

TAKE CONTROL OF YOUR INFORMATION

**PREMIERONE® CLOUD RECORDS
RECORDS MANAGEMENT SYSTEM**

MINIMIZE REPORTING TIME. STREAMLINE INVESTIGATIONS.

Your officers' time on the street is critical, but being forced to rely on handwritten notes, manual forms and outdated records systems slows them down. With the growth of digital evidence and new state and national Incident-Based Reporting (IBR) standards, the records burden on agencies has never been greater. Adding to the complication is the need to quickly access and share information with agency partners and prosecutors in a timely manner, while preserving data integrity.

PremierOne Cloud Records simplifies incident reporting, streamlines data management and helps successfully build and close cases. The system is designed to help your agency overcome the complexities associated with managing the influx of information, as well as maintain criminal justice information services (CJIS) requirements. Augment your agency's records management operations by hosting the robust, proven capabilities of PremierOne in the Microsoft Azure Government cloud for improved system security and expedited deployment and updates.

DISCOVER A NEW LEVEL OF PRODUCTIVITY

SIMPLIFY INCIDENT REPORTING

Writing reports and documenting evidence collection take up a significant amount of an officer's time that could be better spent out in the field. PremierOne Cloud Records enables officers to spend more time patrolling through anywhere-access to comprehensive search and streamlined incident reporting capabilities.

- **Simultaneous Data Entry:** Complete the reporting process faster by collaborating on the same report with other officers simultaneously and in real time.
- **Field Search and Reporting:** Accomplish one-time data entry with reports on your mobile data terminal that are pre-populated with call-for-service or even historical data from a search or query.
- **Work Assistance and Compliance:** Identify needed information, simplify search and inputting of historical information, and then verify compliance for reports to reduce data entry and save time.

STREAMLINE DATA MANAGEMENT

The influx of data from the NIBRS transition, as well as the ever-growing reliance on digital evidence, means more and new types of work for your records and evidence staff. PremierOne Cloud Records helps maximize the effectiveness of your records staff with powerful tools to organize your agency's growing amounts of data.

- **Workflow Management:** Easily check and verify reports with an approval workflow that ensures efficient report review and more accurate submissions to the state and FBI.
- **Quality Control Suite:** Continually maintain record quality with merge and de-duplication tools, while also complying with court orders using expunge and redaction capabilities.
- **Operations Management:** Agency modules help manage important resources like equipment and personnel, so you can improve cost-effectiveness and your return on investment.

SUCCESSFULLY BUILD & CLOSE CASES

The more incident information detectives need to gather and analyze, the longer it can take to close a case. New types of information also pose sharing challenges. PremierOne Cloud Records enables detectives to close more cases faster by compiling all case-related information into a single, collaborative experience.

- **Task Assignment and Tracking:** Assign cases, set up tasks and seamlessly track them to completion to ensure a timely and thorough investigation.
- **Relationship Mapping:** Easily visualize connections between people, locations, vehicles, property and other entities to identify leads faster.
- **Robust Reporting:** Reduce the need for custom reports with a curated, standard reporting and dashboard experience for meaningful insights.

PROVEN RECORDS CAPABILITIES WITH CLOUD BENEFITS

Agencies are increasingly seeking cloud-based software solutions as technology advances and more deployment options become available. Working with a Records Management System in the cloud allows agencies to benefit from an optimized and predictable cost model, agility in deployment as well as increased scalability, availability and security.

STAY AHEAD OF THE CURVE

A cloud-hosted records solution offers a faster deployment process than traditional on-premises solutions. Your team can easily evolve and adopt new features through constant, agile development and flexible deployment options to meet your needs, on your timeline, without disrupting mission-critical performance.

SPEND WHERE IT COUNTS

PremierOne Cloud Records makes pricing predictable and gives you the flexibility to scale resources to your agency's needs. Shifting to an operational expenditure model allows you to pay a yearly subscription for technology, eliminating the need for capital investments to keep technology current. In addition, cloud computing offers elasticity so you only pay for what you use while simultaneously giving you the power to scale for additional processing power, bandwidth and storage as workloads change. Motorola Solutions manages maintenance, updates and support tasks, freeing up your team's precious IT resources.

SECURELY MANAGE DATA

PremierOne Cloud Records is CJIS compliant, employing the latest security and encryption measures so you can easily meet compliance requirements. Hosting your records system in the cloud reduces your agency's need to protect a physical location and instead enables you to offload security costs to cybersecurity experts. Combat emerging and changing threats with advanced threat intelligence from deeper analytics, plus real-time updates and security patching. Highly redundant and geographically isolated data centers and network infrastructure ensure the continuity of mission-critical operations.

STREAMLINE OPERATIONS WITH CLOUD FUNCTIONALITY:

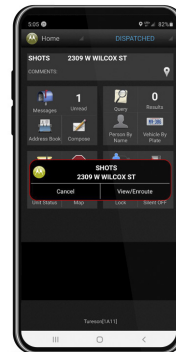

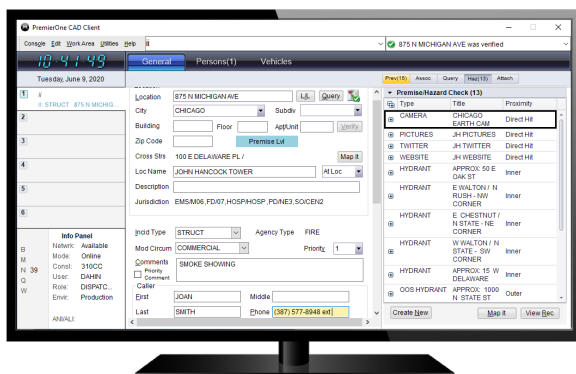

- **Digital Evidence Management:** Aggregate and intelligently organize all incident content within the record using robust, embedded digital evidence management capabilities.
- **Consolidated Record View:** A new, more intuitive experience to quickly review all incident information and easily share with prosecutors.
- **Unified Search:** Find the information you need faster with an internet-like search across agency records and digital evidence.

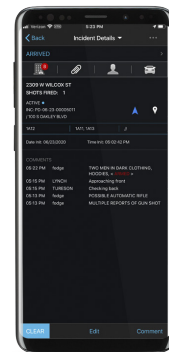

A PART OF SOMETHING BIGGER

PremierOne Cloud Records is part of a proven public safety suite, unifying CAD, Records and Mobile in the cloud to enhance collaboration, maximize security and support your evolving needs.

Android Incident Detail

iOS Dashboard

PREMIERONE CLOUD CAD

PremierOne Cloud Computer-Aided Dispatch (CAD) is transforming public safety and dispatch operations. It offers a virtualized CAD experience with simplified configurations and integrations, offering your agency a robust, world-class experience with the benefits of the cloud while managing calls faster and allocating resources more efficiently.

Integrating PremierOne Cloud CAD and PremierOne Cloud Records helps streamline your workflow. Accomplish one-time data entry with reports that are pre-populated with call-for-service or historical data, as well as query name, vehicle, property, or incident record without exiting the CAD status screen.

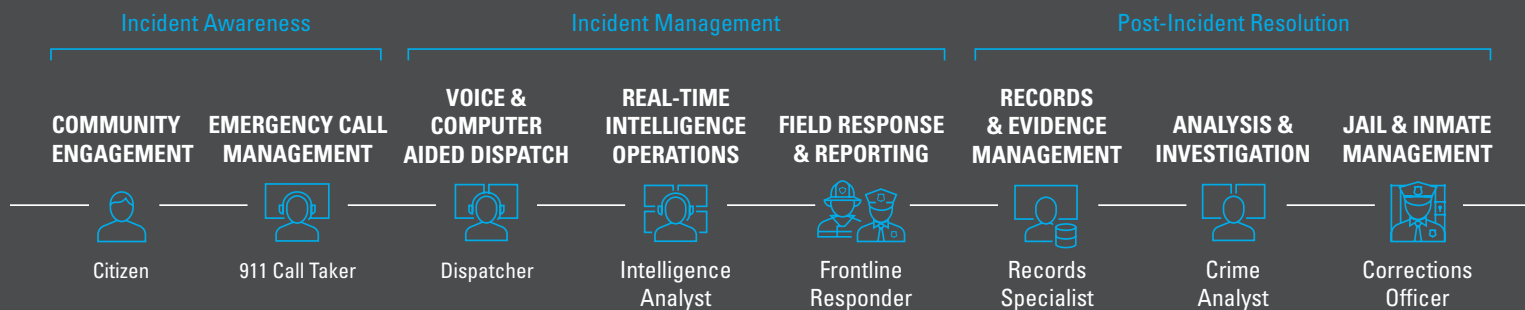

PREMIERONE MOBILE

PremierOne Mobile enables public safety personnel to assess and prepare for a situation when dispatched, en route, and on the scene. Information becomes easily accessible, increasing situational awareness and improving field response.

First responders have access to real-time information from PremierOne Cloud CAD, PremierOne Cloud Records and state and federal databases. Users easily access information they need via a simple, one-step navigation experience throughout the PremierOne Mobile application, enabling more informed decisions and quicker, safer, and more efficient resolution.

COMMANDCENTRAL

The industry's most integrated public safety software suite from call to case closure.

A PARTNERSHIP FOR EVOLUTION

At Motorola Solutions, we understand that as technology advances and the pace of change accelerates, your agency has an increasing need for a proven technology partner. We are helping agencies benefit from the innovation and flexibility that cloud solutions offer, without asking you to compromise your mission-critical operations. Together, we build stronger partnerships and better solutions, powered by the cloud and informed by customer feedback.

PremierOne Cloud Records is powered by the CommandCentral platform and offers seamless evolution into our integrated CommandCentral software suite, helping you adopt next-generation user experiences and additional end-to-end integrations. Built to unify data and streamline workflows from call to case closure, our suite helps you put your information to better use, improve safety for critical personnel and restore your focus on the communities you serve. Backed by a trusted, 90-year veteran with proven public safety leadership, CommandCentral is transforming the public safety experience with a focus on evolution, not revolution, in order to help you digitally transform your operation.
