

PAWNED PROPERTY

TRACK PAWN SHOP ACTIVITIES AND INFORMATION

INVESTIGATION ASSISTANCE

The Pawned Property module allows personnel to efficiently access and utilize information by automatically linking records of pawned items to name and property records throughout other applications. If the item is reported stolen when linked to a law incident, those records can prove helpful during investigations.

PAWN SHOP INFORMATION

Agency personnel can quickly locate pawn shop addresses, phone numbers, owners, and other pieces of information using the Pawned Property module. This module also allows users to search detailed information about each shop within the agency's jurisdiction.

PAWN ACTIVITY TRACKING

Pawned Property is designed to accommodate the laws and procedures of each state while helping agencies maintain a complete record of pawn shop activities including site visits, pawn shop inspections, and the pick-up of stolen items. Users can automatically calculate pawn shop 'hits' and identify a shop's stolen items. This module also allows users to reference information on items taken into custody with greater accuracy by recording the law incident number, request, evidence number, and a brief description of the circumstances surrounding the activity.

PREFORMATTED REPORTS

This module provides an extensive reports menu to help users compile system information into comprehensive, easy-to-read reports. Agency personnel can print a report to identify frequent pawners or determine recovery rates for stolen items. The reports menu can help agencies organize and share collected data, maximizing efficiency.

EASY DATA IMPORT

Pawned Property allows agencies to easily gather property data from pawn shops in their jurisdictions. Users can collect property information from pawn shops electronically, increasing agency efficiency.

- Users can track detailed property information such as pawn shop, ticket number, and pawn owner, along with contact information such as name, DOB, SSN, address, and phone number.
- The module displays related information such as item name, category, brand, model, color, serial number, pawn code, date pawned, personal identification numbers, and loan value.
 - Agencies can use the Pawned Property module to track information on pawn activities including audits, citations, inspections, and recovered stolen property, as well as to capture details such as time assigned and completed, time used, ticket number, value recovered, and activity descriptions.

TOTAL SOFTWARE INTEGRATION

Spillman Flex's Integrated Hub™ is an open, centralized database where all agency information is entered, stored, and extracted in real time, providing total software integration. This allows users to enter data once and have it automatically shared among related modules. Agencies using this module can optimize their system and enhance productivity through total integration with other Flex modules.
