

VIGILANT FACEALERT

PINPOINT PERSONS OF INTEREST FASTER

Vigilant FaceAlert is a real-time facial recognition-based alerting solution that analyzes over 350 facial vectors to accurately detect faces so you can quickly respond to threats and find at-large suspects sooner – all by leveraging the existing systems you already have in place.

We believe facial recognition is an assistive technology that can be used for good. Our algorithms test consistently among the best and are constantly being refined with new, diverse datasets. Additionally, audit capabilities and in-depth training help ensure responsible use by our customers.

KEY BENEFITS

Proactively Recognize & Respond

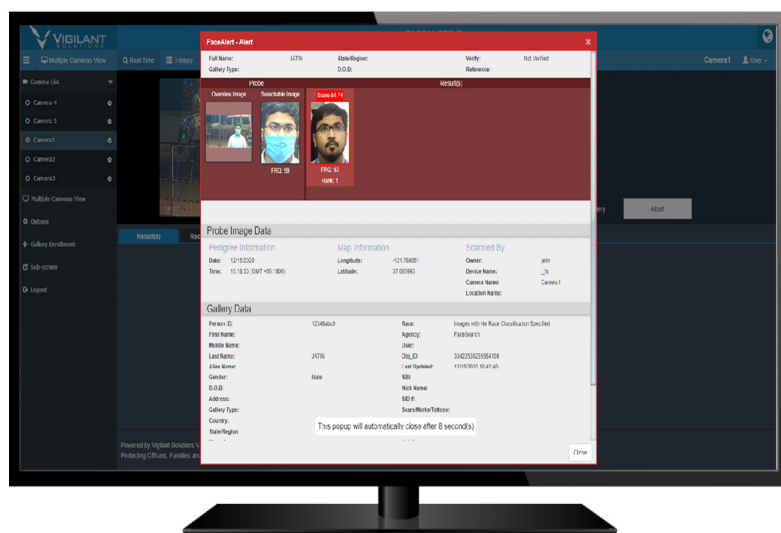

Accurately detect watch listed faces in near real-time and receive alerts based on your preferences.

Find & Identify Suspects Faster

Query one or multiple camera locations based on a specific time frame to easily detect a person of interest.

Adopt Facial Recognition With Ease

Leverage existing IP camera systems to detect persons of interest, VIPs or other pre-identified faces.

PRIMARY FEATURES

NIST-Certified Algorithm Accuracy – Accurate and efficient NIST validated algorithms.

Configurable Real-Time Alerting – Receive a real-time alert when you match a person of interest to a watchlist or when that person enters a preconfigured zone.

Convenient Watchlist Management – Easily manage multiple watchlists that you build or from any third party backend solution.

Location-Based Visual Line-up Search – Create a visual lineup of an identified individual along with others during a particular time frame.

Law Enforcement-Ready Reporting – Save a PDF or output a report for case files or others involved in investigation.

Vigilant FaceSearch Image Lookup – Leverage video feed to match facial images against your gallery and watchlists.

Broad Camera Compatibility – Provide an added layer of security and intelligence by leveraging any IP camera system and your existing infrastructure.

3rd Party System Integration – Secure and seamless integration with Vigilant FaceSearch as well as 3rd party systems for triggering alerts.

Free, Expert Training Sessions – We train our customers on how to control access, use proper workflows and procedures while also keeping them up to date on policy and laws.
