

5G Hub

Plug-and-Play Power and Connectivity for Rapid Camera Deployment

The 5G Hub is a ruggedized network appliance engineered to simplify and accelerate the deployment of your critical camera infrastructure. It provides 5G network connectivity and robust power delivery, ensuring your operations stay online and effective.

Designed for true plug-and-play convenience, the 5G Hub comes pre-configured, eliminating any need for onsite IP address setup or complex hub configuration. Just connect the hub to a standard 120/240 VAC power source, plug in your PoE+ cameras and your system is ready to upload LPR detections and stream high-quality video.
