

WHY MOTOROLA SOLUTIONS FOR ENTERPRISE LPR & BODY-WORN CAMERAS

LICENSE PLATE RECOGNITION SOLUTIONS

Motorola Solutions has a proven history of helping customers, including many federal law enforcement agencies, build effective license plate recognition (LPR) programs. These are the capabilities that have made our customers most successful over the past 18 years.

Cameras For All Traffic Types & Scenarios

- Fixed: up to 150 MPH in the dark
- Mobile: up to 150 MPH in the dark
- Quick-Deploy: up to 75 MPH
- Multiple mounting options
- Battery, solar or direct power
- Self-Deployable - Takes less than 10 minutes to install
- Trailer: Flexible, turnkey solutions
- In-Car Video System-Integrated
- Mobile Application: scan single or multiple plates at speeds up to 45 MPH from any smartphone with a camera

Readability For All Plates & Tag Types

Our cameras are tested to read all plates, temporary tags, paper tags and even identify when a plate is missing. We have read plates like the new Tennessee plates from day one.

Live Alerting In 3rd Party Applications

Our solution integrates with CommandCentral Aware Enterprise and other third-party security operations center (SOC) programs for map-based alerting.

Advanced, Patented Analytics & Searching

- Locate Analysis (patented)
- Stakeout (patented)
- Convoy Analysis
- Year/Make/Model/Type/Color Search

100% Data Ownership & Management

Our customers own 100% of their data and exclusively manage their sharing. Customers can also keep their data even if they cancel.

- **UNLIMITED** data retention
- **UNLIMITED** data sharing
- **UNLIMITED** hot list sharing

Out of the box, our solution is also equipped for public-private partnership with the ability to conduct one-way sharing of data from private businesses to law enforcement agencies.

100% Free Training By Our Training Team

With over 150 years of law enforcement experience between them, our trainers offer in-person, online, on-demand and webinar training courses for all of your users.

Transparent CapEx & OpEx Pricing

Everything is included with subscriptions and Camera License Keys (CLKs) include all of our data and analytics features. Once subscription commitments are fulfilled customers own the equipment and can continue use with annual CLK purchases and their own cellular data plans only rather than a perpetual lock in.

Seamless Data Sharing with Enterprise Security & Law Enforcement

Enhance collaboration by directly sharing your hotlists and site data with other sites, enterprise security teams, and law enforcement. It's your choice if and who you want to share with.

NDAA Compliant

All of our cameras are made in Richardson Texas which is available for customer visits.

WHY MOTOROLA SOLUTIONS FOR ENTERPRISE LPR & BODY-WORN CAMERAS

BODY-WORN CAMERA SOLUTIONS

Protect what matters. Empower your employees with the VB400 body cameras - purpose-built to deter aggression, improve business practices and capture confrontations.

Designed for the rigors of the job with full-shift recording, multiple ways to connect and intuitive controls.

Simplicity

With its ergonomic design, seamless checkout experience and simple workflows, our VB400 body cameras are easy to use day-to-day and ensures your team can capture high-quality evidential video when it's most important.

Unlimited Users

The VB400 body cameras can be assigned and reassigned to any worker.

RFID Checkout

You should always be able to trace body-worn video back to the operator who recorded it - and with multiple ways to assign body-worn cameras, including RFID touch assign, your team can stay accountable while still getting into the field as quickly as possible.

- Use RFID to allocate cameras to users. This enables efficient pooled issue of cameras, or RFID controlled personal allocation.

Peer-Assisted Recording

Minimize workload for responding workers; your VB400s can be triggered to start recording immediately, when another one does so in a configurable radius.

Long Battery Life

Record for up to 12 hours continuously on a single charge. Configurable standby and safety modes preserve battery life.

Connections to Motorola Solutions radios

Ensure your workers capture critical evidence, even in stressful circumstances; trigger VB400s to start recording when Motorola Solutions MOTOTRBO radios enter an emergency state.

CCTV Streaming

Livestream your VB400 body camera over WiFi to the VMS that handles your fixed CCTV cameras.

On-Premises or Cloud

Manage and store your VB400 body camera evidence in VideoManager EX. VideoManager EX is available either on-premises or in the cloud.

Perpetual On-Premises Licensing

You own your on-premises VideoManager EX software forever - no hidden or recurring fees,

Software Assurance

Receive 5 years of free software assurance.

Note: Additional use-case body-worn cameras available. Talk to your sales representative.
