

HELPING YOU BE YOUR BEST IN THE MOMENTS THAT MATTER

FREE DIGITAL EVIDENCE CAPTURE AND MANAGEMENT TRIAL

In this unprecedented time of the COVID-19 pandemic, your agency is faced with new challenges when it comes to protecting the health of your officers, investigators, evidence clerks and other staff. Daily tasks like conducting interviews, collecting and handling evidence, or team and agency collaboration become a source of concern. To support you as you bravely serve your community during this crisis, Motorola Solutions is offering a free Digital Evidence Management trial for six months or through December 31, 2020 — whichever comes first — to help streamline investigations while minimizing physical contact whenever possible.

REDUCE PHYSICAL CONTACT, REDUCE PHYSICAL MEDIA

DIGITAL EVIDENCE COLLECTION

As a part of Motorola Solutions' CommandCentral Community suite, Digital Evidence Collection reduces contact with the public and provides a secure, simple, case-specific method of transferring digital media from public sources to your agency. Valuable time is saved, the handoff is simplified and the evidence is automatically linked to a case.

CAPTURE APP

Minimize your time in the field by quickly collecting video, photos, audio in a single, secure smartphone application. Media captured is automatically uploaded to CommandCentral Vault without having to bring evidence back to the station.

COMMANDCENTRAL VAULT

Protect officers, evidence clerks and others at the station with no physical media to store or share, reducing the risk of infection. Easily organize case information in the cloud and quickly review evidence in a single location. Permission and share your digital evidence within your team or with other agencies for secure and safe collaboration — from a distance.

CONSOLIDATED RECORD VIEW

Efficiently enter incident information within one user interface. Content can be quickly and securely shared with judicial partners, while an audit log and verified chain of custody preserves the integrity of the evidence.

Motorola Solutions proudly manufactures and deploys the sophisticated, cutting-edge communications, software, video security and analytics technologies that keep communities and nations safe. We have been on the frontlines with federal, state and local governments, including in times of crisis, for over 90 years. Today, our 17,000 innovators, engineers and manufacturing specialists are eager to help address critical gaps in the availability of medical and health management technology needed to fight the COVID-19 pandemic. We are pleased to offer hundreds of thousands of feet of secure, U.S.-based manufacturing, unrivaled operational agility and the capacity for rapid deployment.

MOTOROLA SOLUTIONS STANDS READY TO SERVE OUR COUNTRY IN THIS MOMENT THAT MATTERS.

COMPLETE CONTROL OF YOUR DATA

At the end of your free Digital Evidence Collection and Management trial, you still own all of your data and associated metadata.

For existing CommandCentral Vault customers, the data collected during your free trial will remain in CommandCentral Vault after December 31, 2020. If you are not a CommandCentral Vault customer, you can export all data and associated metadata to your personal files or an external hard drive. You can also upgrade from the free trial to keep your data in CommandCentral Vault, as well as access additional functionality, such as third party integrations and redaction.

To learn more about this free trial, check out the [Frequently Asked Questions](#) document.
