The next generation of trunking has arrived. MOTOTRBO Capacity Max blends real-world experience with technological innovation to deliver a communications solution that’s tailor-made for your organization. Capacity Max is a trunked radio system with a dedicated control channel at every site. The centralized architecture reduces deployment complexity and operational cost, while increasing flexibility and scalability. The system offers a crisp, responsive user experience, with high security and reliability. And a suite of built-in tools and applications gives you complete control and visibility of your system’s operation.

Your communications system is at the heart of your organization: keeping your workers productive and maintaining safety at all times. So when you’re a large organization with sophisticated requirements and the highest standards, you should choose the best technology and the most comprehensive solution: MOTOTRBO Capacity Max.

APPLICATIONS
HIGH PERFORMANCE
Capacity Max has a fast, responsive user experience, with robust performance under load and rapid, smooth roaming across sites. Security is a high priority, with options for authentication, access control and encryption. And to ensure optimum operation, Capacity Max incorporates sophisticated fault management and call monitoring tools.

EFFICIENT
The system is built around a standardized IP network: there is no requirement for specialized interconnections. Signaling and traffic flow has been optimized to make the most efficient use of network bandwidth. The Capacity Max System Server (CMSS) centralizes control and management functions, as well as hosting voice applications gateways.

SCALABLE
Capacity Max is scalable to 250 sites, with up to 15 voice and data repeaters and up to 6 additional data-only repeaters per site, giving high-quality connectivity to up to 3,000 users at each location. The system uses standardized infrastructure, so you can migrate to Capacity Max from a MOTOTRBO IP Site Connect, Capacity Plus or Connect Plus system and reuse your earlier investment.
Capacity Max supports a broad ecosystem of voice and data applications from the MOTOTRBO Application Developer Program.

For Control Room Solutions, Capacity Max supports the Motorola Sold and Supported SmartPTT PLUS, TRBOnet PLUS and AVTEC Scout.
