps keep your focus on the communities you serve.
