

VIGILANT PLATESEARCH

TRANSFORM LICENSE PLATES INTO LEADS

DATA IS CUMBERSOME. INTELLIGENCE IS ACTIONABLE.

LICENSE PLATE RECOGNITION (LPR) DATA ALONE SOLVES NOTHING. IT IS ONLY WITH ANALYSIS THAT IT CAN REVEAL PATTERNS, TRENDS AND ASSOCIATIONS WHICH GENERATE LEADS AND CLOSE CASES.

Take your agency beyond simple license plate searches and hot list alerts in order to find vehicles of interest faster. Vigilant PlateSearch, a part of the LEARN platform, is a vehicle location intelligence solution that builds upon the basics of license plate recognition with patented, powerful analytics which help your team instantly transform license plate recognition data into actionable intelligence.

FIND THE NEEDLE IN A HAYSTACK

Easily search for, find and review the location history of a vehicle of interest and determine where it may be located in the future.

DISCOVER NEW VEHICLE LEADS

Jumpstart your investigation by identifying vehicles you may not have known were connected to each other or specific locations.

HEIGHTEN YOUR AWARENESS

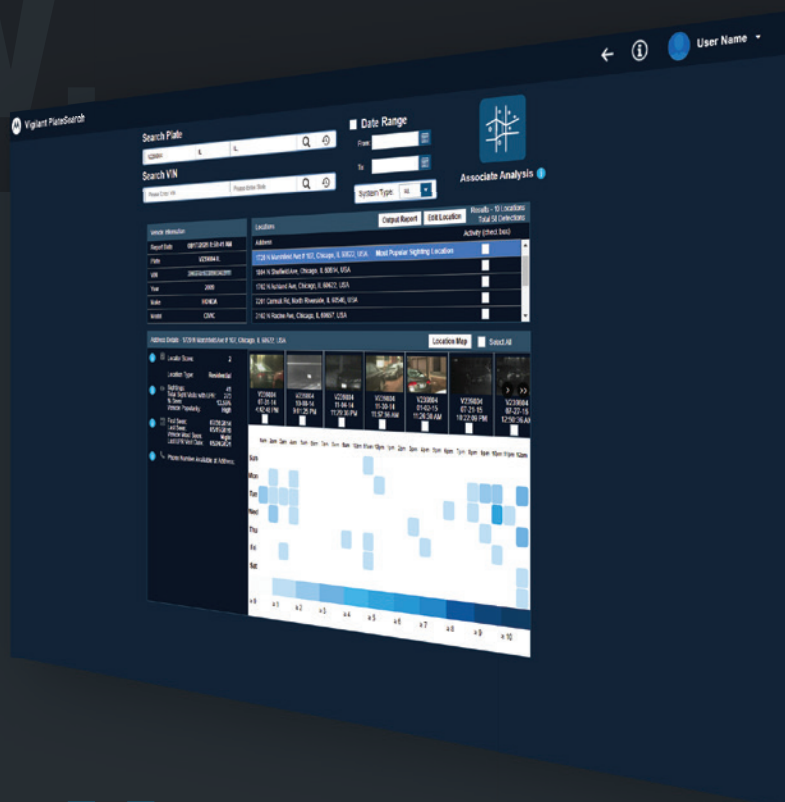

Configure hot lists and alerts for vehicles of interest to your agency and partner agencies. Receive alerts and access tools anywhere.

SEARCH. FIND. REVIEW.

FIND THE NEEDLE IN A HAYSTACK

Easily search for, find and review the location history of a vehicle of interest and determine where it may be located in the future. Vigilant PlateSearch provides complete and partial plate search capabilities with date and time filters to focus on detections that are most relevant. Detection data is intuitively displayed in a timeline view as well as on a map with integrated Google Street View. And when you're ready to intercept your vehicle of interest, Vigilant PlateSearch provides a best-address location and time-of-day, day-of-week heat map to determine when the vehicle is most likely to be there.

FIND A SUSPECT ON THE RUN

By doing a comprehensive Plate Location Analysis you can use historical vehicle location data to determine potential locations they might be hiding out and when to intercept them.

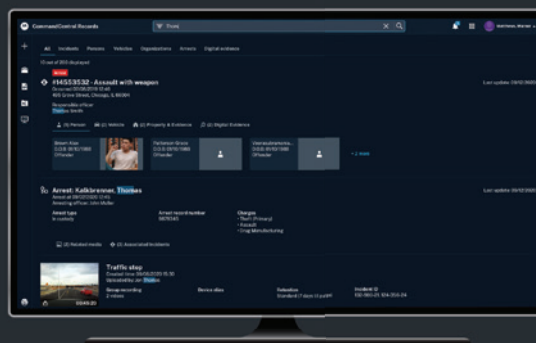

EXPEDITE YOUR ANALYSIS

For CommandCentral Records users, when a vehicle is added to an incident report, an indicator will appear if detections exist and allow you to open up a QuickSearch result with one click.

CONFIRM A HIT & RUN VEHICLE

Even with a partial plate, run a search for a vehicle. Results include a full vehicle image that can be used to verify with a witness a vehicle they saw involved in the hit and run.

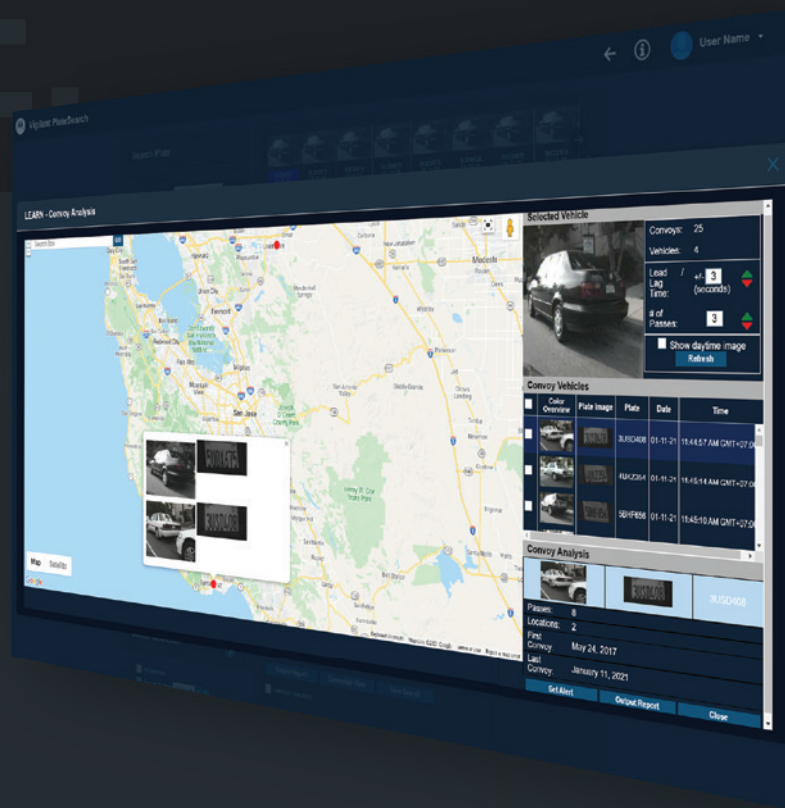

IDENTIFY. CONNECT. LOCATE.

DISCOVER NEW VEHICLE LEADS

Jumpstart your investigation by identifying vehicles you may not have known were connected to each other or specific locations. Our location-based, Stakeout search capability allows you to create a geo-fence, set a time and date range and even apply vehicle year, make and model filters to find a vehicle that has frequented a specific area. Even search across locations to find a vehicle common to multiple areas. Looking for multiple vehicles? Once you've identified your vehicle of interest, conduct an associate or convoy analysis to determine others which have been sighted parked near or travelling with your target vehicle.

SOLVE A SERIES OF BURGLARIES

Common Plate Analysis can help you generate a suspect lead by identifying a vehicle which has been previously sighted at the various locations of a series of burglaries.

COMBAT DRUG TRAFFICKING

Using Convoy Analysis, easily identify vehicles travelling together as part of a trafficking convoy so you can generate new leads, establish connections and build a stronger case.

DISRUPT A CAR THEFT RING

Leveraging Associate Analysis, identify vehicles who have been seen together so you can verify a potential accomplice and getaway car used during a string of vehicle thefts.

CONFIGURE. COLLABORATE. RESPOND.

HEIGHTEN YOUR AWARENESS

Configure hot lists and alerts for vehicles of interest to your agency and partner agencies. Hot list creation can be done at the individual, group or agency level with provisions for who has access. To enhance collaboration with law enforcement partners, you can also share and subscribe to hot lists. To receive alerts when a hot listed vehicle is detected, you have various options at your disposal.

Officers on patrol can receive alerts on their in-car LPR software or on their smartphone with push notifications from Mobile Companion.

Detectives and command staff can receive alerts via text or email or also download Mobile Companion for push notifications.

Receive an alert and want to do some additional investigation? Vigilant PlateSearch is cloud-based and available on desktop or mobile meaning that it can be accessed from anywhere you have an internet connection and through any device.

Dispatch can use our dedicated Windows application, Target Alert Service (TAS), to receive alerts and send units to respond.

Real-time crime center analysts with CommandCentral Aware can receive alerts on their map and incident monitor.

CONTROL YOUR SYSTEMS & DATA

Beyond advanced search, analysis and alerting, Vigilant PlateSearch is designed to keep you in complete control of your systems and data. Manage your Motorola Solutions LPR camera systems as well as integrate LPR data from other systems all in one place. Additionally, choose how long your data is retained based on your local law and regulations - not our rules. Lastly, our easy data sharing capabilities, with built-in memorandum of understanding (MOU) templates enables you to better collaborate with other law enforcement agencies as well as local business partners.

THE PILLARS OF DATA MANAGEMENT

CAMERA NETWORK

Collect detection data from any LPR camera systems.

DATA RETENTION

Set retention rules based on what works for you - not us.

DATA SHARING

"Grow" your network with agency and business partners.

THE DATA SHARING NETWORK EFFECT

1,800+

agencies on the LEARN platform and capable of data sharing

35B+

detection records from agency and business partners

600K+

daily hot list alerts initiated for vehicles of interest

Not ready to build your own LPR camera network? Start with just **Mobile Companion** for LPR data capture from any Android or iOS device or even just subscribe to Vigilant PlateSearch and access shared data from other law enforcement agencies and businesses.

DESIGNED FOR RESPONSIBLE USE

License plate recognition is not a trivial technology. That's why we take security seriously. Vigilant PlateSearch is designed to work seamlessly with our camera systems to provide data protection and integrity with end-to-end encryption and hashing. Access to your system requires authentication from a secure web-browser and you can provision users and groups to only have access to certain features or capabilities. Within the system, every keystroke and user action is recorded, with additional usage justification requirements for certain functionality, so that detailed audits can be conducted and accountability is never compromised.

A part of having a secure system is making sure that you're staying up to date. That is why we routinely deliver system updates to you that not only keep you secure, but bring you our best, most powerful new features as soon as they are ready. Software updates for Vigilant PlateSearch occur automatically and almost always include advance notification with information on enhancements.

EXPERT TRAINING & 24/7 SUPPORT

Becoming an LPR power user doesn't happen overnight. That is why our training team offers on-site, virtual and on-demand training for our entire portfolio. You can even access training if you're not a customer to see if our solutions are right for you as long as you have law enforcement credentials. Our training team is all former users who have been in your shoes and come from agencies large and small. With a broad variety of experiences as officers, detectives and analysts, they'll even provide assistance on specific cases if needed.

And while we hope you never need it, our support team is always available to help. Call or email and our technicians will work with you to troubleshoot and fix any issues with your system. If you have a faulty camera or need a license key, we also have online forms available to expedite the return authorization process or license key lookup.

BUILD A SAFER CITY WITH LICENSE PLATE RECOGNITION

To do license plate recognition well, you need the right tools for the job. We provide the most flexibility and options for capturing license plate data with fixed, mobile, trailer and quick-deploy camera systems, video-based integration and even mobile apps. All of these are equipped with our in-house developed, industry-leading LPR algorithm that is relied upon by law enforcement agencies world-wide.

Beyond ensuring you can collect the data you need, our suite of software solutions, including Vigilant PlateSearch - a part of the LEARN platform, combines robust hot list management and alerting options with patented, powerful search and data analytics to equip your team with the insights they need to close more cases, faster.

Our software also keeps you in complete control of your data and systems with camera management, agency-defined data retention and broad data sharing options with built in memorandum of understanding (MOU) templates for you and your partners.

Lastly, to ensure your program is most successful, your solution is backed by a team who has built our license plate recognition portfolio to be secure and designed for responsible use from the ground up. You also have access to 24/7 support and free in-person, on-demand and virtual training from our expert trainers, all of whom were former users and want nothing more than to help you succeed.
