

DIGITAL FIELD DOCUMENTATION

CAPTURE FAST, STORE SECURELY, REPORT AND SHARE WITH EASE

Your agency needs a better way to collect, manage, and share evidence from the beginning of an incident to the end of an investigation. Evidence collection is still a slow, manual process with countless inefficiencies. Too much time is spent performing administrative tasks. Even more so on sharing that information while ensuring a secure chain of custody. With the proliferation of mobile, smart devices and advanced technologies, you can solve these challenges with faster evidence collection and reporting, reduced administrative tasks, and easier information sharing. Motorola's Smart Public Safety solutions ensure you achieve greater efficiencies while improving public safety

FAST, EASY FIELD REPORTING AND DATA CAPTURE

Extend your field capabilities with a single cloud-based application that converges evidentiary photography, audio, video, electronic forms, notes, sketches, diagramming, and more. Your personnel can accurately, consistently, and securely record all aspects of a criminal event from their mobile device with functionality that works both online and offline. All available without integration into a records system.

Additionally, you can easily share this data with stakeholders while maintaining a secure and indisputable chain of custody. Field data can be viewed in near real time by any authorized user with an internet-connected device, improving resource allocation decisions. This means faster, safer outcomes for your officers and citizens.

IMPROVE DOCUMENTATION ACCURACY AND INCREASE PRODUCTIVITY

Law Enforcement Officer

Streamlined workflows around traffic accidents, crimes, etc. decreases the time spent on paperwork, and increases response time to citizens.

Detectives / Crime Scene Teams

Rapidly capture, view and share witness statements and other evidentiary multimedia to improve overall case management and crime scene cataloging.

Records Clerk

Immediate delivery of key case elements to the records clerk for a quicker case report and management process with less data entry.

Command Staff

Immediate access to actionable intelligence that's consistent and accurate for more informed decisions about resources and backup allocation.

FEATURES

- **Access Forms From Any Device:** Access the most current forms from your device to quickly complete required forms, generate and submit reports.
- **Simplify Audio Recording:** Efficiently record audio statements and capture case notes without the need for additional devices.
- **Digital Notepad to Sketch and Annotate:** Create digital scene diagrams, take notes, and markup photographs quickly; then share your notes with your team and command.
- **Record Video and Share Seamlessly:** Capture high-resolution video to support your investigation and stream or share securely in near real time.
- **Take Photos and Log Details Automatically:** Capture photos and reduce the risk of human error by automatically logging date, time, and GPS location in the photographic log.
- **Field Resources Right on Your Mobile Device:** Keep the most current SOPs and statutes on your device in searchable, easy to access documents – accessible right from the scene.
- **Online and Offline Functionality:** Information is continually stored and uploaded as soon as a data network is available so you maintain functionality regardless of data connection status.
- **Advanced Authentication:** Multi-factor authentication can be configured on an organization-wide or individual basis.
- **Secure Chain of Custody:** All actions are audited and tracked to ensure maximum accountability and data integrity. Audit trails of any alterations or access attempts made on case data can be viewed and exported by supervisors along with usage reports and tracking data for all their personnel.
- **Data Integrity:** Experience nearly 100% data integrity that equates to the possibility of losing one file per 10 million years (if there were 10,000 files stored).

PREMIERONE™ INTEGRATION

Paired with PremierOne Records, digital field documentation capabilities provide your officers the ability to collect, record and append forms to case reports immediately from their mobile device to the Records system. Streamline form administration even further with a single point of entry into PremierOne Records.

Forms are integrated into the handheld application, so officers can electronically capture case information from their smartphone or tablet, without needing to decipher and enter their handwritten notes when they return to the vehicle or the station.

Command staff and supervisors have immediate access to the information they need to make informed decisions about resources and personnel allocation.

KEEP DATA SECURE AND COMPLIANT

From incident creation to closure, evidence collected with our digital field documentation capabilities is kept secure with an undisputable chain of custody. Your data is stored and transported to the cloud using the most stringent security protocols on the market including CJIS, FIPS 140-2 and FISMA. When a case is filed, data is immediately wiped from the device, so officers do not have to worry about their phones being confiscated as evidence. Data access can be configured to your agency's requirements to ensure it is seen only by authorized personnel. Furthermore, because every action to the data is linked backed to a specific user, you maintain a documented evidence history and indisputable chain of custody.
