Go beyond basic searches and hot list alerts with a true vehicle location intelligence solution. Vigilant PlateSearch empowers your team with patented analytics and billions of license plate scans from your agency’s own cameras, other departments cameras, enterprise partners and a nationwide commercial data network to identify, predict and alert to vehicle sightings.

With this cloud-based software solution, system management couldn’t be easier while data retention, access and sharing is completely under your agency’s ownership – keeping you in control.

**KEY BENEFITS**

**Pinpoint Past Vehicle Locations**
Scour billions of easily filterable historical vehicle scans using just a license plate number, time, date or location.

**Determine best points of contact**
Locate hard-to-find vehicles in real-time, with the help of associate vehicles or based on previous sightings.

**Stay in control of your system**
Rely on fool-proof mechanisms and built-in processes to simplify management and maintain compliance.
**VEHICLE LOCATION INTELLIGENCE**

Having billions of license plate recognition records at your disposal isn’t enough. You need tools that help you find the needle in the haystack. Vigilant PlateSearch better equips your agency by adding our powerful analytics to your open cases to develop more leads.

**COMBAT DRUG TRAFFICKING:**
Using Convoy Analysis, easily identify vehicles travelling together as part of a trafficking convoy so you can generate new leads, establish connections and build a stronger case.

**FIND A SUSPECT ON THE RUN:**
By doing a comprehensive Plate Location Analysis you can use predictive analytics and historical vehicle location data to determine potential locations they might be hiding out.

**DISRUPT A CAR THEFT RING:**
Leveraging Associate Analysis, identify vehicles who have been seen together so you can verify a potential accomplice and getaway car used during a string of vehicle thefts.

**SOLVE A SERIES OF BURGLARIES:**
Common Plate Analysis can help you generate a suspect lead by identifying a vehicle which has been previously sighted at the various locations of a series of burglaries.

**ADDITIONAL FEATURES**

*Complete and partial plate search* — Generate a preliminary list of suspect vehicles, even if a victim or witness can only recall a partial plate number.

*Location-based stakeout search* — Source potential leads by identifying vehicles previously sighted near the location of a crime scene.

*Year/make/model vehicle filtering* — Add further granularity to your searches based on vehicle year, make or model to find vehicles of interest faster.

*Simple Hot/Shielded List Management* — Improve collaboration with other agencies with the ability to subscribe to and share hot lists with a single click.

*Robust, Real-Time Alerting Options* — Beyond in-app hot hit indicators and configuring emails, push notifications can be enabled by downloading our Vigilant Mobile Companion application on your Android or iOS device. Additionally, you can run our Targeted Alert Service to receive desktop notifications while focusing on other tasks - perfect for dispatchers.

*Configurable Data Retention Settings* — Comply with state and local policies while ensuring you get the most value from your data well into the future.

*Agency-Managed Data Sharing* — Since you own your data, you get to decide who you want to share it with as well as the datasets you want to access.

*3rd Party LPR System Integration* — Easily capture plate data from existing ONVIF compliant, IP based cameras. Direct, client-level integrations are available to ingest data from other manufacturers LPR systems. And lastly, by leveraging the LPRD standard, agencies are able to share their data with third party systems.

*CJIS-Compliant System Security* — Ensure transparency is never in question and your data is safe with comprehensive access control and security processes.
