

MOTOROLA SOLUTIONS

MOTOROLA SOLUTIONS & FIRSTNET. BETTER TOGETHER.

Your top priority is improving the safety and well-being of the community you serve. You want to provide your staff with the best tools and technology to make this happen and balance this imperative with ever-increasing budgetary restrictions due to competing resources. It's a daunting challenge. We understand this balancing act. And it's the main reason why Motorola Solutions and FirstNet have teamed up. Motorola Solutions has been a public safety trusted advisor for decades, while FirstNet has just begun to prove its mission to be the nationwide broadband platform built for and with public safety.

Together, Motorola Solutions and FirstNet can help you weigh the best communication solutions options, near-term and long-term, to meet your agency's – and community's – specific needs.

WHY MOTOROLA SOLUTIONS?

Motorola Solutions has been public safety's trusted advisor for 90 years, providing mission critical communications to the majority of first responders across North America. Motorola understands the need to help its customers navigate their transition to a mixed network environment and bridge communications between LMR and LTE by providing:

- **LMR AND MISSION-CRITICAL BROADBAND-ENABLED DEVICES.** Best-in-class audio and public safety built devices allow PTT solutions and intelligent middleware.
- **PUSH-TO-TALK SOLUTIONS AND INTELLIGENT MIDDLEWARE.** Enabling teams with instant communication and the ability to send messages to any user and view their location.
- **ROBUST ECOSYSTEM OF PUBLIC SAFETY APPLICATIONS.** Providing real-time situational awareness and preparedness on the ground.
- **INTELLIGENCE SOFTWARE, SOLUTIONS AND SERVICES.** Helping public safety agencies predict incidents before they happen.

WHY FIRSTNET?

FirstNet is the nationwide public safety broadband network, services and solutions that are dedicated to first responders and those that support them. It is more than a network, including advanced services, applications and purpose-built devices. FirstNet provides:

- **Availability.** Provides first responder voice, data, video, images and text through a dedicated LTE network core. Reduces concerns about network congestion with network priority and preemption.
- **Operability & Interop.** Experience faster response times and enhanced situational awareness with improved information sharing across agencies, disciplines and jurisdiction.
- **Innovation.** Fosters an ecosystem of innovation through public safety applications and devices that give first responders advanced technologies to help save lives and protect communities.

WHY BETTER TOGETHER

FirstNet and Motorola Solutions share a common goal of providing highly secure, reliable communications, built for public safety. With complementary service offerings and technologies, Motorola and FirstNet allow you to:

MAXIMIZE INTEROPERABILITY.

Experience seamless interoperability between FirstNet LTE and P25 LMR systems. Enable interoperability to non-traditional users (e.g. volunteer fire fighters, fire marshals, under cover).

EXTEND COVERAGE AND CAPACITY OF LMR AND LTE.

When the unexpected occurs, essential members of response teams can connect and collaborate from wherever they are. Connect outside the jurisdiction and extend coverage nationwide.

COMMUNICATE ACROSS AGENCIES AND DEVICES.

When multi-agency response is required, everyone can work together using both voice and data applications.

FEDERATE DATA ACROSS APPS & WORKFLOWS.

Integrate voice, multi-media messaging and mapping onto a common platform of applications built with public safety day-to-day operations in mind.

STAY CONNECTED: EYES UP, HANDS FREE.

Automated notifications and data sharing allow officers to share mission-critical information in real-time without distraction, along with public safety applications and devices to help ensure they are focusing on the mission at hand.

ELIMINATE CONCERNS ABOUT NETWORK CONGESTION.

Available network security, priority, and preemption giving first responders priority access to the network to help them communicate more effectively during times of congestion.
